

MEMORANDUM

Date: September 14, 2004
To: Transfer 71087 File
From: Jeanie Robertson
Re: Evaluation of Sufficiency of Information Submitted

Transfer proposes abandoning the well in the SWSWSW of Section 18, T12S, R22E and drilling a new replacement well in the NESW of Section 9, T12S, R22E. Nine of the rights (all except 45-7439A) were recommended with 8 points of diversion. 45-7439A was recommended with only one pod, in the NWNE of Section 24, T12S, R21E. The recommendations for the other nine rights included this pod also, but in the NENWNE. (In Arcview, where the pods were GPS'd, this pod in Section 24 is actually better described as in the NWNWNE, so I have made this change in the transfer approval for all of the rights.)

This well in Section 24 is located in the West Oakley Fan CGWA while the other seven wells are located across the road in the Oakley Kenyon CGWA. Doug recommended this right (as claimed) with only the one pod but the transfer proposes to add all the wells to this right. I have added two extra conditions on all the rights to subordinate this right and the well to prevent possible injury.

- **Authority to File:**
Applicants listed as current owners on Department records &/or tax notices.
- **Water Right Validity:**
Rights have recently been recommended in the SRBA by Doug Jones
- **Injury to Other Water Rights:**
None anticipated. The change in the pod is for the same pods as recommended.
- **Enlargement of Use:**
None apparent. Proposed acre limits for the irrigation rights were determined by SRBA review.
- **Local Public Interest:**
No negative impacts anticipated.
- **Beneficial Use/Conservation of Water Resources:**
Proposed water use is recognized as beneficial use of water and changing the pod should have no apparent impact.

Review of the application finds there is no clear inconsistency with criteria set forth in Section 42-222 Idaho Code preventing processing of this application.
