Dear Mr. Quist

Statutes requires a field inspection in connection with the proofs on Permit # 19929 before license and certificate of water right can be issued.

Such inspection and report on same is required for any and all permits being brought to license within this State.

Mr. Darrell Stevenson,
~~Assistant~~ Engineer from this Department requests that you or someone familiar with the terms of the permit and representing you be prepared to accompany him on the inspection, on Tuesday

August 19, 1958.

If he cannot get in touch with you by phone or otherwise he will drive to the well location or point of diversion given in the permit.

Dear Mr Kulp:

It appears that the error was made in the description for location of well, in the final proof papers. The Well is actually located on the SW $\frac{1}{4}$ of NW $\frac{1}{4}$ of Section 8, Township 3 North, Range 27 E. B. M. as described in the original papers.

Please use this letter for your record or send me the necessary affidavit to sign to make the adjustment.

Will appreciate proof of beneficial use being completed at this time for lands as located in Section 8 and defer the application for proof of use of water in Section 17.

Enclosed are two Affidavits as requested one signed by Blaine A. Quist and the other by I. W. Boyer,

Trust this will be satisfactory to your Office.

Re: Permit No. 19929

Mr. Blaine A. Quist
Rt. # 1, Box 25
Arco, Idaho

Dear Mr. Quist:

This will acknowledge receipt of the Proof of Application of Water to Beneficial Use in connection with the above stated permit.

We observe under said proof that you state that the well is located in the NW $\frac{1}{4}$ of the NW $\frac{1}{4}$ of Section 8, Township 3 North, Range 27 East. Your original permit states that the well is located in the SW $\frac{1}{4}$ of the NW $\frac{1}{4}$ of Section 8. Therefore we are enclosing herewith an amendment form changing the point of diversion o the location of the well from the SW $\frac{1}{4}$ of the NW $\frac{1}{4}$ of Section 8 to the NW $\frac{1}{4}$ of the NW $\frac{1}{4}$ of Section 8.

We also note under Question six (c) of your proof of application of water to beneficial use which states as follows; "115 acres in Fr. of W $\frac{1}{2}$ of Section 8, Township 3 North, of Range 27 East, and 140 acres in the S $\frac{1}{2}$ of Section 17, Township 3 North, Range 27 East." You also state under answer to the same question No. () as follows; " Portion in Section 8 having been irrigated, the portion in Section 17 not improved to date for actual cultivation".

Providing you haven't put the water to beneficial use on the land described in Section 17, it will be impossible for us to give you any water right for Section 17 at this time. You may have the preference of withdrawing your proof of application of water to beneficial use at this time and make said proof at a later date after you get the lands in Section 17 irrigated or the water applied to beneficial use, or a license can be issued for the land that is now under cultivation from said well and later on after you have received your license, you can apply for a transfer of water, transferring the water from the land in Section 8 to all of your land covering the lands in Section 17.

19924

Mr. Blaine A. Quist

-2-

October 11, 1957

Another thing that we observed in the proof is that you were to have your depositions signed on the 27th day of September, 1957 before I. W. Boyer on the date that was set in the publication notice. We see that you did not make your proofs until the 8th day of October, 1957. Therefore it will be necessary for you to furnish this department with an affidavit stating why you did not make your proofs on the date set in the publication notice, and also it will be necessary for Mr. Boyer to make a statement in an affidavit form stating that his office was open on the 27th day of September and that no parties appeared to object or protest to making proof of beneficial use.

We are enclosing Mr. Boyer's statement which will be acceptable to this office, providing his signature be notarized and returned to this department.

Kin ly furnish this department with the two affidavits requested, then we will be in position to grant you a license after an inspection has been made by our field engineer.

PROOF OF COMPLETION OF WORKS

Mr. Blaine A. Quist

Boise, Idaho **July 2, 1951**

Arco, Idaho

Dear Sir:-

Under the terms of your Permit No. 19929..... you are required to complete your diversion works on or before September 30, 1951..... I enclose herewith blank affidavit to be filled out, sworn to by you before a Notary Public or a Justice of the Peace, and returned to this office on or before the above date, or within ten days thereafter, for the purpose of making proof of completion under the permit. Upon receipt of this affidavit in this office, provided the same satisfactorily shows the completion of the works substantially in accordance with the terms of the permit, together with a fee of \$5.00, a Certificate of Completion will be issued to you.

The certificate to be issued under this proof will not give a perpetual right to the use of water for which application was made, as it only confirms the completion of works of a capacity to divert and convey to the place of intended use a certain amount of water. The law requires that another proof be submitted when the water has been fully applied to a beneficial use, at which time license is issued for the amount of water actually in use. Information in regard to this last proof will be furnished on request.

Dear Mr. Quist:

The Department of Reclamation would have no objection to a filing for domestic purposes 600 feet from the well sire under Permit No. 19929.

Permits are issued only for unappropriated public water, and do not guarantee that there is any public water present, nor that withdrawal will not interfere with existing rights. Interference, if it develops, would have to be settled by the appropriators.

Boise, Idaho

Dear Sir:

I desire to file on underground water, with the intention to pump for irrigation, on 160 acres that has one inch per acre surface filing. This natural flow right is often inadequate under existing conditions.

Can you tell me what possibilities the law provides in this situation? And please forward the forms I will need to make an application.

Very truly yours,

Blaine A. Quist
