RE: Application for Permit 15-7260

Date: August 13, 2004

.....

This application was received in our office today. In preparing the permit I noticed that the 40 acre-tract is in error. The application says the point of diversion and place of use are located in the SESE, Sec. 10 but when I went into arc view to GIS the shapes, I found the point of diversion and place of use should be located in SWSE, Sec. 10.

I called your office to discuss with Dennis, Sharla or Roger but none of you were available so I am returning the application to you for correction and re-advertising. Kay

Dennis,
Thanks for offering to take
another look at this one.
