RE: Permit No. 21851

Mr. William J. Morgan
1726 Conant St.
Burley, Idaho

Dear Mr. Morgan:

The report of our field engineer on examination for Completion of Works and Beneficial Use on Permit No. 21851 shows that your well in the NW $\frac{1}{4}$ NW $\frac{1}{4}$ Section 16, Township 10 South, Range 20 East, E. M., will deliver 187 inches of water which is being used to irrigate 280 acres in the W $\frac{1}{2}$ of said Section.

A Certificate of Completion of Works and License can, therefore, be issued for that amount upon receipt of the statutory fees which amount to \$5.00 for Certificate of Completion of Works and \$16.00 license fee, the latter being at the rate of \$2.00 for each 40 acre subdivision in which the land is located.

Very truly yours,

MARK R. KULP
State Reclamation Engineer

NOTICE OF PROOF OF COMPLETION OF WORKS and APPLICATION OF WATER TO BENEFICIAL USE

Notice is hereby given that at 1 p.m., on the 2nd day of May, 1953, at Boise, County of Ada, State of Idaho, before Harley M. McDowell proof will be submitted of the completion of works for the diversion of 5.0 cubic feet per second of the waters of subterranean water and of the application to beneficial use of said water, in accordance with the terms and conditions of Permit No. 21851 heretofore issued by the Department of Reclamation of the State of Idaho.

1. The name and postoffice address of the person or corporation holding said permit are William J. Morgan, 1726 Conant, Burley, Idaho.

2. Said works of diversion will be fully completed on the date set for such completion, and the amount of water which said works are capable of conveying to the place of use, in accordance with the plan accompanying the application for such permit, is 5.0 cubic feet per second.

3. The use to which said water has been applied is irrigation purposes, and the amount applied to beneficial use is 5.0 cubic feet per second.

4. The place where said water is used is W $\frac{1}{2}$, Section 16, T 10 S - R 20 E.

5. The date of priority which said user is prepared to establish is Jan. 2, 1951.

- (d) Names and addresses of directors:

II. The financial resources of the applicant are:

- (b) Treasury stock:
- (d) Other resources:

(a) Cash on hand:

(c) Bonds to be issued:

2. Quantity of water claimed: 6.4

cubic feet per second.

3. Source of water supply: Subterranean flow (well)

which is a tributary of

4. Location of point of diversion:

feet distant from the

corner of Section , T. , R. , B. M., and is in the SW $\frac{1}{4}$ NW $\frac{1}{4}$

of Section 16 , T. 10 S. , R. 20 E. , B.M., County of Jerome

5. Water is to be used for Irrigation and domestic purposes.

6. If for mining, milling, power or manufacturing purposes, give:

(a) Point of use of water: feet distant from corner of Section

T. , R. , B.M., in the of Section , T. , R. , B.M.

(b) Amount of power generated: H.P., under feet head.

(c) Water is to be returned to at a point feet

distant from the corner of Section , T. , R. , B.M., in the

of Section , T. , R. , B.M.

7. Estimated cost of works: \$ 15,000.00

8. Kind of works: Well, pump and ditches

9. Height of dam feet; length of dam at top

feet; length of dam at bottom

feet; material used in dam:

10. Size of headgate: Width

feet; height

feet.

11. Ditch: Width at bottom

feet; width at water line

feet; depth of water

feet;

dimensions of flume:

Diameter of pipe

inches; length of conduit

miles.

Average grade per mile

feet.

12. The time required for the completion of such work is Five (5) years.

13. The time required for the complete application of the water to the proposed use is Six (6)

additional years.

14. The land to be irrigated is described in the following tabulation: See remarks.

15. Existing water rights and/or valid permits appurtenant to the lands to be irrigated are: None

16. (a) Is reservoir to be used? If so, fill in (b) and (c) below:
 (b) Name of Reservoir and number of Storage Permit:
 (c) Date of filing of Application for Storage Permit and Name of Applicant:

BE IT KNOWN THAT The undersigned hereby makes application for permit to appropriate the public water of the State of Idaho as herein set forth.

APPLICATION FOR AMENDMENT TO PERMIT TO APPROPRIATE THE PUBLIC WATERS OF THE STATE OF IDAHO, NO. 21851																			
Comes now William J. Morgan and represents to the State Reclamation Engineer of the State of Idaho: That he is the owner and holder of Permit to appropriate the Public Waters of the State of Idaho, No. 21851. That the point of diversion is described in said Permit as being located in the SW $\frac{1}{4}$ NW $\frac{1}{4}$, Sec. 16, T 10 S. R. 20 E., conveyed to the place of use through the private ditch, as per map filed herewith. That he now requests that the point of diversion be changed to a point located in the NW $\frac{1}{4}$ NW $\frac{1}{4}$, Sec. 16, T 10 S. R. 20 E., and conducted to the place of use through the private ditch, as per map above referred to. That his reasons for desiring to make such change are as follows: The well site in the present location have been more practically situated than that as originally specified on the permit. That no one will be injured by such change, and that such change will be made at Permit Holder's own risk. Signed at Boise this 2 day of May 1953.																			
Wm. J. Morgan																			
Date of receipt at Department of Reclamation May 11, 1953.																			
APPROVAL OF STATE RECLAMATION ENGINEER																			
I, MARK R. KULP, State Reclamation Engineer of the State of Idaho, hereby approve the above and foregoing for amendment to Permit to appropriate the Public Waters of the State of Idaho, No. 21851. This approval constitutes and is issued as an amendment to the original permit to which it refers, and of which it becomes a part, and said approved only insofar as the rights of others will not be adversely affected thereby.																			
Mark R. Kulp State Reclamation Engineer																			
Copy made 5-2-53 - but withdrawn 8-14-53 (See file)																			

Permit No. 21851
CERTIFICATE OF COMPLETION OF WORKS

TO ALL WHOM IT MAY CONCERN:

This is to certify that WM. J. MORGAN of Burley, County of Cassia, and State of Idaho, the holder of Permit No. 21851, issued upon Application No. 29573 bearing date of priority of January 2, 1951, authorizing the diversion of 6.4 second feet of the waters of a well (subterranean flow) County of Jerome, State of Idaho, for irrigation and domestic purposes, has fully complied with the provisions of the laws of the State of Idaho relating to the proof of completion of works of diversion set out and described in said Permit; that said works are adequate for diverting and conveying to the place of intended use 3.74 second feet of the waters of said well; that the point of diversion of said waters is in the NW $\frac{1}{4}$ NW $\frac{1}{4}$ Section 16, Township 10 South, Range 20 East, B. M. and that the lands proposed to be irrigated by the use of said water are described as follows, to-wit: West Half Section 16, Township 10 South, Range 20 East, B.M.

Witness my hand this 14th day of September, A. D. 1954.

RE: Permit No. 21851

Mr. William J. Morgan
1726 Conant St.
Burley, Idaho

Dear Mr. Morgan:

The report of our field engineer on examination for Completion of Works and Beneficial Use on Permit No. 21851 shows that your well in the NW $\frac{1}{4}$ Section 16, Township 10 South, Range 20 East, T. M., will deliver 187 inches of water which is being used to irrigate 280 acres in the NW $\frac{1}{4}$ of said Section.

A Certificate of Completion of Works and License can, therefore, be issued for that amount upon receipt of the statutory fees which amount to \$5.00 for Certificate of Completion of Works and \$16.00 license fee, the latter being at the rate of \$2.00 for each 40 acre subdivision in which the land is located.

Very truly yours,

RECEIVED
AUG 19 1953
Department of Reclamation

Mr. Mark R. Kulp
State Reclamation Engineer
State House
Boise, Idaho

Dear Mr. Kulp:

Re: Subterranean Permit #21851

I refer to the above designated subterranean water permit upon which Proof of Works and Beneficial Use was made on May 2, 1953.

Please consider this as my request for permission to withdraw this proof for the following reasons:

The device used in measuring my water prior to the making of this proof and my calculations appear to have been erroneous.

Since the time of completing these works, I have had some faulting and cave-in in the lower structures of the well.

It would appear that my pump and the water production strata are not operating to the maximum or past capacity.

At this time an inspection of my works and the water produced would not represent the true and accurate amount which these works are capable of producing and the amount which I need to properly irrigate the lands upon which beneficial use is made.

As I have yet several years before the statutory limit is reached in time for making said proof, I would appreciate it very much if you could withdraw the proof as submitted and I will at a later date, when the works are operating efficiently, submit this data and readvertise so as to make this proof at a later date.

Your consideration on this matter will be appreciated.

Very truly yours,

William J. Morgan

RE: Permit No. 21851

Mr. Harley M. McDowell
Idaho Building
Boise, Idaho

Dear Mr. McDowell:

We return Mr. William J. Morgan's application for amendment to the point of diversion in Permit No. 21851, which has been approved by the State Reclamation Engineer and recorded in this Department.

We have placed on file the deposition of Mr. Morgan and two witnesses, together with affidavit of publication in the Jerome North Side News, all in proof of completion of works and beneficial use on Permit No. 21851.

Before final action is taken the law requires that a field examination be made by an engineer from this Department.

We cannot say just when this examination will be made, but our field engineer will contact Mr. Morgan at the time he makes the examination in order that he may arrange to show him over the ground.

Very truly yours,

MARK R. KULP

APPLICATION OF WATER TO BENEFICIAL USE

Notice is hereby given that at 1 p.m., on the 2nd day of May, 1953, at Boise, County of Ada, State of Idaho, before Harley M. McDowell proof will be submitted of the completion of works for the diversion of 5.0 cubic feet per second of the waters of subterranean water and of the application to beneficial use of said water, in accordance with the terms and conditions of Permit No. 21851 heretofore issued by the Department of Reclamation of the State of Idaho.

1. The name and postoffice address of the person or corporation holding said permit are William J. Morgan, 1726 Conant, Burley, Idaho.

2. Said works of diversion will be fully completed on the date set for such completion, and the amount of water which said works are capable of conveying to the place of use, in accordance with the plan accompanying the application for such permit, is 5.0 cubic feet per second.

3. The use to which said water has been applied is irrigation purposes, and the amount applied to beneficial use is 5.0 cubic feet per second.

4. The place where said water is used is W $\frac{1}{2}$, Section 16, T 10 S - R 20 E.

5. The date of priority which said user is prepared to establish is Jan. 2, 1951.

Department of Reclamation

Permit No. 21851

Proof of Application of Water to Beneficial Use
and Completion of Work

Deposition of Holder

Ques. 1. State your name, residence, occupation and postoffice address.

Ans. My name is Wm. J. Morgan; residence, 1726 Conant St., Burley, Idaho; occupation,
agriculture and warehousing beans, peas and processing; postoffice address, 1726 Conant St.
Burley, Idaho

Ques. 2. If acting in behalf of corporation, state its name, principal place of business (if a foreign corporation, give name of postoffice of statutory agent), your position with reference to same, and your authority for appearing in its behalf.

Ans. None.

Ques. 3 State number and date of permit, and date of priority you propose to establish under the permit.

Ans. Number, 21851; date of permit, Jan. 5, 1951 and date of priority, Jan. 2, 1951.

Ques. 4. State source of water supply and give exact location of point of diversion.

Ans. Source of supply is subterranean, pumped through a drilled well located in the NW 1/4, Sec. 16, T 10 S - R 20 E, B.M.

Ques. 5. Describe your works of diversion, and state amount of water they are capable of conveying from point of diversion to place of use, and give name of canal or ditch or other works by which water is conducted to such place of use. If a well, state depth of well, depth and size of casing and depth to water. If pump is used, state discharge of pump and tell how it was measured or determined.

Ans. Works consist of drilled well, 10" casing to a depth of approx. 410' with an actual water lift of 340-345'. I have equipped this with a turbine type pump and motor 200 h.p. which is capable of conveying to the point of diversion and to the place of use 225 Miner' inches. This is conveyed through my own private ditch. I had the discharge measured by the Layne & Bowler Pump Company through a tube and gauge which showed the actual flow as discharged by the pump.

Ques. 6. State for what purpose water is used and describe place of use. (If for irrigation, name each subdivision in which used, and number of acres in each subdivision that have actually been irrigated with said water.) State whether cultivated or natural meadow land and the nature of all improvements which have been made as a direct result of said use.

Ans. This water is used for irrigation and is used to cover 295 acres in the NW 1/4, Sec. 16, T 10 S - R 20 E, B.M. Idaho. All of the entire 320 is irrigable. Some 20 acres in the northern part of the NW 1/4 and some 5 acres in the eastern part toward the center of the E 1/2 SW 1/4, Sec. 16. This is all cultivated land for irrigated agricultural production and no natural meadow exists on the land. I have constructed about 2 1/2 miles of main ditch which has a bottom of 2', 4' top and approx. 2' deep. I have cleared, levelled and prepared all the land for agriculture and raised one crop during the 1952 season. This land was irrigated from water produced by this well for agriculture.

21851

Ques. 7. If for other than irrigation purposes; state how applied, amount of horse power generated, etc.

Ans. No other use was made of the water than irrigation.

Ques. 8. What is the minimum amount of water required for the purpose specified above?

Ans. The minimum amount of water required for the specified purpose would be that as produced by the pump at this time.

Ques. 9. If you are not the person or representative of the corporation to whom above mentioned permit was originally issued, please state how ownership was acquired by present holder.

Ans. I am the individual to whom this permit was originally issued.

Ques. 10. State when, how, in what amount and to what extent the water diverted under above mentioned permit has been used.

Ans. The spring of 1952 was the first time that this water was used and the first time that agricultural production was made on the land. No diversion from this well or pump had been made prior to this time. I used this continuously from May 19, 1952 to September 21, 1952. I have started the 30th of April for the 1953 irrigation season.

Ques. 11. State when, how, in what amount and to what extent waters other than those diverted under the above mentioned permit have been diverted and applied to beneficial use upon the lands herein described. Give full particulars regarding such other appropriations and rights claimed thereunder.

Ans. There has been no application of water other than that mentioned in this permit.

(Sign) Sam J. Morgan

I hereby certify that the foregoing testimony was read to the above subscribed before its signing, that I believe him to be the person he represents himself to be, and that said testimony was subscribed and sworn to before me, at my office in Boise

STATE OF IDAHO
DEPARTMENT OF RECLAMATION
BOISE, IDAHO

Permit No. 21851

Proof of Application of Water to Beneficial Use
and Completion of Works
Deposition of Witness

The deposition of two witnesses, on this form, taken separately, required in each case.

Ques. 1. State your name, age, residence, occupation and postoffice address.

Ans. My name is Glen Trail; age 46; residence, Twin Falls, Idaho; occupation, farming; postoffice address; Box 63, Twin Falls, Idaho.

Ques. 2. Are you acquainted with William J. Morgan, the holder of Permit No. 21851? How long have you known him and where does he reside?

Ans. I have known him 15 years and that he resides at Burley, Idaho

Ques. 3. Have you read or heard read said Permit No. 21851, and are you familiar with its provisions and conditions?

Ans. Yes, I am.

Ques. 4. State source of water supply, place of diversion, and describe works for conveying water from point of diversion to place of use.

Ans. Source of water supply, subterranean water; place of diversion, NW $\frac{1}{4}$ NW $\frac{1}{4}$, Sec. 16; works consist of drilled well with 10" casing, equipped with 200 h.p. turbine type pump and motor. Works for conveying water from point of diversion to place of use is about 2 $\frac{1}{2}$ miles of ditch with 2' bottom, 2' depth, 4' top.

Ques. 5. How many second feet of water do you estimate said works will safely conduct to place of use, and how much water have you seen being so conveyed?

Ans. I have seen about 225 Miner's inches safely conducted to the place of use and believe that this can be safely conducted.

Ques. 6. (Pumps) How much water in cubic feet per second, miner's inches, or gallons per minute have you seen the pump deliver, and how did you measure or estimate the amount?

Ans. I have seen 225 Miner's inches delivered and this was measured with a monometer.

21857

Ques. 7. State for what purpose water is used and at what place. (If for irrigation, give each subdivision in which water has been used and number of acres irrigated in each subdivision.) State whether cultivated or natural meadow land and the nature of all improvements which have been made as a direct result of said use.

Ans. Water is used for irrigation of entire $W\frac{1}{2}$ Sec 16 with the exception of about 20 acres in northern part of $N\frac{1}{2}N\frac{1}{4}$ and 5 acres in eastern part of $E\frac{1}{2}SW\frac{1}{4}$. Land is cultivated, no natural meadow. Improvements consist of clearing, levelling, preparation for crop and crop raised in 1952.

Ques. 8. If for power or other purposes than irrigation, state how water has been applied and to what extent.

Ans. For irrigation only.

Ques. 9. (If for irrigation) state character of land that has been reclaimed, and give your estimate of the amount of water required for its profitable cultivation.

Ans. Character of land is highly productive and I estimate amount of water required for profitable cultivation to be that now being used or 225 Miner's inches.

Ques. 10. Have you any interest in the works, water or lands above mentioned? If so, in what way and to what extent?

Ans. None whatever.

Ques. 11. State when, how, in what amount and to what extent you have witnessed the application to beneficial use of water diverted under said permit.

Ans. As I have land near this, I have witnessed all application to beneficial use of the water in the 1952 season.

(Signed)

Glen Trail

I hereby certify that the foregoing testimony was read to the above subscriber before its signing, that I believe him to be the person he represents himself to be, and that said testimony was subscribed and sworn to before me in Boise, County of Ada, State of Idaho, on this 2 day of May, A. D. 1953.

Harley M. McDowell

Notary Public.

My commission expires 10/11/55

21851

STATE OF IDAHO
DEPARTMENT OF RECLAMATION
BOISE, IDAHO

Permit No. 21851

Proof of Application of Water to Beneficial Use
Deposition of Witness **and Completion of Works**

The deposition of two witnesses, on this form, taken separately, required in each case.

Ques. 1. State your name, age, residence, occupation and postoffice address.

Ans. My name is J. L. Scott; age, 55; residence, Twin Falls, Idaho; occupation, farming;
postoffice address, 277 Jefferson St., Twin Falls, Idaho

Ques. 2. Are you acquainted with William J. Morgan, the
holder of Permit No. 21851? How long have you known him and where does
he reside?

Ans. I have known him 3 years and know that he resides at Burley, Idaho.

Ques. 3. Have you read or heard read said Permit No. 21851, and are you
familiar with its provisions and conditions?

Ans. Yes.

Ques. 4. State source of water supply, place of diversion, and describe works for con-
veying water from point of diversion to place of use.

Ans. The source of water is a drilled well to pump subterranean water, the actual point
of diversion is the NW $\frac{1}{4}$ NW $\frac{1}{4}$, Sec. 16 (I understand this has been amended from the SW $\frac{1}{4}$ NW $\frac{1}{4}$,
Sec. 16). The works consist of drilled well which has a 10" casing and is equipped with
a 200 h.p. turbine type pump and motor. The works for conveying this from the point of
diversion to place of use is approximately 2 $\frac{1}{2}$ miles of ditch, being 2' bottom, 2' deep
and 4' top.

Ques. 5. How many second feet of water do you estimate said works will safely con-
duct to place of use, and how much water have you seen being so conveyed?

Ans. I would estimate that 225 Miner's inches could be safely conducted to the place
of use and I have seen the water being so conveyed.

Ques. 6. (Pumps) How much water in cubic feet per second, miner's inches, or gallons
per minute have you seen the pump deliver, and how did you measure or estimate the
amount?

Ans. I have seen this pump deliver an amount which was gauged at approx. 225 Miner's
inches and this was measured by a monometer.

21851

Ques. 7. State for what purpose water is used and at what place. (If for irrigation, give each subdivision in which water has been used and number of acres irrigated in each subdivision.) State whether cultivated or natural meadow land and the nature of all improvements which have been made as a direct result of said use.

Ans. The water was used for irrigation and the entire 320 acres in the $\frac{1}{2}$ Sec. 16 is irrigated except some 20 acres in the northern part of the $\frac{1}{2}$ NW $\frac{1}{4}$ and another 5 acres in the eastern part of the $\frac{1}{2}$ SW $\frac{1}{4}$. This land is all cultivated and there is no natural meadow. The land has been cleared, levelled, prepared for irrigation and one crop raised in 1952.

Ques. 8. If for power or other purposes than irrigation, state how water has been applied and to what extent.

Ans. This is used strictly for irrigation, no power or other use.

Ques. 9. (If for irrigation) state character of land that has been reclaimed, and give your estimate of the amount of water required for its profitable cultivation.

Ans. The character of the land is highly productive agricultural land that has been reclaimed and I would estimate that it requires a minimum of the amount of water now being used for profitable cultivation.

Ques. 10. Have you any interest in the works, water or lands above mentioned? If so, in what way and to what extent?

Ans. I have no interest in the works, water or lands above mentioned.

Ques. 11. State when, how, in what amount and to what extent you have witnessed the application to beneficial use of water diverted under said permit.

Ans. I have land in this same vicinity and have witnessed the application to beneficial use of water diverted under this permit during the entire irrigation season of 1952.

RE: Permits Nos. 21576 and 21851

Mr. Harley M. McDowell
Idaho Building
Boise, Idaho

Dear Mr. McDowell:

We have sent to the North Side News, notice of completion of works and beneficial use proof to be made before you as Notary Public, on May 2, 1953, on Permit No. 21576 in the name of Jay L. Scott, and on Permit No. 21851 in the name of William J. Morgan, with instructions to publish the notices once a week for four weeks prior to that date and to send the affidavits of publication and statements of costs to the applicants.

We enclose the necessary forms of deposition to be used in making these proofs.

Very truly yours,

MARK R. KULP
State Reclamation Engineer
