Dear Mr. Snider:

Our field engineer's report on the inspection of the completion of construction work and application of water to beneficial use under the terms of Permit No. G-22631, W. B. Russell, Route # 2, Nyssa, shows that his well is capable of conveying 202 minor's inches (4.04 c.f.s.) of water for irrigation of 320 acres. He also reports that after careful checking he found the well to be located in the SE $\frac{1}{4}$ NE $\frac{1}{4}$ of Section 36, Township 8 South, Range 22 East, B.M. instead of in the NE $\frac{1}{4}$ SE $\frac{1}{4}$ as is shown in the permit. Therefore, it is necessary to amend the permit to show the actual location of the well. We have enclosed an application for amendment form for this purpose and ask that you complete and return it.

Upon receipt of the amendment, mentioned above, and the statutory fees, totaling \$21.00, we will issue to Mr. Russell the Certificate of Completion of Works (for which the fee is five dollars) and the License and Certificate of Water Right (sixteen dollars--based at the rate of two dollars for each 40-acre subdivision) confirming the right with priority of February 27, 1952, to his use of 4.04 second feet of subterranean water, with the point of diversion in the SE $\frac{1}{4}$ NE $\frac{1}{4}$ of Section 36, for irrigation of 320 acres in the S $\frac{1}{2}$ of Section 36, Township 8 South, Range 22 East, B. I have just received and read NOTICE OF PROOF OF COMPLETION OF WORKS AND APPLICATION OF WATER TO BENEFICIAL USE, which appeared in the Minidoka County News for four issues, beginning March 8, and ending March 29, this year. This is in connection with the South 1/2 of Section 36, Twp. 8 S., Range 22 E.B.M., in Minidoka County, Idaho.

Paragraph 5 of said NOTICE as published contains description of place where said water is used which concludes with "Rge. 22 S." Should this Range number be 22 E? If so, is the variance important for the purpose of said NOTICE?
