REMARKS: The point of diversion is below the McLaughlin heading which is the last point where water is taken out of the Big Lost River, and the water to be used has for the past been going to waste in the Arco desert. Also the existing water rights are not adequate to irrigate the land, and the delivery has been very bad. This water is badly needed, and all that is required to get the water from the river is a pump and motor, and some pipe. If this permit is granted, work will begin immediately.

Arco, Idaho

Dear Mr. Parkinson:

This acknowledges the Notice of Proof of ~~Official~~ Use under Permit No. 25086. Final Proof is to be made before O. T. Jones, as Notary, on the 29th day of September, at 11:00 A. M., at Arco, Idaho.

As of this date we have mailed the Notice to the Arco Advertiser, with instructions to publish it once a week for four consecutive weeks prior to the date set for final proof and then to mail the Affidavit of Publication and statement of costs to you.

It is important that the enclosed depositions be executed by the permit holder and his two disinterested witnesses, who are familiar with the terms of the permit and the work done thereunder, at the time, on the date and before Mr. O. T. Jones, as Notary, as stated in the publication notice. It is very important and necessary that each question be answered in detail.

In returning the depositions to this office, be sure that all copies have been signed, that your Notary's Seal has been placed on each and that all depositions (Holder and two witnesses) are being returned. Also be sure to enclose the Affidavit of Publication.

Very truly yours,

GEO. N. CARTER

RE: Permit No. 25086

Date June 1, 1958

S. W. Parkinson
Arco, Idaho

Dear Sir:

The date for proof of application of water to beneficial use, as set out under the terms of Permit No. 25086 is due not later than August 7, 1958. If by this date you are not prepared to make this proof, you may make it at a later date, however, your priority will be advanced the same length of time for which the proof is late.

Before this proof can be made, the statutory requirement is that a notice of your intention of proof be published once a week for four consecutive weeks in a newspaper within the county.

We enclosed Form 10, in duplicate, which is to be filled out and returned to this department at least forty (40) days before the above mentioned date or before the time you intend to make proof. This form, filled out in duplicate, is to include the time of day, the date (allowing for four weeks publication), the name of the town, the address of the place where the depositions will be executed, and, the name of the notary public before whom you will appear to make the depositions of proof (this may be at any place that is convenient for you and your two witnesses), the quantity of water filed on, for what purpose it is used, the point or points of diversion and the location of use or lands which are irrigated--all by legal land description.

Also enclosed is Form 11, which is the authorization for us to have the notice published in the designated county newspaper, at your expense. This is to be returned with Forms 10.

At the time we send the notice to the newspaper, we will also send to you the forms for the depositions of holder and two disinterested witnesses. It is important that the depositions be executed at the time, on the date set, at the place named and before the notary public, as advertised in the publication notice.

INSTRUCTIONS
PROOF OF COMPLETION OF WORKS

Boise, Idaho

Mr. S.W. Parkinson
Arco, Idaho

Dear Sir:-

Under the terms of your permit No. 25086 you are required to complete your diversion works on or before August 7, 1957. I enclose herewith blank affidavit to be filled out, sworn to by you before a Notary Public or a Justice of the Peace, and returned to this office on or before the above date, or within ten days thereafter, for the purpose of making proof of completion under the permit. Upon receipt of this affidavit in this office, provided the same satisfactorily shows the completion of the works substantially in accordance with the terms of the permit, together with a fee of \$5.00, a Certificate of Completion will be issued to you.

The certificate to be issued under this proof will not give a perpetual right to the use of water for which application was made, as it only confirms the completion of works of a capacity to divert and convey to the place of intended use a certain amount of water. The law requires that another proof be submitted when the water has been fully applied to a beneficial use, at which time license is issued for the amount of water actually in use. Information in regard to this last proof will be furnished on request.

Yours truly,

Dear Mr. Parkinson:

We have reviewed your application for permit after receiving your letter of July 30 and can come to no other conclusion than that expressed in our letter of June 30 in which we stated that the application could be approved for 60 Miner's inches or the difference between the 160 inches applied for and the 100 inches now decreed to the 160 acres.

If there are no appropriators below your proposed point of diversion, no one could object to your diverting by pump as much water as was necessary in conjunction to water delivered under your 1896 right for the proper irrigation of your 160 acres.

Please inform us within 60 days from June 29 whether we should approve your application for 60 Miner's inches or return it to you.

Dear Mr Kulp-:

In reply to your letter addressed to me on June 30 1954, the point of diversion for the 100 inches of water now decreed to my place is the ARCO DIVERSION on Big Lost River above Arco, the Water I am filing on is rising water that raises below the said Arco diversion, and goes to waste in the Arco Desert.

Now that the old headings below the Arco diversion have been discontinued, and all of the Decreed water and Storage must be delivered through the Munsey ditch which is very much overloaded, I am asking for this water as a supplementary water right to what I already have, and the proposed water is Rising Water as stated before and is continually going to waste.

Now if the old headings could be re-enstated perhaps our delivery would be much better, how-ever for the past seven years this water has been at all times going to waste, I will await your consideration in this matter, and will appreciate the full amt ask for

if you can grant it under the circumstances.

Would you please send to me the necessary blanks to file on water from river or well pumping.

The river runs through my place and there is no water taken out below me and the water is just going on the desert and sinks. I can make good use of it on my farm by pumping it about fifteen feet on highest point and about five feet on lower land.

If the water gets too low, I could put a well down and always have water.
