MEMORANDUM

TO: Files 34-07037 and 34-07138

FROM: Sharla

DATE: April 14, 1994

RE: License Review

These two files have been reviewed for license issuance. A licensing amendment was previously sought for Permit No. 34-07138, however, the information contained in it was not complete. Therefore, a new licensing amendment will be requested but no fee will be solicited. Permit No. 34-07037 also needs to be amended and a fee will be required for this one.

The permissible place of use of 1980 acres has been used for both rights. The same land base is also applicable to Right Nos. 34-02459/02460/02461/02462/10925. A condition has been added to both rights limiting the combined annual volume under all rights to 6930.0 acre feet (3.5 af/acre). The two rights to be licensed have further been conditioned to limit each individually to the irrigation of 1664 acres/season.

Permit No. 34-07037 is for the diversion of groundwater. Water is discharged from the two wells into Island Ditch which flows into the East Side Ditch. From the East Side Ditch it is injected into the river and rediverted into the Munsey Ditch. Water can be rediverted from the Munsey Ditch in Section 2 into mainlines which then transport the water to a private ditch. Here, water is also discharged into the private ditch from two additional wells which are covered under Right Nos. 34-02459/02460/02461/02462/10925. Five additional points of redirection from the private ditch and a pond at the end of the private ditch are used to irrigate the place of use. Water can also be rediverted from the Munsey Ditch at two points in Section 13. These points of redirection from ditches and the pond have not been listed in the point of diversion field, however, they have been listed in remarks along with a description of the entire system. The point of injection into the river and the redirection from the river at the headgate of the Munsey Ditch have been listed in the point of diversion field.

Permit No. 34-07138 is for the diversion of surface water from the Big Lost River. Water is diverted from the river into the Munsey Ditch and then is rediverted from the same points listed above. Again, the redirections have not been listed in the point of diversion field but are covered in the remarks field.

RE: Place of Use Permit 34-7037

Dear Mr. Bell:

The A.S.C.S. office in Arco has informed the department that their records indicate that the east half of Sec 16, T03N, R26E, has been irrigated at least since 1981. If you are able to supply me with documented verification that the east half of Sec 16 was irrigated prior to 1985, I may be able to include the lands in Sec 16, under the place of use for 34-7037. The earlier the documentation the better.

The verification should consist of the following:

1. An aerial photograph of Sec 16 dated between 1981, and 1985. The aerial photograph can be a copy of the compliance flight. The aerial photograph must be dated as to the date of the photo, and signed and dated by the county CED for the A.S.C.S.
2. Oldest crop report from A.S.C.S. dated prior to 1985. (It would be best to have the earliest report that the A.S.C.S. office has for Sec 16.) The crop report must also be signed and dated by the county CED.
3. Any other documentation (prior to 1985) that you may have that indicates irrigation of the east half of Sec 16. The earlier the information the better.

Please forward this information to me at the Eastern Regional Office as soon as possible before July 29, 1991. Your prompt response will be appreciated.

Sincerely,

Keith C. Wilson

On multiple diversion systems indicate how diversion systems are connected.

Re: Permit No. 34-7138

Dear Mr. Bell:

It has come to my attention that someone from your company made a call to this office today, concerning the above-referenced permit. Due to our recent reviews of another permit within the Big Lost Drainage Basin, No. 34-7037, I took a look at the permit in question to examine the relationship between the two.

It appears that the above-referenced permit applies to the same lands as permit No. 34-7037 -- the only major difference between the two water rights is the source. The source of the permit in question is the Big Lost River, and in the remarks a notation has been made that this filing is for flood water only. Therefore, it appears that development of this permit is not prevented by lack of approval to develop permit no. 74-7037. Since one extension of time has already been approved for this permit, it is now time to submit a statement of beneficial use to initiate licensing for that portion of the Big Lost River water that is currently developed for use on the acres under this permit.

Please note that the proof due date was May 1, 1983. Therefore, each day that passes means one delay in date of priority for the permit. Since the final lapse letter was mailed on May 9, 1983, the grace period for reinstating the lapsed permit extends to 60 days after that date. Therefore, we must receive the statement of beneficial use postcard, copy enclosed, no later than July 8, 1983, to enable the permit to be reinstated.

If you have any questions concerning this permit, please feel free to give me a call at 334-4104.

Sincerely,

DAVID R. TUTHILL JR., P.E.
Supervisor, Water Allocation Section
