Dear Mr. Decker:

The only other permit we have any record of to cover the NE $\frac{1}{4}$, Section 36, Township 8 South, Range 15 East, was Permit G-21939. This permit was issued for the NE $\frac{1}{2}$ of Section 36 and was filed by J. A. McEwen and Inez McEwen, however, it was cancelled for failure to make proofs. Permit No. G-24653 was then filed in the name of S. S. Reinke for the NE $\frac{1}{4}$ and Permit G-24652 in the name of J. A. McEwen was filed for the NW $\frac{1}{4}$. Both permits were to replace the original permit G-21939.

Hope this information answers your questions.

Thank you for your letter of August 3rd with regard to the above matter.

In connection with the above permit I wish to advise you that on the evening of July 27th, 1954, on which day we submitted proof of completion of works and beneficial use the pump installed on the well covered by the above permit burned out and it was necessary for Mr. Reinke to install another pump and when replacing the same he thought it best to install another type of pump rather than a submergible pump. I presume that will make no difference but thought you had better be advised before your representative comes to check the well.

Yours very truly,

I have been away from the office for a few days - my sister, Harriet Houghtelin, whom you probably remember, has a daughter who just graduated from Stanford and we went down for the graduation, and found your letter of June 9th with regard to the above matter upon my return. It is my understanding that the Reinke well delivers only 3 second feet, and therefore, I thought that figure should be inserted rather than the amount filed for. If you think it best to change it to comply with the figure in the application, do so.

Thank you for your interest in the matter. I know you will do what you think advisable on the notice. With kind regards,

We note that the notice for completion of works and beneficial use proof on Permit No. G-24653 is for only 3 second feet, whereas, the Permit calls for 3.2 second feet. Was this intentional? Is 3 second feet all that the well will deliver?
