RE: Licensing of Water Right No. 34-7113

Dear Mr. Kimball:

Our letter to you dated December 30, 1980 indicated that based upon the findings of a representative of the Department a water right license would soon be issued for your fish propagation facility. However, since that time we discovered that (1) a water loss was found in your system between the inlet and the outlet and (2) there is no measuring device at either the inlet or the outlet.

Due to the extreme scarcity of surface water supplies in the Big Lost River drainage basin, the loss of 0.30 cubic feet per second that was measured between the inlet and outlet of your system is significant. In accordance with correspondence with the watermaster, Eugene Gabert, regarding this situation, we must require that the following conditions be met prior to issuance of the water right license:

1. Measuring devices must be installed at both the inlet and outlet works.
2. The amount of water computed to be lost between the inlet and outlet works must be replaced either by (a) purchasing replacement water from Mackay Dam, or by (b) providing replacement water from a groundwater source.

These two conditions should be completed within the 1981 irrigation season. Please contact our Eastern Regional Office at 150 Shoup Avenue, Idaho Falls, Idaho 83401, Telephone No. 525-7161, as soon as both have been met. They will schedule a field examiner to verify the system and your license will be issued shortly thereafter.

If you have any questions on this matter please feel free to contact me at 334-4104.

Dear Mr. Kimball:

On May 5, 1981, I sent to you a letter indicating that prior to issuance of a license for the above referenced permit you would need to (1) install measuring devices at your inlet and outlet works, and (2) make arrangements to replace the water lost between the inlet and the outlet.

Our records indicate that you have not responded to the letter. Therefore I am sending you this reminder that failure to meet the requirements may result in cancellation of your permit and may cause a halt of your diversion.

Please notify this office no later than February 1, 1982 of your plans to accomplish the two requirements so that we can continue to process your License. Failure to do so will cause us to proceed with permit cancellation procedures. ✓

If you desire further information on this matter I would be very happy to discuss it with you. My phone number is 334-4104. ✓

RE: Permit No. 34-7113

Dear Mr. Tuthill Jr.

As this practice is becoming more common, my recommendation has been as follows: Measuring devices at the inlet and outlet works of system, all water used to be replaced during irrigation season, May 1 To Oct. 15 as per Big Lost River Decree. To be monitored by Watermaster, Water District #34 Big Lost River and a copy of license to be furnished by Idaho Department of Water Resources.

RE: Permit No. 34-7113

Dear Mr. Gabert:

Last fall personnel from our Eastern Regional office performed a licensing field exam on the fish propagation facility described by the above referenced permit (copy attached). Measurements made at that time showed an intake rate of flow of 5.51 cfs and an outlet rate of flow of 5.21 cfs. This difference of .30 cfs indicates a loss through the ponds due to seepage and evaporation, which is the subject of this letter.

The Department is aware of the critical water supply situation in the Big Lost River Drainage Basin. Therefore, we are concerned about the affect that the above described water use will have on downstream water rights. Before a license is issued we want to consider two options. The first option is to require the permit holder to install measuring devices at the inlet and outlet works of his system, and require that all losses in the system be replaced. Water for replacement could be obtained from winter storage or from non-tributary groundwater. The second option is to consider that the losses due to the fish propagation system are insignificant, thus regulation of the system would not be necessary.

At this time I wish to solicit your thoughts and recommendations, Mr. Gabert.

Please call me at 334-4104 if you wish to discuss the situation.
