RE: Applications for Transfer of Water Right Nos. 36-2195 & 36-2196

Triple J Ranch
Attn: Richard E. Johnson
210 Crescent
Rupert, ID 83350

Dear Mr. Johnson:

Enclosed are two applications for transfer of water rights 36-2195 and 36-2196. These transfer applications have been filled in with the appropriate information and only require your signature before a notary and \$100.00 filing fee.

You will recall during our visit last summer that the Department licensed two other rights, 36-7306 & 36-7493 that along with the two previously licensed rights, listed above, represent the present water use on your farm. However, the two existing licenses, listed above, did not include the location of the wells currently used to supply water to some of your circular systems.

Application for Transfer of Right 36-2195 adds the point of diversion located in the NW $\frac{1}{4}$ NW $\frac{1}{4}$, Sec. 9, Twp 7S, Rge 24E and shows that a portion of the water diverted from the well is being used on lands within the E $\frac{1}{2}$ NE $\frac{1}{4}$, Sec. 8, Twp 7S, Rge 24E. Also included in this transfer is the amount of water used from the well located in the NE $\frac{1}{4}$ NE $\frac{1}{4}$, Sec. 8 on lands irrigated within the W $\frac{1}{2}$ NE $\frac{1}{4}$, Sec. 8.

Application for Transfer of Right 36-2196 adds the point of diversion located within the NE $\frac{1}{4}$ NE $\frac{1}{4}$, Sec. 8 and shows the amount of water used under this right to irrigate lands within the NE $\frac{1}{4}$ NW $\frac{1}{4}$, Sec. 8, Twp 7S, Rge 24E. The transfer also shows the amount of water used under this right to irrigate lands within Sec. 5 and N $\frac{1}{2}$ NW $\frac{1}{4}$, Sec. 8, Twp 7S, Rge 24E.

Triple J Ranch
September 4, 1984
Page 2

The approval of these transfers will complete the water right records reflecting the water distribution system, the number of acres irrigated, and the amount of water you are using.

You may recall that you have an additional right, No. 36-7579, which was originally filed for irrigation of lands within the NW $\frac{1}{4}$, Sec. 9, Twp 7S, Rge 24E. However, through amending the place of use under right 36-7493 prior to the issuance of the license, we were able to cover this land thereby removing the need to use right 36-7579.

You can save the Department some expense of processing this right by submitting a relinquishment form. I have included this form for your convenience.

If you have any questions on this, please feel free to contact me. My phone number is 334-4162. We would like to complete this action so that our records, as well as yours, can show your actual irrigation system operation.

Sincerely,

JIM JOHNSON
Water Distribution Supervisor

RE: Licensing of Rights 36-7306 & 36-7493

A review of the field exam and of existing water rights on the land covered by the above referenced permits showed that 4 separate wells were used to irrigate about 980 acres of land owned by Triple J Ranch.

The field exam did not separate lands irrigated by each well. Therefore, this was done in the state office review.

On February 8, 1984, the Department sent the permit holder correspondence which summarized the amount of water that could be recognized as beneficially used under the two permits along with applications for amendments to the said permits.

On March 9, 1984, the Department received a letter from the permit holder requesting an appointment to discuss the findings of beneficial use under the said permits. On the same day the Department also received the application for amendments sent to the permit holder which he had signed and had submitted the filing fees.

On April 6, 1984, I met with Richard Johnson, the owner of the Triple J Ranch. He provided a schematic of the lands irrigated by each of the four wells.

From subsequent discussion, he agreed to allow licensing of the said permits which reflected the lands irrigated by each well and agreed to submit application for transfers of water rights 36-2195 & 36-2196 that would more properly describe the location of water used under these rights.

Based upon the information provided, following is a summary of the location, amount of water used from each of the four wells and the amounts appurtenant to each water right.

Dear Mr. Warner:

We have the Reports made by our Field Engineer in your files now in connection with the Permits captioned above. You are entitled to a "Certificate of Completion of Works" and "License and Certificate of Water Right" for each Permit upon receipt of the statutory fees, (based upon \$5.00 for completion of works and \$2.00 for each 40-acre subdivision for License) itemized and enclosed with this letter.

Before Certificate of Completion of Works and a License can be issued on Permit Nos: G-22164, G-22165, G-22169, G-23807, G-23809, G-23815 and G-23816, it is necessary that you sign and return to this department the amendments to the land list (amendments are attached to corresponding itemized sheet and enclosed with this letter) together with the statutory fees in connection with these seven permits.

If you wish to obtain a Certificate of Completion of Works and a License for all the Permits at this time; the fees amount to \$175.00 for Completion of Works and \$691.00 for License, making a total of \$866.00.

Very truly yours,

MARK R. KULP
