**NOTICE OF PROPOSED CHANGE OF
WATER RIGHTS**

Notice is hereby given that an application has been filled with the Department of Water Resources by Young & Young Partnership, 300-A East, 1600 North; RUPERT ID 83350 for changes to water rights in Minidoka/Lincoln Counties as described below:

Transfer No. 5720 involving 77 water rights authorizing the diversion of a combined total of 119.01 cfs from 32 existing and inter-connected wells used for the irrigation of 8574 acres in Lincoln/Minidoka Counties. Seventy (70) acres historically irrigated within the SW, S14 T07S, R23E were inadvertently omitted in previous Approved Transfer No. 5167. **Transfer No. 5720** has been filed solely to correctly record total current 8644 acre permissible place of use with no other changes to the water rights. Additional information relating to the proposed transfer may be obtained by calling 208-736-3033.

Any protest against the proposed changes must be filed with the Department of Water Resources, Southern Region, 1341 Fillmore St., Suite #200; Twin Falls ID 83301 together with a protest fee of \$25.00 on or before May 22, 2000 to be considered by the Department in its decision to grant or deny any part of the proposed change. The protestant must also send a copy of the protest to the applicant.

**PRELIMINARY ORDER CORRECTING
TRANSFER APPROVAL**

This matter having come before the Department of Water Resources (Department) as a result of an application for transfer of water rights, the Department makes the following Findings of Fact, Conclusions of Law, and Order:

FINDINGS OF FACT

1. On May 14, 2002, the Department approved Application for Transfer No. 66087 (transfer) changing the place of use under Water Right No. 36-2058B and 59 other water rights diverted from the same points of diversion and used for irrigation of the same lands.
2. Water Right No. 36-2058B as described on pages 8, 9 and 10 of the transfer approval listed 40 points of diversion authorized under the water right. Department review revealed that the transfer approval erroneously listed several points of diversion due to a clerical error. The transfer approval referenced the same list of authorized points of diversion described under Water Right No. 36-2058B for all other rights involved in the transfer.

CONCLUSIONS OF LAW

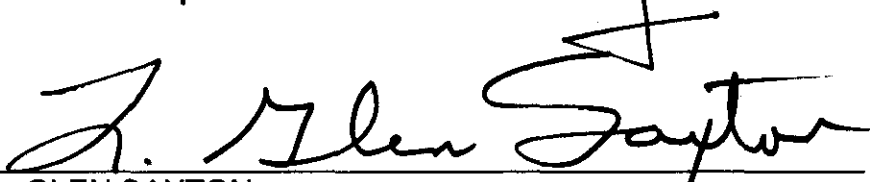

1. The transfer approval should accurately describe each established water right as changed by the transfer pursuant to Section 42-222, *Idaho Code*.
2. The Department should correct the transfer approval to show the correct points of diversion authorized under Water Right No. 36-2058B and, by reference, all the other water rights involved in the transfer.

ORDER

IT IS HEREBY ORDERED that the authorized points of diversion listed on pages 8 and 9 of the transfer approval for Water Right No. 36-2058B are **CORRECTED** as shown on the amended pages 8 and 9 attached to this order. The correction to Water Right No.

36-2058B will effectively correct the authorized points of diversion for all other rights involved in the transfer.

Dated this 9th day of May, 2003.

DEPARTMENT OF WATER RESOURCES

IN THE MATTER OF APPLICATION)	
FOR TRANSFER NO. 66087 IN THE)	
NAME OF YOUNG & YOUNG)	PRELIMINARY ORDER
_____)	AMENDING TRANSFER APPROVAL

This matter having come before the Department of Water Resources (Department) as a result of an application for transfer of water rights, the Department makes the following Findings of Fact, Conclusions of Law, and Order:

FINDINGS OF FACT

1. On May 14, 2002, the Department approved Application for Transfer No. 66087 (transfer) changing the place of use under Rights 36-4006, 36-11340 and 58 other water rights diverted from the same point of diversion and used for irrigation of the same lands.
2. Right 36-4006 as described on pages 77 and 78 of the transfer approval document contained the following condition (listed as condition No. 9):

This right is limited to the irrigation of 1,240 acres within the place of use described above in a single irrigation season.

3. Right 36-4006 is an enlargement of Rights 36-2619 and 36-2620 pursuant to Section 42-1426, Idaho Code. This right, when originally filed as a statutory claim, listed irrigation of a total of 640 acres. As an enlargement right, it is limited to the irrigation of 1,240 acres only in combination with Rights 36-2619 and 36-2620. This limitation was correctly stated in condition No. 10.
4. Right 36-11340 is an enlargement of Right 36-7041 pursuant to Section 42-1426, Idaho Code and is described as such on pages 119 and 120 of the transfer approval document.
5. Enlargement rights filed in the Snake River Basin Adjudication typically contain a condition subordinating them to all water rights with a priority date earlier than April 12, 1994 that are not decreed as enlargements.

CONCLUSIONS OF LAW

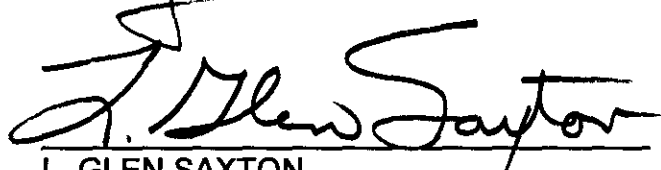

1. Rule 730.02.c of the Idaho Department of Water Resources' Rules of Procedure (IDAPA 37.01.01), authorizes IDWR to review a preliminary order on its own motion.
2. The transfer approval should have contained a subordination condition on both enlargement rights as outlined in Finding of Fact No. 5 above.
3. The transfer approval of Right 36-4006 did not require the condition stated in Finding of Fact No. 2, but rather was correctly described in transfer approval condition No. 10.
4. The Department should amend the transfer approval to remove condition number 9 from the transfer approval describing Right 36-4006.
5. The Department should amend the transfer approval to add a condition subordinating Rights 36-4006 and 36-1130 to all other water rights with a priority date earlier than April 12, 1994 that are not decreed as enlargement rights.

ORDER

IT IS HEREBY ORDERED that the following condition is **ADDED** to the transfer approval of Right 36-11340 and that the language contained in Approval Condition No. 9 for Right 36-4006 on the transfer approval document is hereby **RESCINDED** and is **REPLACED** by the following condition:

This water right is subordinate to all water rights with a priority date earlier than April 12, 1994, that are not decreed as enlargements pursuant to Section 42-1426, Idaho Code. As between water rights decreed as enlargements pursuant to Section 42-1426, Idaho Code, the earlier priority right is the superior right.

Idaho Conservation League*, 131 Idaho 411, 423, 958 P.2d 568, 580 (1998), IDWR filed a *Supplemental Director's Report, Reporting Area 3, IDWR Basin 36, Regarding Revision of Period of Use (For Irrigation Water Uses) and Conjunctive Management General Provisions* which included a recommendation for the irrigation season of use for this water right. No objections to this Supplemental Report were filed and the time period for filing objections has now expired.

Therefore, IT IS ORDERED that water rights 36-02058B, 36-02058C and 36-02058D are hereby decreed as set forth in the attached *Partial Decrees Pursuant to I.R.C.P. 54(b)*.

IN THE MATTER OF APPLICATION FOR	)	
	)	
TRANSFER NO. 66087 IN THE NAME OF	)	ORDER GRANTING
	)	INTERIM APPROVAL
YOUNG & YOUNG PARTNERSHIP	)	OF TRANSFER
_____	)	

On February 25, 2000 Steven D. Young, a partner in Young & Young Partnership submitted to the Department Application for Transfer 5720 , which has been renumbered to Transfer 66087.

The transfer proposes to add an additional 70.0 acres to the 8574.0 acre place of use for rights described under previous Transfer 5167, creating an 8644.0 acre permissible place of use. The actual number of acres irrigated each year will continue to be limited to the 8574.0 acres authorized under these rights.

The right holder has requested the Department grant interim approval to proceed with the changes proposed under Transfer 66087 during the 2002 irrigation season in order to assist in conservation of the resource, and efficient operation of the irrigated farming enterprise until the application process can be completed.

The right holder has requested interim approval of the transfer and has shown reasonable cause for the action. Final review and recommendations by Department staff have been completed without identifying obstacles that would prevent approval of this transfer. Issuance of final certificates approving the transfer has been slowed by backlogs of revising and updating the electronic database. When the electronic database is updated for the rights involved in this transfer, certificates approving the application for transfer will be issued with the conditions listed in this order.

MICROFILMED
JUN 13 2002

IT IS, THEREFORE, HEREBY ORDERED that the right holder of Transfer No. 66087 is granted interim approval for the 2002 irrigation season subject to the following conditions:

1. Right holder shall comply with the drilling permit requirements of Section 42-235, Idaho Code.
2. The right holder shall measure and annually report diversions of water and/or other pertinent hydrologic and system information as required by Section 42-701, Idaho Code.

4. The right holder shall accomplish the change authorized by this transfer within one (1) year of the date of this approval.
5. Failure of the right holder to comply with the conditions of this transfer is cause for the Director to rescind approval of the transfer.
6. Pursuant to Section 42-1412(6), Idaho Code, these water rights are subject to such general provisions necessary for the definition of the rights or for the efficient administration of water rights as may be determined by the Snake River Basin Adjudication court at a point in time no later than the entry of the final unified decree.
7. The period of use for the irrigation described in this approval may be extended to a beginning date of 3/15 and an ending date of 11/15 provided that beneficial use of the water can be shown and other elements of the right are not exceeded. The use of water before 4/1 and after 10/31 is subordinate to all water rights having no subordinated early or late irrigation use and a priority date earlier than this approval or the date of partial decree, whichever is earlier.

PRELIMINARY ORDER**

The accompanying order or approved document is a "Preliminary Order" issued by the department pursuant to section 67-5243, Idaho Code. It can and will become a final order without further action of the Department of Water Resources (department) unless a party petitions for reconsideration, files an exception and brief, or requests a hearing as further described below:

PETITION FOR RECONSIDERATION

Any party may file a petition for reconsideration of a preliminary order with the department within fourteen (14) days of the service date of this order. The department will act on a petition for reconsideration within twenty-one (21) days of its receipt, or the petition will be considered denied by operation of law. See Section 67-5243(3) Idaho Code.

EXCEPTIONS AND BRIEFS

Within fourteen (14) days after (a) the service date of a preliminary order, (b) the service date of a denial of a petition for reconsideration from this preliminary order, or (c) the failure within twenty-one (21) days to grant or deny a petition for reconsideration from this preliminary order, any party may in writing support or take exceptions to any part of a preliminary order and may file briefs in support of the party's position on any issue in the proceeding with the Director. Otherwise, this preliminary order will become a final order of the agency.

REQUEST FOR HEARING

Unless a right to a hearing before the department or the Idaho Water Resource Board (Board) is otherwise provided by statute, any person aggrieved by any final decision, determination, order or action of the Director of the department and who has not previously been afforded an opportunity for a hearing on the matter may request a hearing pursuant to section 42-1701A(3), Idaho Code. A written petition contesting the action of the Director and requesting a hearing shall be filed within fifteen (15) days after receipt of the denial or conditional approval.

ORAL ARGUMENT

If the Director grants a petition to review the preliminary order, the Director shall allow all parties an opportunity to file briefs in support of or taking exceptions to the preliminary order and may schedule oral argument in the matter before issuing a final order. If oral arguments are to be heard, the Director will within a reasonable time period notify each party of the place, date and hour for the argument of the case. Unless the Director orders otherwise, all oral arguments will be heard in Boise, Idaho.

CERTIFICATE OF SERVICE

All exceptions, briefs, requests for oral argument and any other matters filed with the Director in connection with the preliminary order shall be served on all other parties to the proceedings in accordance with IDAPA Rules 37.01.01302 and 37.01.01303 (Rules of Procedure 302 and 303).

FINAL ORDER

The Director will issue a final order within fifty-six (56) days of receipt of the written briefs, oral argument or response to briefs, whichever is later, unless waived by the parties or for good cause shown. The Director may remand the matter for further evidentiary hearings if further factual development of the record is necessary before issuing a final order. The department will serve a copy of the final order on all parties of record.

Section 67-5246(5), Idaho Code, provides as follows:

Unless a different date is stated in a final order, the order is effective fourteen (14) days after its issuance if a party has not filed a petition for reconsideration. If a party has filed a petition for reconsideration with the agency head, the final order becomes effective when:

- (a) the petition for reconsideration is disposed of; or
- (b) the petition is deemed denied because the agency head did not dispose of the petition within twenty-one (21) days.

APPEAL OF FINAL ORDER TO DISTRICT COURT

Pursuant to sections 67-5270 and 67-5272, Idaho Code, if this preliminary order becomes final, any party aggrieved by the final order or orders previously issued in this case may appeal the final order and all previously issued orders in this case to district court by filing a petition in the district court of the county in which:

- i. A hearing was held,
- ii. The final agency action was taken,
- iii. The party seeking review of the order resides, or
- iv. The real property or personal property that was the subject of the agency action is located.

The appeal must be filed within twenty-eight (28) days of this preliminary order becoming final. See section 67-5273, Idaho Code. The filing of an appeal to district court does not itself stay the effectiveness or enforcement of the order under appeal.

In Addition: There is now a way to research water rights over the Internet. The system is a graphical or text query system and can be accessed from the IDWR home page:

<http://www.idwr.state.id.us>

From that link, select "Snake River Basin Adjudication" toward the lower left hand of the screen. Then select "Map" or "Text" on the next page.

"TEXT" lets you search water rights via Name, Legal, Source, etc.

Enter in the information you know. Information can be entered under more than one tab. After you have completed entering your information, select "Search"

"MAP" allows you to search water rights graphically.

Use the tools on the Left side of the screen to Zoom in and out. To find out what each button does, hold the cursor over the button for a second. To the Right side of the screen are different layers that can be turned on or off. As you zoom in to your place in question, different layers will appear on the right side of the screen.

A HELP function is available within the application or you can call 1-800-451-4129 or (208)327-7906 for help.

FROM: Allen Merritt 

DATE: June 2, 2000

TO: Transfer File No. 5720/66087

Water Right(s): Numerous

In the Name of: Young & Young Partnership

SUBJECT: Review and Recommendation

This transfer proposes to correct an error made in processing the previous transfer 5167 which omitted some acres that had been historically irrigated. See Stanton's 2/15/2000 memo.

In totaling the rights it appears they would allow irrigation of 8594.2 acres originally. I cannot figure out how Stanton came up with 8593. Note T5167 limited use to 8574 acres. This transfer puts back in 70 acres historically irrigated. This correction in PPU appears to be reasonable as long as irrigation in any one year is limited to the historical number of acres (8594.2 acres).

Recommendation

I recommend that this transfer be approved subject to the following conditions:

- Similar conditions as T5167.
- Limit total use to 8594.2 acres in any one season.

8574 total acres per T 5167

MEMO

TO: File

DATE: 2/15/2000

FROM: J E STANTON

SUBJECT: Transfer #5167, Young & Young Partnership

At the request of Steve Young, I have reviewed the application to find out why the SW1/4 of Sec. 14 T. 7S R. 23E was not included in the approved transfer. This land contains a partial pivot & another tiny full pivot, for maybe 90 acres total. This land was covered by T. 4831, which was approved in March of 1997. The farm maps provided by Steve include this property, but the land list that I prepared for T. 5167 do not include it. All of the rights covered by T. 4831 are covered by T. 5167. It has been too long for me to remember all of the conversations I had with Mr. Young regarding T. 5167, so I do not know why this land was not included in it. Corey reviewed the application, and did not catch this apparent omission. It was also not noticed at the state office. It must have looked like this land was being dried up under this transfer. I'm quite sure that I would have sent a copy of the completed application to Steve Young for his review.

Steve just told me that the west pivot in Sec. 14 covers 72.9 acres, that the small middle pivot covers 15 acres, and that the east pivot covers 94.4 acres. There is also another small half pivot in the NE corner of the section that adds a few more acres. T. 5167 allows 109 acres to be irrigated in the SE1/4 Sec. 14, whereas the 3 pivots cover 182.3 acres; adding the additional ground would increase the overall land list by 73.3 acres. The existing rights covered 8593 acres before the transfer, and 8574 after it was approved. So a new transfer needs to be filed to correct this problem, with a total PPU of 8646 acres. It appears that this will add 53 new acres to the system, but there enough small or partial pivots that could be left off in a given year so that the system could be operated within the allowable acreage. With the present filing fee of \$100 per transfer, this could cost the Department another \$1800 to process (not counting staff time). This is obviously not a desirable situation for us or for the applicant, but I can't see any way around it. Based on our historical reluctance to issue correcting orders, I don't think that Boise would be willing to do an administrative solution outside the full transfer process.

RE: Water right transfer

Dear Customers:

You had started a process of transferring water rights under one right, X36-8775 (Transfer No. 5167). In reviewing the transfer, it appears that the Southwest Quarter of Section 14, Township 7 South, Range 23 East, does not include irrigated acres under the transfer document. The original water right 36-02214, Priority Date of 4/1/1953 for 3.08 cfs included 80 acres in the Southwest Quarter of Section 14 (Exhibit A). In the transfer process these acres were not included (Exhibit B). Was this an over site or has the 3.08 cfs for those 80 acres been transferred elsewhere?

The transfer is for a total of 119.01 cfs for irrigation of 8,574 acres during an irrigation season. If the Idaho Department of Water Resources were to restrict water use to the acres, the Southwest Quarter of Section 14 could have water use prohibited.

If these acres were to be included in the transfer, a new transfer request will have to be completed. I have enclosed a copy of the original Water Right X36-02214 showing acres claimed in the Southwest Quarter for irrigation (Exhibit A). I have also enclosed a copy of the Application of Transfer of Water Right that does not include the referenced 80 acres (Exhibit B).

Please review and if the application is correct and the water rights associated with the 80 acres were transferred elsewhere, please let us know. Otherwise, I would be happy to pick up a new application for you to correct. You may also want to review this with Jim Stanton to see if he is aware of the discrepancy.

Sincerely,

Kristine Peterson

The applicants request to dry up 6.7 acres within W1/2SW, all S30, T07S, R15E; Gooding County; and also propose to drill two (2) new wells within SWNW & NWSW, all S09, T05S, R17E in a replacement heifer operation; Lincoln County. The remainder of the right is involved in other pending transfer applications before the Department.

Young & Young Partnership, 300-A East, 1600 North; RUPERT ID 83350 have filed two (2) Applications for Transfer as follows:
Transfer No. 5707 involves six ground water irrigation rights in Lincoln County as recorded:

The applicants desire to dry up pivot corners on one farm (consisting of 39.7 acres in S29 and 58.3 acres in S30) in order to allow a pivot to be installed on a dry portion of another farm by leasing portions of water rights; and also propose to divert a combined total of 1.40 cfs from an existing well within SWSE, S32 for irrigation of a 99 acre permissible place of use within S32; all T06S, R23E.

Transfer No. 5720 involving 77 water rights authorizing the diversion of a combined total of 119.01 cfs from 32 existing and inter-connected wells used for the irrigation of 8574 acres in Lincoln/Minidoka Counties. Seventy (70) acres historically irrigated with the SW, S14, T07S, R32E were inadvertently omitted in previous Approved Transfer No. 5167. Transfer No. 5720 has been filed solely to correctly record the total current 8644 acre permissible place of use with no other changes to the water rights. Additional information relating to the proposed transfer may be obtained by calling 208-736-3033.

Any protest against the proposed changes must be filed with the Department of Water Resources, Southern Region, 1341 Fillmore St., Suite #200; Twin Falls ID 83301 together with a protest fee of \$25.00 on or before May 22, 2000 to be considered by the Department in its decision to grant or deny any part of the proposed change. The applicants desire to dry up pivot corners on one farm (consisting of 39.7 acres in S29 and 58.3 acres in S30) in order to allow a pivot to be installed on a dry portion of another farm by leasing portions of water rights ; and also propose to divert a combined total of 1.40 cfs from an existing well within SWSE, S32 for irrigation of a 99 acre permissible place of use within S32; all T06S, R23E.

Transfer No. 5720 involving 77 water rights authorizing the diversion of a combined total of 119.01 cfs from 32 existing and inter-connected wells used for the irrigation of 8574 acres in Lincoln/Minidoka Counties. Seventy (70) acres historically irrigated within the SW, S14, T07S, R23E were inadvertently omitted in previous Approved Transfer No. 5167. Transfer No. 5720 has been filed solely to correctly record the total current 8644 acre permissible place of use with no other changes to the water rights. Additional information relating to the proposed transfer may be obtained by calling 208-736-3033.

Any protest against the proposed changes must be filed with the Department of Water Resources, Southern Region, 1341 Fillmore St., Suite #200; Twin Falls ID 83301 together with a protest fee of \$25.00 on or before May 22, 2000 to be considered by the Department in its decision to grant or deny any part of the proposed change. **(Each transfer requires a separate protest.)** The protestant must also send a copy of the protest to the applicant.
