Dear Mr. Haney:

We are in receipt of your letter of August 15, 1972, indicating that your farm requires a diversion rate in excess of one inch per acre.

It is possible to obtain water rights for more than one inch per acre if soils or special irrigation systems require a greater diversion rate. We accept as adequate justification, statements to this affect from soils experts such as the S.C.S. We could not, however, under Permit No. 34-2423, issue a license for more than 2.4 c.f.s., as this is the quantity of water originally applied for under the Permit.

Our examiner has determined that your system is capable of diverting 4.73 c.f.s. It will be necessary for you to file a new application to cover the additional flow from your well. This application could either be for the same land, if the excessive rate is justified, or for additional land. I would recommend that you plan to visit this office in the near future to discuss your water rights.

Very truly yours,

Ref: Permit $\frac{1}{2}$ # 34-2423

Dear Sir:

The other day your field representative came to my place and measured my irrigation pump. It measured 235 in.

He informed me that I was only allowed 1 in. per acre as I only farm 120 acres. That wouldn't be sufficient water to irrigate with for my soil is very rocky & sandy with an average of about 17 inches of top soil on top of river gravel.

With 120 minor inches I couldn't start to irrigate this place. I have to really push 235 inches to keep up now in this hot weather.

If this farm stays in operation

34 2423

it will have to be slated more
than 120 inches per acre

Dear Mr. Haney:

We acknowledge receipt of the depositions of holder and two witnesses, also affidavit of publication in the **Arco Advertiser**, all submitted in proof of completion of works and beneficial use on Permit No. **G-29800**.

Before final action is taken in the matter, the law requires that a field examination be made by an engineer from this department.

We cannot tell just when this examination will be made, but our field engineer will try to contact you at the time he makes the examination so that arrangements may be made to show him over the grounds.

Re: Permit No. G - 29800

Maurice Evan Haney
Moore, Idaho

Dear Mr. Haney:

The date for proofs of Completion of Works and Application of water to beneficial use, as set out under terms of Permit No. G- 29800 are due not later than June 15, 1966

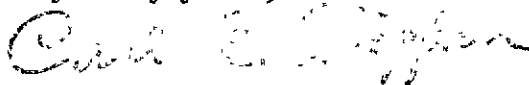

Before these proofs can be made, the statutory requirement is that a notice of your intention of proof be published once a week for four consecutive weeks in a newspaper within the county in which the land is located. In completing the Notice of proof for publication, the information should be taken from your Permit, including any amendments made in connection with a change of point of diversion or land list, which has been recorded in this department. If changes have been made and no amendments are on record, we advise you request a form for this purpose before your Notice is published.

We enclose Form 36, in duplicate, which is to be filled out and returned to this department at least FORTY (40) DAYS BEFORE THE MENTIONED DATE, (allowing for four weeks publication). Please give the name of the town, the address of the place where the depositions will be executed, and, the name of the notary public before whom you will appear to make the depositions of proof (this may be at any place convenient for you and your two witnesses), the quantity of water filed; for what purpose it is used; the point, or points, of diversion; and the location of use or the lands which are irrigated - - all by legal land description.

Enclosed also is Form 11, which is the authorization for us to have the notice published in the designated county newspaper at your expense. This is to be returned with two Forms 36.

At the time we send the notice to the newspaper we will send to you the forms for the depositions of holder and two disinterested witnesses. It is important that the depositions be executed at the time, on the date set, at the place named, and before the notary public, as advertised in the publication notice.

Very truly yours,

STATE RECLAMATION ENGINEER

Dear Sirs,

What is required to prove beneficial use of well water on the Maurice E. Haney farm at Moore, Idaho.

Permit No. 29800 was obtained on June 12, 1961. The well has been in use some since that time.

Could this letter possibly serve as application for the well license?

If not, would you give us the above information as to what is required and what cost is involved.
