43-2322	NO	NO	YES	YES	NO	NO

Describe the reason for the proposed changes

Recognize existing ppu that was not recognized in the SRBA. The two wells and farms have been tied together for a long time by various methods. System operation and irrigated land will not change as a result of this transfer. Raft River water is also recommended for this land, but cannot be diverted onto this property due to lack of conveyance works. Transfer corrects legal description of the west well to land in the NE/SE Sec. 30 that we own.

4. FOR CHANGES IN NATURE OF USE ONLY

A. Describe the expected quantity of the return flows and location of discharge after the proposed change

B. Describe the effects on other water uses resulting from the proposed change

3. jstanton 4/24/2002 Initial Review

Comment: Application ties 2 adjacent farms together as recommended in SRBA. Director Report just came out, so I did not review the place of use. However, the recommended pod for the west well is not on the Neddo property. I visited this well, and took GPS readings. The well is 5-10 feet north of the property line, and the applicant only owns the north half of this tract. Rather than argue with the SRBA findings, the transfer just corrects this error; since there is no physical change in the location, this is not listed as a pod change on the application (& it is still in the same 40). Recommend transfer be approved with standard conditions. Since the claimed/recommended water from Raft River never reaches this property except in wild flooding (if ever), these rights are not included in the transfer.
