

State of Idaho

License and Certificate of Water Right

Water License No. 20812

Amount Five (5) second feet

Water District No.

Priority December 10, 1948

THIS IS TO CERTIFY that IDAHO POWER COMPANY
of Boise, Idaho, made application for a permit to appropriate the
public waters of the State of Idaho, dated December 10, 1948; that Permit No. 20812
was issued under said application; that Certificate of Completion of works, with a carrying capacity of
5 second feet, was issued thereunder on October 22, 1949, showing that said works
were completed on the 6th day of October, 1949; and that on the 19th
day of December, 1949,

IDAHO POWER COMPANY
of Boise, State of Idaho, made proof to the satisfaction of the
State Reclamation Engineer of Idaho, of the right to use the waters of Billingsley
Creek, a tributary of Snake River, for the purpose of cooling transformers, bearings,
etc., fire protection, lawn and garden irrigation at power plant operators' village
, under Use Permit No. 20812 of the Department of Reclamation
and that said right to the use of said waters has been perfected in accordance with the laws of Idaho,
and is hereby confirmed by the State Reclamation Engineer of Idaho and entered of record in Volume
8 of Licenses at page 4735, on the 12th day of April, 1951;
The right hereby confirmed dates from December 10, 1948;

The Point of Diversion is located
in the SW 1/4 NE 1/4, Sec. 11, Tp. 7 S., R. 13 E., B.M. Gooding County.

That the amount of water to which such right is entitled and hereby confirmed, for the purposes
aforesaid, is limited to an amount actually needed and beneficially used for said purposes, and shall
not exceed Five (5) cubic feet per second.

Description and location of use:

Twp.	Range	Sec.	Forty-acre Tract	No. Acres Described in Permit	No. Acres Actually Irrigated
			Lot 7 Section 2; Lot 2, Section 11; Township 7 South, Range 13 East, B.M.		

The right to the use of the water aforesaid hereby confirmed is restricted to the lands or place
of use herein described, as provided by the laws of Idaho.

WITNESS the seal and signature of the State Reclamation Engineer, affixed at Boise, Idaho, this
12th day of April, 1951.

AFFIDAVIT OF PUBLICATION

**Notice for Publication
NOTICE OF PROOF
APPLICATION OF WATER TO
BENEFICIAL USE**

Notice is hereby given that at 10:00 A.M. on the 19th day of December, 1949, at Boise, County of Ada, State of Idaho, before G. H. Petersen, Notary Public, proof will be submitted of the application to beneficial use of 5.0 cubic feet per second of the waters of Billingsley Creek, a tributary of Snake River, in accordance with the terms and conditions of Permit No. 20812 heretofore issued by the State Reclamation Engineer of the State of Idaho.

The name and postoffice address of the person or corporation holding said permit are Idaho Power Company, 1220 Idaho St., Boise, Idaho.

The use to which said water has been applied is cooling of transformers, bearings, etc., fire protection, lawn and garden watering at power plant operators' village.

The amount applied to beneficial use is 5.0 cfs.

The place where said water is used is Lot 7, Section 2 and Lot 2, Section 11, Township 7 South, Range 13 East, BM.

The name of the canal or ditch or other works by which said water is conducted to such place of use is No name—ditch and pipe line.

The right to take water from such works is based upon Permit No. 20812.

The source of supply from which such water is diverted is Billingsley Creek, a tributary of Snake River.

The date of priority which said user is prepared to establish is December 10, 1948.

MARK R. KULP,
State Reclamation Engineer 1-4

APPLICATION FOR PERMIT

To Appropriate the Public Waters of the State of Idaho

36-2082

APPLICATION No. 28461
 PERMIT No. 20812
 DISTRICT No.

Idaho Power Company
 Att. A. C. Inman
 1220 Idaho St., Boise, Idaho

1. Name of Applicant: IDAHO POWER COMPANY

Postoffice address: 1220 Idaho Street, Boise County: Ada State: Idaho

I. If applicant is a corporation, give:

(a) Date and place of incorporation: Maine- May 6, 1915

(b) Amount of capital stock: \$38,000,000.00

(c) Amount paid in: \$30,463,826.00

(d) Names and addresses of directors: C C Anderson, Boise, Idaho; J G Conley, Caldwell, Idaho; R E Gale, Boise, Idaho; B Glavin, Twin Falls, Idaho; A C Inman, Boise, Idaho; W J Lloyd, Nampa, Idaho; A L Merrill, Pocatello, Idaho; C E Palmer, Ontario, Oregon; T E Roach, Boise, Idaho; J H Rogers, Boise, Idaho; B C Russell, Boise, Idaho; J R Simplot, Boise, Idaho; Nathan Sommer, Boise, Idaho; & E T Waters, Weiser, Idaho

II. The financial resources of the applicant are: See balance sheet
 (a) Cash on hand:
 (b) Treasury stock: attached hereto
 (c) Bonds to be issued:
 (d) Other resources: Other, 4.9

2. Quantity of water claimed: Five (5) Irrigation-0.1- cubic feet per second.

3. Source of water supply: Billingsley Creek which is a tributary of Snake River

4. Location of point of diversion: S 18°18' E 1641.32 feet distant from the quarter corner of Section 2 & 11 T. 7 S. , R. 13 E. , B.M., and is in the SW 1/4 NE 1/4 of Section 11 , T. 7 S. , R. 13 E. , B.M., County of Gooding

5. Water is to be used for at power plant operators' village, Cooling of transformers, bearings, etc., fire protection, lawn and garden watering

6. If for mining, milling, power or manufacturing purposes, give:

(a) Point of use of water: Easterly Approx. 1300 feet distant from Southwest corner of Section 2 T. 7 S. , R. 13 E. , B.M., in the Lot 7 of Section 2 , T. 7 S. , R. 13 E. , B.M. Also Lot 2 of Section 11

(b) Amount of power generated: None H.P., under feet head.

(c) Water is to be returned to Snake River at a point approx. 1300 feet Easterly distant from the S W corner of Section 2 , T. 7 S. , R. 13 E. , B.M., in the Lot 7 of Section 2 , T. 7 S. , R. 13 E. , B.M.

7. Estimated cost of works: \$ 7,500.00

8. Kind of works: Concrete headgate; 1250 ft. ditch; wooden tank or pressure box with concrete bottom; 1350 ft. 10" pipe; underground distribution pipe system.

9. Height of dam None feet; length of dam at top feet; length of dam at bottom feet; material used in dam:

10. Size of headgate: Width 2' 3" feet; height 2' 0" feet.

11. Ditch: Width at bottom 2' 6" feet; width at water line 4' 6" feet; depth of water 1' 0" feet;

dimensions of flume Pressure box 16' X 12' X 5' 6" high

Diameter of pipes 10 and 4 inches; length of conduit 2600 feet miles.

Average grade per mile 50 feet.

12. The time required for the completion of such work is One (1) years.

13. The time required for the complete application of the water to the proposed use is One (1) additional years.

14. The land to be irrigated is described in the following tabulation: See remarks.

15. Existing water rights and/or valid permits appurtenant to the lands to be irrigated are: See "Remarks"

STATE OF IDAHO
DEPARTMENT OF RECLAMATION
BOISE, IDAHO
REPORT OF ENGINEER

Permit No. 20812

This proof is for Beneficial use In Water District No. _____1. Name of applicant Idaho Power Company, Boise, Idaho2. Source of water supply: Billingsley Creek, a tributary of Snake River3. Location of point of diversion: Is in the SW $\frac{1}{4}$ NE $\frac{1}{4}$ of Section 11T. 7 S. R. 13 E. County of Gooding

4. Describe works as they exist, giving dimensions and capacities of same: Water is taken from Billingsley Creek through a concrete head gate with 6" ^(Thick) side walls, 39" wide by 3' high by 8' long. There is a spillway from the head box to the South, with an opening 24" wide by 3' high. The ditch from this head gate to the plant is approximately 3' wide on the bottom by 18" deep, concrete lined and has considerable fall. Water is carried in this ditch to the large pressure box at the top of the first bench, thence in 10" pipe to power house. Pressure box is approximately 12' by 16' by 8' deep. (continued below)
5. Water is used for: cooling of transformers, bearings, etc., fire protection, lawn and garden irrigation at power plant operators' village.
6. State whether or not water has been turned into works of diversion: _____

7. List legal subdivisions of lands to be irrigated. If proof is for beneficial use, give exact number of acres under cultivation in each forty-acre tract. (Describe manner and place of use if other than irrigation):

Lot 7 Section 2, and Lot 2 Section 11, Twp. 7 South, Range 13 East, B. M.

(Submit map on attached plat, showing location and details of above description.)

8. What large stream would the water here appropriated finally reach? Sneke River.

Remarks: It has a self-cleaning weed screen on the top, made of strap iron bars $\frac{1}{2}$ " by 2" by 16", with $\frac{1}{2}$ " spacing. There is a sluice way and relief gates immediately in front of the pressure box in a concrete heading which is approximately 9' by 12' by 4' deep, made of 8" concrete. One relief gate is 30" wide and the other one 36" wide. There is a short 4' by 1' deep metal flume between this and the pressure box. This system is used for summer time cooling and emergency cooling of four 15,000 Kw. each generators and to irrigate the lawns, parking and gardens, with an area of approximately 600' by 900' square around the plant.

This examination was made on the 2nd day of April, 19 51.(Signed) E. H. Humphrey Examiner.

20812

Water comes into power
house in a 10" pipe @ 60th
pressure.

1500' of 10' pipe.

INSTRUCTIONS TO EXAMINERS

1. Always carefully note the location of the point of diversion and accurately plat same.
2. When proof is for beneficial use, carefully check up the number of acres actually irrigated in each forty and accurately plat same.
3. Make a map showing the correct location of streams and ditches, and the irrigated lands, and any adjacent permanent landmarks, such as towns, lakes, large streams and public roads.
4. If any unusual conditions are discovered, make plain statement of them under remarks.
5. Always see the holder, if possible, and go over the whole ground with him and make your report only upon actual existing facts and conditions.
6. Give general characteristics of soils, topography, and crops raised.

ATT: Mr. G. H. Petersen
Special Agent

Dear Mr. Petersen:

We acknowledge receipt of your letter of January 16, enclosing Affidavit of Publication from the Gooding Leader, in connection with Proof of Beneficial Use under Permit No. 20812.

Before final action is taken in the matter, the law requires that a field examination be made by an Engineer from this Department.

We are unable to say just when this examination will be made as this Department has but one Field Engineer who makes examinations all over the State.

However, the Field Engineer for this Department will try and contact someone on the grounds at the time he makes the examination in order that they may show him over the project.

Very truly yours,

MARK R. KULP

AFFIDAVIT OF PUBLICATION

**Notice for Publication
NOTICE OF PROOF
APPLICATION OF WATER TO
BENEFICIAL USE**

Notice is hereby given that at 10:00 A.M. on the 19th day of December, 1949, at Boise, County of Ada, State of Idaho, before G. H. Petersen, Notary Public, proof will be submitted of the application to beneficial use of 5.0 cubic feet per second of the waters of Billingsley Creek, a tributary of Snake River, in accordance with the terms and conditions of Permit No. 20812 heretofore issued by the State Reclamation Engineer of the State of Idaho.

The name and postoffice address of the person or corporation holding said permit are Idaho Power Company, 1220 Idaho St., Boise, Idaho.

The use to which said water has been applied is cooling of transformers, bearings, etc., fire protection, lawn and garden watering at power plant operators' village.

The amount applied to beneficial use is 5.0 cfs.

The place where said water is used is Lot 7, Section 2 and Lot 2, Section 11, Township 7 South, Range 13 East, BM.

The name of the canal or ditch or other works by which said water is conducted to such place of use is No name—ditch and pipe line.

The right to take water from such works is based upon Permit No. 20812.

The source of supply from which such water is diverted is Billingsley Creek, a tributary of Snake River.

The date of priority which said user is prepared to establish is December 10, 1948.

MARK R. KULP.

STATE OF IDAHO
DEPARTMENT OF RECLAMATION
BOISE, IDAHO

Permit No. 20812

Proof of Application of Water to Beneficial Use

Deposition of Holder

Ques. 1. State your name, residence, occupation and postoffice address.

Ans. B C Russell, General Superintendent, Idaho Power Company,
1220 Idaho Street, Boise, Idaho.

Ques. 2. If acting in behalf of corporation, state its name, principal place of business (if a foreign corporation, give name of postoffice of statutory agent), your position with reference to same, and your authority for appearing in its behalf.

Ans. Idaho Power Company, 1220 Idaho Street, Boise, Idaho. Affiant is General
Superintendent and a Director of the Company.

Ques. 3. State number and date of permit, and date of priority you propose to establish under the permit.

Ans. Permit No. 20812; dated December 18, 1948; December 10, 1948

Ques. 4. State source of water supply and give exact location of point of diversion. -Billingsley Creek, a tributary of the Snake River. S 18° 18' 50" East 1641.32 feet from the quarter
Ans. corner common to Sections 2 and 11, T 7 S, R 13 E, BM, and is in the SW $\frac{1}{4}$ NE $\frac{1}{4}$ of
Section 11, said township and range, Gooding County.

Ques. 5. Describe your works of diversion, and state amount of water they are capable of conveying from point of diversion to place of use, and give name of canal or ditch or other works by which water is conducted to such place of use.

Ans. A 2'3" wide by 2' high concrete headgate; 1,250' of ditch 2'6" wide on the
bottom, 4'6" wide at water line and depth of water 1' with pressure box 16' x 12'
x 5'6" high with 2,600' of distribution pipe therefrom 10" and 4" in diameter.

Ques. 6. State for what purpose water is used and describe place of use. (If for irrigation, name each subdivision in which used, and number of acres in each subdivision that have actually been irrigated with said water.) State whether cultivated or natural meadow land and the nature of all improvements which have been made as a direct result of said use.

Ans. Various locations in Lot 7, Section 2, and Lot 2, Section 11, T 7 S, R 13 E,
BM. For cooling of transformers, bearings, etc; fire protection, lawn and garden
water at the power plant operator's village.

Ques. 7. If for other than irrigation purposes; state how applied, amount of horse power generated, etc.

Ans. See answer to Ques. 6 - No power generation.

20812

Ques. 8. What is the minimum amount of water required for the purpose specified above?

Ans. 5.0 cfs

Ques. 9. If you are not the person or representative of the corporation to whom above mentioned permit was originally issued, please state how ownership was acquired by present holder.

Ans. N/A

Ques. 10. State when, how, in what amount and to what extent the water diverted under above mentioned permit has been used.

Ans. On November 1, 1949, approximately 4.9 cfs were being used for power plant purposes such as cooling transformers, bearings, etc; and 0.1 cfs for domestic purposes in operator's village.

Ques. 11. State when, how, in what amount and to what extent waters other than those diverted under the above mentioned permit have been diverted and applied to beneficial use upon the lands herein described. Give full particulars regarding such other appropriations and rights claimed thereunder.

Ans. Water from Billingsley Creek from the point of diversion, stated herein, has been used at Lower Salmon Power Plant and village installation for many years. This permit is for the purpose of providing record license right for use at the enlarged power plant and village and incorporates the quantity of water for which old present right exists.

(Sign)

B. C. Russell

I hereby certify that the foregoing testimony was read to the above subscribed before its signing, that I believe him to be the person he represents himself to be, and that said testimony was

subscribed and sworn to before me, at my office in Boise, County of Ada,

State of Idaho, on this 19th day of December, A. D. 1949.

J. H. Petersen

My commission expires July 20, 1953.

STATE OF IDAHO
DEPARTMENT OF RECLAMATION
BOISE, IDAHO

PERMIT NO. 20812

Proof of Application of Water to Beneficial Use

Deposition of Witness

The deposition of two witnesses, on this form, taken separately, required in each case.

Ques. 1. State your name, age, residence, occupation and postoffice address.

Ans. Henry L Senger, 71, Civil Engineer, Boise, Idaho.

Ques. 2. Are you acquainted with Idaho Power Company, the holder of Permit No. 20812? How long have you known him and where does he reside?

Ans. Yes, more than 35 years. Main office - Boise, Idaho.

Ques. 3. Have you read or heard read said Permit No. 20812, and are you familiar with its provisions and conditions?

Ans. Yes

Ques. 4. State source of water supply, place of diversion, and describe works for conveying water from point of diversion to place of use.

Ans. Billingsley Creek, a tributary of Snake River. South 18°18'50" East 1641.32 feet from the quarter corner common to Secs 2 and 11, T 7 S, R 13 E, BM, and is in the SW $\frac{1}{4}$ NE $\frac{1}{4}$ of Sec 11, said township and range, Gooding County. Description of Works: A 2'3" wide by 2' high concrete headgate; 1,250' of ditch 2'6" wide on the bottom, 4'6" wide at water line and depth of water 1' with pressure box 16"x12"x5'6" high with 2,600' of distribution pipe therefrom 10" and 4" in diameter.

Ques. 5. How many second feet of water do you estimate said works will safely conduct to place of use, and how much water have you seen being so conveyed?

Ans. 5.0 cfs

Ques. 6. State for what purpose water is used and at what place. (If for irrigation, give each subdivision in which water has been used and number of acres irrigated in each subdivision.) State whether cultivated or natural meadow land and the nature of all improvements which have been made as a direct result of said use.

Ans. For cooling of transformers, bearings, etc; fire protection, lawn and garden water at the power plant operator's village.

20812

Ques. 7. If for power or other purposes than irrigation, state how water has been applied and to what extent.

Ans. See answer to Ques 6.

Ques. 8. (If for irrigation) state character of land that has been reclaimed, and give your estimate of the amount of water required for its profitable cultivation.

Ans. Approximately 0.1 cfs is required in use for resident lawn and garden irrigation.

Ques. 9. Have you any interest in the works, water or lands above mentioned? If so, in what way and to what extent?

Ans. No

Ques. 10. State when, how, in what amount and to what extent you have witnessed the application to beneficial use of water diverted under said permit.

Ans. On November 10, 1949, I witnessed approximately 3.0 cfs ~~water~~ being used for power plant purposes such as cooling transformers, bearings, etc; and 0.1 cfs for domestic purposes in operator's village. An additional 1.9 cfs is required for fire protection and warmer weather and longer peak loads.

BOISE, IDAHO

PERMIT NO. 20812

Proof of Application of Water to Beneficial Use

Deposition of Witness

The deposition of two witnesses, on this form, taken separately, required in each case.

Ques. 1. State your name, age, residence, occupation and postoffice address.

Ans. Myron Swendsen, 57, Civil Engineer, Boise, Idaho

Ques. 2. Are you acquainted with Idaho Power Company, the holder of Permit No. 20812? How long have you known him and where does he reside?

Ans. Yes, more than 25 years - main office - Boise, Idaho.

Ques. 3. Have you read or heard read said Permit No. 20812, and are you familiar with its provisions and conditions?

Ans. Yes

Ques. 4. State source of water supply, place of diversion, and describe works for conveying water from point of diversion to place of use.

Ans. Billingsley Creek, a tributary of Snake River. South 18°18'50" East 1641.32 feet from the quarter corner common to Secs 2 and 11, T 7 S, R 13 E, BM, and is in the SW $\frac{1}{4}$ NE $\frac{1}{4}$ of Sec 11, said township and range, Gooding County. Description of Works: A 2'3" wide by 2' high concrete headgate; 1,250 feet of ditch 2'6" wide on the bottom, 4'6" wide at water line and depth of water 1' with pressure box 16'x12'x5'6" high with 2,600' of distribution pipe therefrom 10" and 4" in diameter.

Ques. 5. How many second feet of water do you estimate said works will safely conduct to place of use, and how much water have you seen being so conveyed?

Ans. 5.0 cfs

Ques. 6. State for what purpose water is used and at what place. (If for irrigation, give each sub-division in which water has been used and number of acres irrigated in each subdivision.) State whether cultivated or natural meadow land and the nature of all improvement which have been made as a direct result of said use.

Ans. For cooling of transformers, bearings, etc; fire protection, lawn and garden water at the power plant operator's village.

20812

Ques. 7. If for power or other purposes than irrigation, state how water has been applied and to what extent

Ans. See answer to Ques. 6.

Ques. 8. (If for irrigation) state character of land that has been reclaimed, and give your estimate of the amount of water required for its profitable cultivation.

Ans. Approximately 0.1 cfs is required in use for resident lawn and garden irrigation.

Ques. 9. Have you any interest in the works, water or lands above mentioned? If so, in what way and to what extent?

Ans. No

Ques. 10. State when, how, in what amount and to what extent you have witnessed the application to beneficial use of water diverted under said permit.

I witnessed

Ans. On November 10, 1949, / approximately 3.0 cfs were being used for power plant purposes such as cooling transformers, bearings, etc; and 0.1 cfs for domestic purposes in operator's village. An additional 1.9 cfs is required for fire protection and warmer weather and longer peak loads.

NOTICE FOR PUBLICATION
NOTICE OF PROOF APPLICATION OF WATER
TO BENEFICIAL USE

Notice is hereby given that at 10:00 A. M. on the 19th day of December, 1949,
at Boise, County of Ada, State of Idaho, before
G H PETERSEN, Notary Public,, proof will be submitted of the
application to beneficial use of 5.0 cubic feet per second of the waters of Billingsley
Creek, a tributary of Snake River.
in accordance with the terms and conditions of Permit No. 20812
heretofore issued by the State Reclamation Engineer of the State of Idaho.

The name and postoffice address of the person or corporation holding said permit are
IDAHO POWER COMPANY, 1220 Idaho Street, Boise, Idaho

The use to which said water has been applied is Cooling of transformers, bearings, etc, fire
protection, lawn & garden watering at Power
The amount applied to beneficial use is 5.0 cfs
Plant Operators' village.

The place where said water is used (~~if for irrigation, give full and accurate description of the~~
~~land irrigated~~) is Lot 7, Section 2 and Lot 2, Section 11, Township 7 South,
Range 13 East, BM.

The name of the canal or ditch or other works by which said water is conducted to such place of
use is No name - ditch and pipe line.

The right to take water from such works is based upon Permit No. 20812

The source of supply from which such water is diverted is Billingsley Creek, a
tributary of Snake River.

The date of priority which said user is prepared to establish is December 10, 1948.

MARK R. KULP

State Reclamation Engineer.

Proof of Completion of Works

AFFIDAVIT OF HOLDER

STATE OF IDAHO

County of Ada

} ss.

IDAHO POWER COMPANY

, being first duly sworn, upon his oath deposes and says:

First: That he is the holder and owner of Permit to Appropriate the Public Waters of the State of Idaho, No. 20812, and that his postoffice address is 1220 Idaho Street, Boise, State of Idaho.

Second: That the name of the stream from which said water is to be directed is Billingsley Creek

Third: That the point of diversion of said water is South 18°18' 50" East 1641.32 feet from the quarter corner common to Secs 2 & 11, T 7 S, R 13 E, and is in the SW $\frac{1}{4}$ NE $\frac{1}{4}$, Sec 11, T 7 S, R 13 E, BM, in Gooding County.

Fourth: That under the terms and conditions of said permit, construction thereunder was required to be completed by December 18, 1949. /Cooling of transformers, bearings, etc,

Fifth: That the use for which said water is intended is /fire protection, lawn and garden water

Sixth: That on the date above mentioned, the works constructed under said permit were ~~completed~~ at Power Plant Operators Village,

fully completed and consisted of the following:

- Concrete headgate, 1250-ft ditch; wooden tank or pressure box with
1. Kind of works: concrete bottom; 1350 ft. 10" pipe; underground distribution pipe system. (Reservoir, dam, ditch, flume, pipe or otherwise.)

II. Dimensions of work:

- (a) Height of dam. None feet, length of dam at top feet, length of dam at bottom feet. Material used in construction

(State whether wood, earth, stone or concrete.)

- (b) Capacity of reservoir. None acre feet.

- (c) Size of headgate: Width 2'6" feet, height 2'0" feet.

- (d) Conduit. Ditch width at bottom 2'6" feet, width at water line 4'6"

(State whether ditch, flume or pipe.)

feet, depth of water 1'0" feet; diameters of pipes 10 & 4" inches, average grade per mile is 50 feet. Length of conduit is 2600 feet.

Seventh: That said works are capable of conducting to the place of intended use five second feet of water.

Eighth: That water appropriated under said permit is available for approx. 4 acres of land described as follows: Lot 7, Section 2, and Lot 2, Section 11, T 7 S, R 13 E, BM.

Ninth: Remarks: That Power Plant operators village includes 7 or more residences and other buildings. Power plant and village lawns and gardens aggregate approx 4 acres, located in Lot 7, Sec 2, and Lot 2, Sec 11, T 7 S, R 13 E, BM. Water from Billingsley Creek has been used at Lower Salmon power plant and village installation for many years. This application is for the purpose of providing record license right for use at enlarged power plant and village, and will incorporate the quantity of water for which old present right exists. Irrigation is only part of several uses of water which will be made, including power plant cooling, fire protection, etc.

DEPARTMENT OF RECLAMATION
BOISE

INSTRUCTIONS

Idaho Power Co.
Attention- Mr. A. C. Inman
120 Idaho St.
Boise, Idaho

PROOF OF COMPLETION OF WORKS

Boise, Idaho October 4, 1949

Dear Sir:-

Under the terms of your permit No. 20812 you are required to complete your diversion works on or before December 15, 1949. I enclose herewith blank affidavit to be filled out, sworn to by you before a Notary Public or a Justice of the Peace, and returned to this office on or before the above date, or within ten days thereafter, for the purpose of making proof of completion under the permit. Upon receipt of this affidavit in this office, provided the same satisfactorily shows the completion of the works substantially in accordance with the terms of the permit, together with a fee of \$5.00, a Certificate of Completion will be issued to you.

The certificate to be issued under this proof will not give a perpetual right to the use of water for which application was made, as it only confirms the completion of works of a capacity to divert and convey to the place of intended use a certain amount of water. The law requires that another proof be submitted when the water has been fully applied to a beneficial use, at which time license is issued for the amount of water actually in use. Information in regard to this last proof will be furnished on request.

Yours truly,

MARK R. KUIP

State Reclamation Engineer

IDAHO POWER COMPANY

BOISE, IDAHO

December 6, 1948.

Mr Mark R Kulp
State Reclamation Engineer
State House
Boise, Idaho

Dear Mr Kulp:

I am transmitting herewith application of Idaho Power Company for permit for appropriation of 5 cubic feet per second of the waters of Billingsley Creek for use at the Company's new 60,000 kw power plant installation at Lower Salmon, which is now nearing completion. From the application you will note that this water is to be used for cooling purposes in the power plant, as well as for fire protection over the entire project, and also for lawn and garden watering and other related uses at the operators' village.

As also pointed out in the application under "Remarks," the Company has an existing use right for water from Billingsley Creek, which has been used for many years at the old Lower Salmon plant, which is now being replaced by the new project; and the current application is for the purpose of providing a record license right for the future enlarged use of water, and will incorporate the quantity of water which the old existing right covers.

Idaho Power Company check No 4836, in the amount of \$6, is also enclosed to cover the filing fee in connection with this application.

Very truly yours,

A handwritten signature in cursive script, appearing to read "A C Inman".

A C Inman
Secretary

20812

IDAHO POWER COMPANY
NOTES TO FINANCIAL STATEMENTS, SEPTEMBER 30, 1948
(Subject to Approval of Independent Auditors)

1. Electric plant in service is stated on the basis of original cost when first devoted to public service in accordance with reports filed with the Federal Power Commission and state regulatory authorities. Pursuant to orders of such authorities, a reserve is being provided for amortization of the item of electric plant acquisition adjustments, \$2,155,624.11, by annual charges to income; of this amount, \$2,091,576.09 is being amortized over a period of fifteen years beginning with the year 1943. The book value of electric plant does not purport to represent present realizable values or replacement cost.
2. Pursuant to an order of regulatory authority, the Company is amortizing expenditures in connection with conversion of gas users to the use of electric service, by monthly pro rata charges to income over a period of approximately six and two-thirds years beginning January 1, 1945.
3. Amendments to the by-laws fixing different dividend rates or redemption prices for authorized but unissued preferred stock may be made by the board of directors.
4. It is the Company's practice to provide for retirements of property by making such provisions from current income as are considered by the management necessary to provide for current and future retirements. The present systems of accounts prescribed by the regulatory authorities to which the Company is subject, which became effective January 1, 1937, have required depreciation accounting since that date. For some years prior to that date the Company was subject to an upkeep formula prescribed by state regulatory authorities which governed the amount of combined maintenance and depreciation allowable for rate purposes. The Company's provisions for retirements since January 1, 1937, have approximated straight-line depreciation based on studies by the Company of the estimated lives of individual units of depreciable property. While the reserve balance at September 30, 1948, is less than would be computed on a straight-line basis applied retroactively prior to 1937, such balance meets the requirements of a 3 1/2% compound interest basis.

Charges to property retirement reserve consist of the book value (estimated if not known) of units of property retired plus removal costs, less salvage.

Notice for Publication
**NOTICE OF PROOF
APPLICATION OF WATER TO
BENEFICIAL USE**

Notice is hereby given that at 10:00 A.M. on the 19th day of December, 1949, at Boise, County of Ada, State of Idaho, before G. H. Petersen, Notary Public, proof will be submitted of the application to beneficial use of 5.0 cubic feet per second of the waters of Billingsley Creek, a tributary of Snake River, in accordance with the terms and conditions of Permit No. 20812 heretofore issued by the State Reclamation Engineer of the State of Idaho.

The name and postoffice address of the person or corporation holding said permit are Idaho Power Company, 1220 Idaho St., Boise, Idaho.

The use to which said water has been applied is cooling of transformers, bearings, etc., fire protection, lawn and garden watering at power plant operators' village.

The amount applied to beneficial use is 5.0 cfs.

The place where said water is used is Lot 7, Section 2 and Lot 2, Section 11, Township 7 South, Range 13 East, BM.

The name of the canal or ditch or other works by which said water is conducted to such place of use is No name ditch and pipe line.

The right to take water from such works is based upon Permit No. 20812.

The source of supply from which such water is diverted is Billingsley Creek, a tributary of Snake River.

The date of priority which said user is prepared to establish is December 10, 1948.

MARK R. KULP,
State Reclamation Engineer 1-4
