Re: Evaluation of Sufficiency of Information Submitted

This transfer, filed in the name of John B and Cathy Spratling, proposes modifying the place of use of seven rights that were involved in recently approved transfer 71124. The proposed change in place of use is a change in the location of a new pivot proposed by transfer 71124. The applicants ran into problems developing this proposed pivot, and desire to move it to another part of their farm, thus the need for this transfer (71593). The application should be fairly straightforward, and only results in a modification of the previously approved transfer (71124).

- **Authority to File:**
Applicant(s) listed as current owner(s) on IDWR records.
- **Water Right Validity:**
Rights have been recently decreed in the SRBA and were recently involved in another approved transfer (71124).
- **Injury to Other Water Rights:**
None anticipated. No changes in diversion points, only a change in place of use. Water will be used in same general area as currently allowed.
- **Enlargement of Use:**
None if appropriate conditions and limits are implemented.
- **Local Public Interest:**
No negative impacts anticipated.
- **Beneficial Use/Conservation of Water Resources:**
Proposed use is recognized as beneficial use of water and sprinklers are used for irrigation.

Review of the application finds there is no clear inconsistency with criteria set forth in Section 42-222 Idaho Code preventing processing of this application.
