

MEMORANDUM

Date: September 22, 2004
To: Transfer 69270
From: ameritt
Re: recommendation and comments about watermaster comments

This transfer has been reviewed and processed in parallel with the state office. The application was originally protested but the protest has been resolved. After the sufficiency memo was created watermaster comments were received that point to potential or suspected delivery problems if the transfer is approved and not used as requested by the applicant. For this reason the watermaster opposes approval. Although the watermasters suspicions may be well founded it does not in my opinion justify denial of the transfer but it does warrant monitoring by the watermaster an appropriate regulation or enforcement action taken if in fact use of the transferred rights are not in accordance with an approved transfer. I recommend approval of the transfer as drafted.
