Dear Mr. Roberts:

We reviewed the assignments submitted in connection with the above referenced water licenses. We wish to advise you that we do not have means by which we can officially accept and record assignments on water licenses.

We will place a copy of the assignment and this letter returning your original assignment in each of the files for whatever purpose they may serve.

Once a water right is perfected and identified by a water license, any interest in the water right is vested in real property, and whoever holds title or mortgage on the real property will have interest in the right.

In order for the State of Idaho to record assignments on licensed rights, we would need a title insurance policy or an abstracted title to assure ownership interests.

If we can be of further assistance, please contact us.
