Please print or type. Attach pages with additional information. Instructions are included at the end of this form.
 Incomplete forms will be returned.

1. Please list the water right number(s) and/or adjudication claim number(s) (if any) for each water right to be changed. List just the adjudication claim number if there is no corresponding water right record on file with the department. Indicate, by checking in the space provided (under the "split" heading), if the change in ownership is limited to a portion of a water right in which case a division of the existing water right or adjudication claim record will be required.

2. The following **REQUIRED** information must be submitted with this form:

- A. The appropriate **FILING FEE**. See instructions for fee amounts. *#25 fee per Dan Nelson*
- B. A copy of the most recent **DEED, TITLE POLICY, CONTRACT OF SALE** or other legal document indicating your ownership of the property and water right(s) or claim(s) in question, **WITH ATTACHED LEGAL DESCRIPTION**.
- C. Either of the following (if necessary to clarify division of water rights or other complex property descriptions):
PLAT OF PROPERTY or **SURVEY MAP** clearly showing the location of the point(s) of diversion and place of use of your water right(s) and/or adjudication claim(s) (these are usually attached to your deed or on file with the county).

OR

If your water right(s) and/or adjudication claim(s) is for ten or more acres of irrigation, you must submit a USDA Farm Service Agency **AERIAL PHOTO** with the irrigated acres outlined and point(s) of diversion clearly marked. The **AERIAL PHOTO** should be submitted in place of the **PLAT OF PROPERTY** or **SURVEY MAP**.

6. **If the change in ownership affects the entire water right for each water right or adjudication claim number listed in item 1, THEN SKIP THIS ITEM AND GO TO ITEM 7.** If the change in ownership divides the water right(s) among multiple owners, you must describe, in detail, your portion of each water right after the change. Fill in the appropriate spaces in the box(es) below to describe your water right(s) after the change (one water right per box, you may copy this page as necessary). If your quantity of water is greater than a proportionate split, you must attach documentation to show justification for a larger amount. If you are not sure how to identify your portion of the original water right or adjudication claim records, please contact the nearest IDWR office for assistance.

WELL AND WATER EASEMENT

THIS AGREEMENT, dated this 14th day of February, 2000, by and between the NORMA ETHINGTON TRUST, NORMA ETHINGTON, Trustee, hereinafter known as Grantor, and DEON M. ETHINGTON and TONJA L. ETHINGTON, of 24654 Boehner Road, Wilder, Canyon County, State of Idaho, 83676, hereinafter known as Grantees.

That there is located upon the real property of the Grantor, a description of which is marked Exhibit "A" attached hereto and by this reference incorporated herein as though in full verbatim, a free-flowing artesian spring which provides domestic water to the Grantees' real property, a description of which is marked Exhibit "B" attached hereto and by this reference incorporated herein as though in full verbatim. That this Agreement is executed to grant unto the Grantees water for the domestic use on Grantees' property. Said spring or "well" shall hereinafter be referred to as "the water system."

That said water system , together with all improvements, equipment and distribution lines is located upon the Grantor's property.

In consideration of the mutual benefits and other goods and valuable consideration, the parties hereby mutually covenant and agree to the following:

1. Grantor, and to the extent applicable, Grantees, will not create or suffer the creation on their respective parcels, within

ONE HUNDRED (100) FEET of said well, or within such other distance as required by any local regulatory authority, any potential source of contamination, including but not limited to: cesspools, septic systems, drain fields, any type of garbage or any other consideration or thing which could be a source of contamination to said system. Excluded from this item are domestic animals or livestock which may graze around the said system.

2. Grantee shall be soley responsible for the construction and maintenance of a fence, to be no greater than TWENTY (20) FEET from said well, for the specific purpose of preventing livestock from access to the well.

3. Grantor does hereby grant and convey to the Grantees an easement over, across, under and through Grantor's real property for the purposes of ingress, egress, access and "working space" in order that the System can be maintained, operated, improved, inspected, tested, and any other operation necessary to maintain said system and permit the continual operation of the System. Said EASEMENT for maintenance is attached hereto as Exhibit "C" and by this reference incorporated herein as though in full verbatim.

4. Grantor does hereby grant and convey to the Grantees an easement of FIFTEEN (15) FEET around said Well for the purposes of ingress, egress, access and "working space" in order that the Well itself can be maintained, operated, improved, inspected, tested, and any other operation necessary to maintain said well and permit its continual operation. Said EASEMENT for maintenance to the Well

itself is attached hereto as Exhibit "D" and by this reference incorporated herein as though in full verbatim.

5. No party hereto, whether or not said party uses or needs to use the Well and System, shall suffer anything to impair or interfere with an adequate and continuous supply of potable water to each parcel served by the Well and System. No additional parcels or living units may be added to the System without first obtaining the express written consent of all parties to this Agreement, and without first obtaining any permits which may be required by any local regulatory authority.

6. Each party to this Agreement is to be solely responsible for their own individual equipment, improvements and distribution lines which are currently in place or which may be installed hereafter to guarantee the continual flow of water to their parcel.

7. The following is a list of items which are to be individually born by each party, including but not limited to:

- (a) Any individual pump, pressure tank, and any and all connections from the well to each individual's parcel:
- (b) Any and all testing or inspection costs which may be performed by a loan company or undertaken by an individual party solely for that individual's benefit.
- (c) Any maintenance, repair, replacement or improvements which are confined to an individual party's own parcel, including but not limited to corrections or repairs of an emergency nature occurring when a party's own parcel is occupied. Said party is required to act promptly in any such emergency.
- (d) All parties to this Agreement specifically acknowledge that the present PUMP and all equipment located in said WELL is the property of the Grantees.

8. Each party hereto shall promptly pay individual costs as the same become due and payable. Any and all such costs are the personal obligation of the Party which incurs them, and the applicable parcel of land shall be subject to lien or liens to secure payment thereof.

9. In the case on individual costs incurred by any non-paying party, and in the event of any other party actual or threatened liability or loss of use of the Well or System as a result of a non-paying party or parties, said party may make written demand on the non-paying party or parties, advising that, to the extent the non-paying party or parties fail to indemnify and hold harmless, the demanding party shall have the rights as set forth in Paragraph 8 above. In the event that any liens are perfected and or foreclosed upon a defaulting party according to the laws of the State of Idaho, the prevailing party shall be entitled to recover his or her costs and fees, including reasonable attorney's fees, and other costs or fees which may be awarded by any Court which has jurisdiction over the same.

10. In the event that the current well is unable to produce a flow of water capable of supplying all of the parties involved, it will be the sole and specific responsibility of each respective party to install a new well on their own respective parcels of real property. Once this becomes necessary, this Agreement shall terminate and all rights of the respective parties shall hereby terminate.

11. This Agreement shall automatically terminate at such time as the parcels of real estate are acceptably connected to a Public Water System. Regardless of this, this Agreement shall specifically continue in force to the extent necessary to perform its specific functions.

12. This Agreement shall benefit and enure the Heirs, successors and assigns of the parties hereto, and shall be recorded in the records of Canyon County, State of Idaho. The covenants contained herein shall run with the land and are binding on all who have or will acquire any right, title and interest in the above-described real property parcels, or any part thereof, and will incur to the benefit of each respective owner thereof.

13. No amendment to this Agreement shall be effective without the express written consent of all parties involved.

14. This Agreement is constructed according to the laws of the State of Idaho. Any portion hereof which may be found invalid shall not affect the validity of any other portion of the remainder. This Agreement shall be enforced to the fullest extent thereof to achieve the intentions and tenements specifically set forth herein.
