Dear Mr. Henscheid:

We recently mailed to you a Certificate of Completion of Works and a License and Certificate of Water Right issued under Permit No. G-22131.

In checking the record made of the License we find that a mistake was made in recording and since the record is made from the License the same error will no doubt appear on the License. The error was made in naming the county in which the point of diversion is located as Franklin County instead of Minidoka.

If the mistake does appear on the License you may use this letter as authority to change the error to read Minidoka County instead of Franklin or if you prefer and there is this error on the License you may return it to this department and we will make the correction.

License should read:

The point of Diversion is located:
in the NW $\frac{1}{4}$ NE $\frac{1}{4}$, Sec. 29, Tp. 7 S., R. 24 E.B.M. Minidoka County of:

Dear Mr. Henschel:

Inspection is required in connection with any permit for the use of water being brought to license within the State of Idaho.

I intend to make inspection in connection with your Permit on Thursday, September 6, in the forenoon right after I have completed the inspection at the Idaho Realty & Investment, Inc. farm which is located in Section 18, Township 7 South, Range 25 East, B.M.

You will be able to contact me the evening before at the Frontier Motel. If I do not hear from you, I will drive directly to the farm where the well is located. Please be prepared to accompany me on the inspection or have someone there to represent you.

Ans. Subterranean - Snake River drainage. Well located 650' S of North boundary & 932' SE of the NW corner of the NE $\frac{1}{4}$ of Sec. 29, Twp 7 south, Range 24 EBM.

Ques. 5. Describe your works of diversion, and state amount of water they are capable of conveying from point of diversion to place of use, and give name of canal or ditch or other works by which water is conducted to such place of use. If a well, state depth of well, depth and size of casing and depth to water. If pump is used, state discharge of pump and tell how it was measured or determined. If sprinkler irrigation, give number and size of nozzles and operating pressure.

Ans. Contour ditch irrigation system - well & pump. 8 cubic feet per second. Well 307' deep; water level 213'; 10" casing. Pump discharges approximately 8 cu. feet of water per second; measured by Engineers of company installing pump.

Ques. 6. State for what purpose water is used and describe place of use. (If for irrigation, name each subdivision in which used, and number of acres in each subdivision that have actually been irrigated with said water.) State whether cultivated or natural meadow land and the nature of all improvements which have been made as a direct result of said use.

Ans. Irrigation. NE $\frac{1}{4}$ Sec. 29 except about 10 acres in SW corner. (150 A.) NE $\frac{1}{4}$ NW $\frac{1}{4}$, NW $\frac{1}{4}$ NW $\frac{1}{4}$, Sec. 29, - (80 A.); W $\frac{1}{2}$ NW $\frac{1}{4}$ Sec. 28 (80 A). All cultivated. Ditches and headgates and two pipelines are the improvements.

Ques. 7. If for other than irrigation purposes; state how applied, amount of horse power generated, etc.

Ans. ---

Ques. 8. What is the minimum amount of water required for the purpose specified above?

Ans. ~~8 cu. ft.~~

Ques. 9. If you are not the person or representative of the corporation to whom above mentioned permit was originally issued, please state how ownership was acquired by present holder.

Ans. ---

Ques. 10. State when, how, in what amount and to what extent the water diverted under above mentioned permit has been used.

Ans. Water has been used continuously since May 25, 1951 by pumping water from well through contour ditches to irrigate crops grown.

Ques. 11. State when, how, in what amount and to what extent waters other than those diverted under the above mentioned permit have been diverted and applied to beneficial use upon the lands herein described. Give full particulars regarding such other appropriations and rights claimed thereunder.

Ans. -- Additional water from two sump pumps (Permit numbers 24104 & 24105, approved by the State Rec. Engineer May 21, 1953, each capable of pumping 1.6 cubic feet per second) has been used to augment the water supply for lands described above. These pumps are located on the land described above and pick up drainage water from above described and adjacent lands
