10. Remarks:

This application covers the difference between the licensed flow rate and the present flow rate of this system. Right 45-7333 covers the original well and land, but a few less acres are irrigated. A deeper replacement well was drill near the original well in 1992. The licensed volume has not been exceeded despite the higher pumping rate. The application has been corrected 11-7-03 to agree with SRBA recommendations.
