Ques. 4. State source of water supply and give exact location of point of diversion.

Ans. Source of water is subterranean water raised through adriilled well. Exact pt. of diversion NE $\frac{1}{4}$ NW $\frac{1}{4}$ , Section 27, T 10 S - R 20 E, B.M.

Ques. 5. Describe your works of diversion, and state amount of water they are capable of conveying from point of diversion to place of use, and give name of canal or ditch or other works by which water is conducted to such place of use. If a well, state depth of well, depth and size of casing and depth to water. If pump is used, state discharge of pump and tell how it was measured or determined. If sprinkler irrigation, give number and size of nozzles and operating pressure.

Ans. My works consist of a drilled well, 440' 20" casing and 20' of 14" casing. The stat. water level here is 333' and it pumps from 358'. This is equipped with a 200 h.p. turbine type pump and motor. The discharge of the pump here is 178 inches. This was determined by a Collins Flowmeter. The water is distributed through a gravity surface system and my main ditches are approx. 18" bottom, 3' deep and 7' top. These are 2 $\frac{1}{2}$  miles in length. In addition to this I have 800 ft. of 14" pipe leading directly from the well south to pt. of outfall where a concrete headbox is installed.

Ques. 7. If for other than irrigation purposes; state how applied, amount of horse power generated, etc.

Ans. Only for irrigation.

Ques. 8. What is the minimum amount of water required for the purpose specified above?

Ans. In my opinion the minimum amount of water required here to irrigate this acreage is now being used. In fact if I should want to make more intensive crops, it would require more water.

Ques. 9. If you are not the person or representative of the corporation to whom above mentioned permit was originally issued, please state how ownership was acquired by present holder.

Ans. I am the original person who applied for this permit.

Ques. 10. State when, how, in what amount and to what extent the water diverted under above mentioned permit has been used.
