Comment: Special Administration Areas : Eastern Snake Plain Aquifer

Exempt: Y

Reason: Non-Consumptive Use

Doc Attached:

Explanation: Municipal use

2. jstanton 10/7/2004 4:33:32 PM Additional Information Supporting Application

Comment: Residency affidavit for hydropower development: N/A

Additional hydropower project information: N/A

Additional fish propagation project information: N/A

Appropriation Rule 40.05.c information: N/A

Mitigation Plan or acceptance form: N/A

Evidence of Pre-1987 development: N/A

3. jstanton 10/7/2004 Comment/Analysis

Comment: The applicant originally had one well just outside the NW corner of their service area, licensed as 37-7766. They recently drilled a second well further south, but it turned out to be a poor producer. So they drilled a test well near the middle of the system and got a really good hole. So they have filed a new app to cover the original well and the newest one. They also filed a transfer to add the newest well to the system. They also have another permit that needs to be amended to add the new hole. The application appears to be approvable with standard conditions (no large irrigated areas not associated with a home, etc.).

4. jstanton 10/7/2004 Legal Notice Remarks

Comment: This application covers the original Carey city well plus a new well that was recently drilled near the center of the service area and one block east of of Hwy. 75. There is excess pumping capacity in the new well, so additional flow is being requested to cover increasing water needs within the service area.
