Mr. Leo Rice
Gooding, Idaho

Dear Mr. Rice

Statutes requires a field inspection in connection with the proofs on Permit # G-26424 before license and certificate of water right can be issued.

Such inspection and report on same is required for any and all permits being brought to license within this State.

Re: Permit No. G-26424

Mr. Leo Rice
Gooding, Idaho

Dear Mr. Rice:

We acknowledge receipt of the depositions of yourself and two witnesses, also affidavit of publication in the Gooding Leader, all submitted in proof of completion of works and beneficial use on the above numbered permit.

In checking these proofs we note several variations from the descriptions in the original permit and the published notice, as follows:

1. The permit and notice give the location of the well as in the NE¼ SE¼ Section 9, Twp. 7 South, Range 14 East, B.M., and not in the SE¼ SE¼ of Section 9, as stated in the proofs.

2. The land described in the permit and notice is in the NE¼SE¼ and S½SE¼ Section 9, whereas the proofs also include land in the NW¼ SE¼ Section 9, and the W½ SW¼ Section 10.

If there is an error in the proofs it may be corrected; but if there has been a change in the location of the well, and if additional land has been included, it will be necessary to file applications for amendment on the forms enclosed. And it may also requite re-publication.

We shall await your further advice.
