RE: Transfer of Water Right Nos. 36-02171/36-04154/36-07527

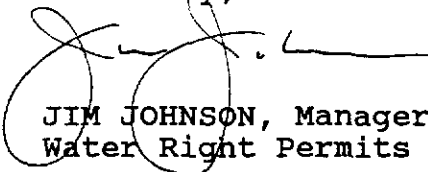

Dear Water Right Holder(s):

Enclosed is a copy of your approved Transfer of Water Right for the above referenced water rights (Transfer No. 4802). Please be sure to thoroughly review the "Conditions/Remarks:" as listed on the transfer.

Also, please note that as of July 1, 1996, water right owners are required to report any change of water right ownership and any change of mailing address to the department. If you have acquired a water right or have changed your mailing address PRIOR to July 1, 1996, you have until July 30, 1998, to notify the department. If you acquire a water right or change your mailing address AFTER July 1, 1996, you must notify the department within 120 days of the change.

Failure to report these changes could result in a \$100 late filing fee. Contact any office of the department to obtain the proper reporting form.

Sincerely,

JIM JOHNSON, Manager

MEMORANDUM

TO: FILE NOS. 36-02171, 36-04154 & 36-07527

FROM: PAM SKAGGS/³⁹STATE OFFICE

SUBJECT: TRANSFER NO. 4802

DATE: August 13, 1996

=====

Transfer No. 4802 is one of two transfers filed to combine the use of water rights from two systems into a single combined system with a permissible place of use. Transfer No. 4802 addresses the groundwater rights and Transfer No. 4803 addresses the surface water rights.

Two pivots are being installed to replace the old system of handlines and the wells will be connected. No new wells are proposed. Diversion volume was adjusted to current standards under each right and combined limits applied to reflect the limits recommended under each right.

Recommended conditions include nonconfirmation of claim, measuring devices/annual reporting, supplemental groundwater, irrigation overlap, combined limits from the two separate systems & all the rights when combined, and standard transfer conditions.

Conditions of Approval:

- R31 - This right when combined with all other rights shall provide no more than .02 cfs per acre nor more than 4.0 afa per acre for the lands above.
- T07 - The change authorized by this transfer shall be accomplished within one (1) year of the date of this approval.
- T08 - Failure to comply with the conditions of this transfer is cause for the director to issue an order to show cause why the approval of the transfer should not be rescinded.
- T09 - Approval of this transfer does not preclude the opportunity for review of the validity of the water right(s) in the ongoing Snake River Basin Adjudication.
- 065 - The right holder shall use the full allotment of appurtenant surface water rights in conjunction with groundwater diverted under this right and shall only divert groundwater under this right when water from the appurtenant surface water rights cannot be delivered to the right holder.

Remarks: Approval of this transfer in no way confirms Right No. 36-04154 as claimed.

The total instantaneous diversion of water from all points of diversion under Transfer No. 4802 shall not exceed 6.12 cfs, nor total combined annual volume of 2114.0 af.

This right shall not be used if the surface water right(s) appurtenant to the place of use is sold, transferred, leased, or used on any other place of use.

The right holder shall install a suitable measuring device at each point of diversion or shall enter into an agreement with the department to determine the amount of water diverted from power records and shall annually report the information to the department.

Right No. 36-04154 when combined with Right Nos. 36-02052 and 36-02313 is limited to the total combined diversion rate of 5.60 cfs, a total combined annual diversion volume of 1120 af, a total combined annual consumptive use volume of 840 af and to the total combined irrigation of 280 acres.

Right Nos. 36-02171, 36-04154 and 36-07527 when combined with 36-02052 and 36-02313 are limited to a total combined diversion rate of 8.60 cfs, a total combined annual diversion volume of 2114 af, a total combined annual consumptive use volume of 1585.5 af, and to the total combined irrigation of 528.5 acres.

Right No. 36-04154 is limited to the irrigation of 280 acres in the place of use described above in a single irrigation season.

FROM: Allen Merritt *AM*

DATE: June 3, 1996

TO: Transfer Files #4802 & #4803 & Amendment of 36-08498

SUBJECT: Review and Recommendation

The above three applications deal with the same proposed PPU of 528.5 acres and should be reviewed together. As taken as a package the purpose is to tie existing water sources together into a common supply system on an existing farm with a slight change in place of use to facilitate a land swap with neighbor.

Transfer 4802 deals with groundwater rights 36-02171, 36-07527 and 36-04154. The first two were recommended in the SRBA in a 250 acre PPU and limited when combined to 3.0 cfs. 36-04154 is recommended on a 280 acre P/U.

Transfer 4803 deals with waste water rights 36-02051 and 36-02313 recommended in a 280 acre PPU being the same acres as those for 36-04154. These three rights when combined are limited to 5.60 cfs or 1"/acre.

Permit 36-08498 is for more water out of the same well on the same 250 acre PPU involved with rights 36-02171 & 36-07527.

Recommendation

I recommend that all applications be approved with the following conditions:

Transfer #4802

- Subject to SRBA Review.
- Rights 36-02171 & 36-07527 when combined limited to 3.0 cfs.
- Right 36-02171 limited to 200 acres in 528.5 acre PPU.
- Right 36-07527 limited to 48.5 acres* in 528.5 acre PPU.
- Right 36-04154 limited to 280 acres in 528.5 acre PPU.

Transfer #4803

- Subject to SRBA Review.
- Right 36-02052 limited to 247 acres in 528.5 acre PPU.
- Right 36-02313 limited to 25 acres in 528.5 acre PPU.

Amendment of 36-08498

- Limit to 248.5 acres* in 528.5 acre PPU.

COMMON TO ALL:

- When all rights combined on PPU shall not exceed 1"/acre nor 4.0 Afa diversion volume.
- Measuring device with totalizing meter on all P/Ds.

*Note that the 1.5 acres were reduced to fit rights into smaller description since original P/U totalled 530 acres.

Amendment of Permit No. 36-08498

Dear Mr. Carlquist:

The Department of Water Resources acknowledges receipt of the Applications as listed above.

This office has scheduled advertising the applications in The North Side News for 4/24 and 5/1/96. The advertisement will be published for two weeks, and a period of ten days following the second publication will be allowed for the submittal of protests.

If an application is protested, you will be sent a copy of the protest. The protest must be resolved before the application is approved or denied. If the protest is not resolved voluntarily, this Department will conduct a conference and/or hearing on the matter.

State Office personnel will conduct a complete review prior to final processing of the applications and will notify you of the outcome of this review.

Please feel free to contact this office if you have any questions regarding this procedure.

Sincerely yours,

Corey Skinner, E.I.T.

MEMORANDUM

TO: Carlquist Brothers Transfer Files

FROM: Corey Skinner *CS*

DATE: April 1, 1996

SUBJECT: Staff Review

Carlquist Brothers have filed the two enclosed transfer applications in order to tie their water rights together into a permissible place of use on their farm. The first transfer application covers their groundwater rights based on claims recommended in the Director's Report (36-02171, 36-04154, and 36-07527). The second transfer application covers their wastewater rights based on claims recommended in the Director's Report (36-02052 and 36-02313). In addition, Carlquist Brothers have a permit 36-08498 (amendment to permit has been filed, permit currently awaiting final field exam) for groundwater that is proposed to be a part of the proposed permissible place of use.

On February 22, Lyn Carlquist and I examined his farm and the permissible place of use proposed with these transfer applications. The farm has been all tied together via a connected mainline system. From my observations in the field and aerial photos and slides at the Jerome ASCS office, the entire farm has been recently irrigated and forfeiture since the filing of the Director's Report of the individual rights is not an issue.

There appears to be no possibility of expansion with these two proposed transfer applications, as long as the appropriate limits are part of the approval conditions. The five recommended claims involved with this transfer are limited to 8.6 cfs for the irrigation of 530 acres. The related water right permit, 36-08498, is for 250 acres that overlap with the 530 acres involved with these two transfer applications. All together, after the proposed transfers and the amended permit, there will be a total of 9.6 cfs appurtenant to 528.5 acres. This would still provide less than an inch to the acre. I have attached a summary that explains the limits of these five claims and the permit as they currently stand, before the two proposed transfers and the amendment to the permit.

Dear Mr. Luke

As per our phone conversation of the other day I am writing to confirm our decision to cease the above mentioned transfer application, pending the approval of the Permit for additional water No. 36-8498. With the dates that you mentioned of approval sometime in February we will not need the transfer processed.

If there are any further problems with the approval or if we can assist in any further way please let me know.

Re: Transfer Application No. 3650/Application for Permit
No. 36-8498

Dear Applicants:

In January of 1990, you filed an application for permit (no. 36-8498) for appropriation of 1.0 cfs of groundwater from an existing well for irrigation of 250 acres in section 18, T10S, R21E (see attached application). The Department did not immediately process this application because of an existing backlog of applications at that time which resulted from the Swan Falls litigation and settlement.

In February of 1990, you filed an application for transfer of water right no.s 36-2313 and 36-2052. The stated intent of the transfer was to spread these existing rights, which you referred to as wastewater, over the whole farm unit until a permit for additional groundwater could be obtained.

For one reason or other, processing of your transfer was delayed. The transfer should have been approved within a few months of filing. Instead, our office has just received the transfer from our regional office. We are currently reviewing the transfer for final approval. I also have learned that we are also in the middle of processing your groundwater application. We still need to advertise the application but I believe we can complete processing and issue approval by the first of February. Actually, processing of the application should have been completed by now. I apologize on behalf of the Department for the delays.

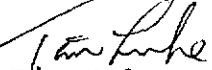

The purpose of this letter is to ask how you wish to proceed with the transfer. Since it has not been approved, and approval of the groundwater application is likely within the next two months, it appears that the transfer will no longer be needed. You may want to consider withdrawing the transfer. If so, please inform me at this office either in writing or by calling me directly at 327-7864.

RECORDED

JAN 16 1992

We ask that you respond to this inquiry at your earliest convenience. The earlier you respond, the earlier I think we will be able to approve the groundwater filing and resolve all pending matters.

Respectfully,

Tim Luke

Dear Madam:

The Report of our Field Engineer on examination for Completion of Works and Beneficial Use on your Permit No. 22833 shows that your well in the SE $\frac{1}{4}$ NW $\frac{1}{4}$ Section 18, Township 10 South, Range 21 East, B. M., will deliver 125 inches of water which has been used to irrigate 200 acres in Lot 1, E $\frac{1}{4}$ NW $\frac{1}{4}$, SW $\frac{1}{4}$ NE $\frac{1}{4}$, NE $\frac{1}{4}$ SW $\frac{1}{4}$ and NW $\frac{1}{4}$ SE $\frac{1}{4}$ of said Section.

A Certificate of Completion of Works and License can therefore be issued for 125 inches or 2.5 second feet upon receipt of the statutory fees. These amount to \$5.00 for Certificate of Completion of Works and \$12.00 License fee, the latter being at the rate of \$2.00 for each 40 acre subdivision in which the land is located.

Dear Madam:

State law requires inspection in connection with any permit being brought to license in the State of Idaho.

I intend to make inspection in connection with your permit on Thursday, October 20.

Please have someone familiar with the works available to accompany me on the inspection. If the power is turned off on the well, it is probable that we will be unable to complete the inspection. I realize it is getting late in the season but hope to make the inspection if possible.

Dear Mr. McDowell:

We have placed on file the depositions of Florence M. Nielson and two witnesses also affidavit of publication in the North Side News all in proof of completion of works and beneficial use on Permit No. G-22833.

Before final action is taken in the matter, the law requires that a field examination be made by an engineer from this department.

We cannot tell just when this examination will be made but our field engineer will try and contact Mrs. Nielson at the time he makes the examination so that arrangements may be made to show him over the grounds.

Permit No. G-22833

Proof of Application of Water to Beneficial Use

Deposition of Holder and Completion of Works

Ques. 1. State your name, residence, occupation and postoffice address.

Ans. My name is Florence M. Nielson; residence at Wendell, Idaho; occupation, housewife; P. O. address, Wendell, Idaho.

Ques. 2. If acting in behalf of corporation, state its name, principal place of business (if a foreign corporation, give name of postoffice of statutory agent), your position with reference to same, and your authority for appearing in its behalf.

Ans. I am acting as an individual for myself.

Ques. 3. State number and date of permit, and date of priority you propose to establish under the permit.

Ans. The number of my permit is #G-22833; date of permit is June 16, 1952. Date of priority is June 10, 1952.

Ques. 4. State source of water supply and give exact location of point of diversion.

Ans. Source of my water supply is a drilled well to raise subterranean water, located in SE quarter of the NW quarter, section 18, township 10S-range 21 E Boise Meridian, Idaho.

Ques. 5. Describe your works of diversion, and state amount of water they are capable of conveying from point of diversion to place of use, and give name of canal or ditch or other works by which water is conducted to such place of use. If a well, state depth of well, depth and size of casing and depth to water. If pump is used, state discharge of pump and tell how it was measured or determined. If sprinkler irrigation, give number and size of nozzles and operating pressure.

My well is drilled to a depth of 594', the lift is 316'. This is equipped with 150' turbin type pump and motor. I have drilled a 20" hole for a depth of 465' and a 16" hole the remaining depth (to the 594'). The pump will discharge and open discharge over 160 miner's inches. My husband is a well driller and this was measured by an orifice plate. Sprinkler irrigation is used. I have 6 laterals with 16 heads each and 2 laterals with 33 heads each. The nozzles are full circle head with a 7 gallon permanent orifice. This operates through a 60 lb. system producing 120 miner's inches.

Ques. 6. State for what purpose water is used and describe place of use. (If for irrigation, name each subdivision in which used, and number of acres in each subdivision that have actually been irrigated with said water.) State whether cultivated or natural meadow land and the nature of all improvements which have been made as a direct result of said use.

Ans. The water is used for irrigation and the description of the place of use is Lot 1, NE quarter NW quarter, SE quarter NW quarter, SW quarter NE Quarter, N half NE quarter SW quarter, N half NW quarter SE quarter, N half NW quarter SE quarter, Section 18, township 10 S, range 21 E. The entire acreage except possibly 2 acres in the extreme NW corner of Lot 1 is irrigable. This land was all float levelled, the brush taken off and a seed bed prepared and a sprinkling system installed for agricultural production. This is cultivated land and not natural meadow land. It will raise intensive diversified row crop and all improvement has been made as a direct result of this irrigation.

22833

Ques. 7. If for other than irrigation purposes; state how applied, amount of horse power generated, etc.

Ans. Used only for irrigation.

Ques. 8. What is the minimum amount of water required for the purpose specified above?

Ans. 160 miner's inches are required to properly irrigate this entire acreage.

Ques. 9. If you are not the person or representative of the corporation to whom above mentioned permit was originally issued, please state how ownership was acquired by present holder.

Ans. This permit was assigned to me from Alpha Hohnhorst and I am the present holder.

Ques. 10. State when, how, in what amount and to what extent the water diverted under above mentioned permit has been used.

Ans. ^{to No. 11} I have produced through open flow a 160 miner's inches of subterranean water and the entire amount of water produced has been diverted as provided in my permit No. G-22833. There have been no other water diverted, used or in any manner applied on the lands contained in this permit.

Ques. 11. State when, how, in what amount and to what extent waters other than those diverted under the above mentioned permit have been diverted and applied to beneficial use upon the lands herein described. Give full particulars regarding such other appropriations and rights claimed thereunder.

Ans. ^{to No. 10} This water was first applied in 1954 over the entire area except for the South two 20 acre subdivisions and the entire area including these two subdivisions was fully irrigated in 1955. All of the water which can be produced by the works and well were discharged and distributed over the land through the sprinkler system.

(Sign) Florence M. Nielson

I hereby certify that the foregoing testimony was read to the above subscribed before its signing, that I believe him to be the person he represents himself to be, and that said testimony was subscribed and sworn to before me, at my office in Boise, County of Ada,

Ques. 2. Are you acquainted with Florence M. Nielson, the holder of Permit No. G-22833? How long have you known her and where does she reside?

Ans. I am acquainted with Florence M. Nielson, the holder of Permit No. G-22833 and have known her all of her life and know that she now resides at Wendell, Idaho.

Ques. 3. Have you read or heard read said Permit No. G-22833, and are you familiar with its provisions and conditions?

Ans. I have read and am familiar with Permit No. G-22833 and I am familiar with all the conditions and provisions.

Ques. 4. State source of water supply, place of diversion, and describe works for conveying water from point of diversion to place of use.

Ans. Subterranean which is raised through a drilled well and diverted in the SE quarter of the NW quarter, Section 18, Township 10 S range 21 E Boise Meridian Idaho. The works consist of a drilled well 594' deep, lift of 316', a 150 horse power turbin type pump and motor (20 and 16" holes) produces 160 miner's inches and is distributed through a sprinkler system.

Ques. 5. How many second feet of water do you estimate said works will safely conduct to place of use, and how much water have you seen being so conveyed?

Ans. I estimate that this will safely conduct 160 miner's inches to the place of use through free flow and 120 miner's inches through pressured sprinkler system and I have seen this much so conveyed.

Ques. 6. (Pumps) How much water in cubic feet per second, miner's inches, or gallons per minute have you seen the pump deliver, and how did you measure or estimate the amount?

Ans. I have seen 160 Miner's inches flow from the well by delivery to the pump installed and I have had a great deal of experience in well drilling and with pumps and motors so that this was estimated by me through an orifice plate.

22833

Ques. 7. State for what purpose water is used and at what place. (If for irrigation, give each subdivision in which water has been used and number of acres irrigated in each subdivision.) State whether cultivated or natural meadow land and the nature of all improvements which have been made as a direct result of said use.

Ans. This water was used for irrigation in Lot 1, in the NE quarter NW quarter, SE quarter NW quarter, SW quarter NE quarter, N half NE quarter SW quarter, N half NW quarter of the SE quarter Section 18, township 10 S 21 E Boise Meridian. All of the entire acreage was irrigated except approximately two acres in the extreme NW corner of Lot 1. All the land is cultivated and irrigated and is natural meadow all improvements have been made as direct result of this irrigation use.

Ques. 8. If for power or other purposes than irrigation, state how water has been applied and to what extent.

Ans. No power is developed.

Ques. 9. (If for irrigation) state character of land that has been reclaimed, and give your estimate of the amount of water required for its profitable cultivation.

Ans. The land reclaimed is highly productive clay loam soil capable of producing intensive row crop and I feel it will take at least 160 minor's inches to profitably irrigate the entire area.

Ques. 10. Have you any interest in the works, water or lands above mentioned? If so, in what way and to what extent?

Ans. I have no interest in the water or the lands above mentioned.

Ques. 11. State when, how, in what amount and to what extent you have witnessed the application to beneficial use of water diverted under said permit.

Ans. I have seen this development since the initial drilling of the well and the first application in 1954. I have had an opportunity to witness this quite regularly at least once a month during the entire period of use.
