3. jstanton 4/24/2002 Initial Review
Comment: Application ties 2 adjacent farms together as recommended in SRBA. Director Report just came out, so I did not review the place of use. However, the recommended pod for the west well is not on the Neddo property. I visited this well, and took GPS readings. The well is 5-10 feet north of the property line, and the applicant only owns the north half of this tract. Rather than argue with the SRBA findings, the transfer just corrects this error; since there is no physical change in the location, this is not listed as a pod change on the application (& it is still in the same 40). Recommend transfer be approved with standard conditions. Since the claimed/recommended water from Raft River never reaches this property except in wild flooding (if ever), these rights are not included in the transfer.
