Re: Evaluation of Sufficiency of Information Submitted

Transfer 71217 proposes changing the pod of water right 37-21175 to a new proposed well on the applicants property for the irrigation of their 20 acres. This water right was already split from 37-20412 via an ownership change

20 acres. This water right was already split from 37-20412 via an ownership change so the transfer requires no split.

- Authority to File:

Applicants have provided a Quitclaim Deed from the sellers for the water right appurtenant to the property and also tax receipts for 2003 to show ownership of the property. They have also provided a letter from First Bank of Idaho, the lien holder, agreeing to the change.

- Water Right Validity:

Right has an active recommendation in the SRBA, decrees have not been issued in this area for irrigation rights.

- Injury to Other Water Rights:

None anticipated. Water right 37-21175 will be moved to a new well approximately ¼ mile south of the existing well.

- Enlargement of Use:

None if appropriate conditions and limits are implemented.

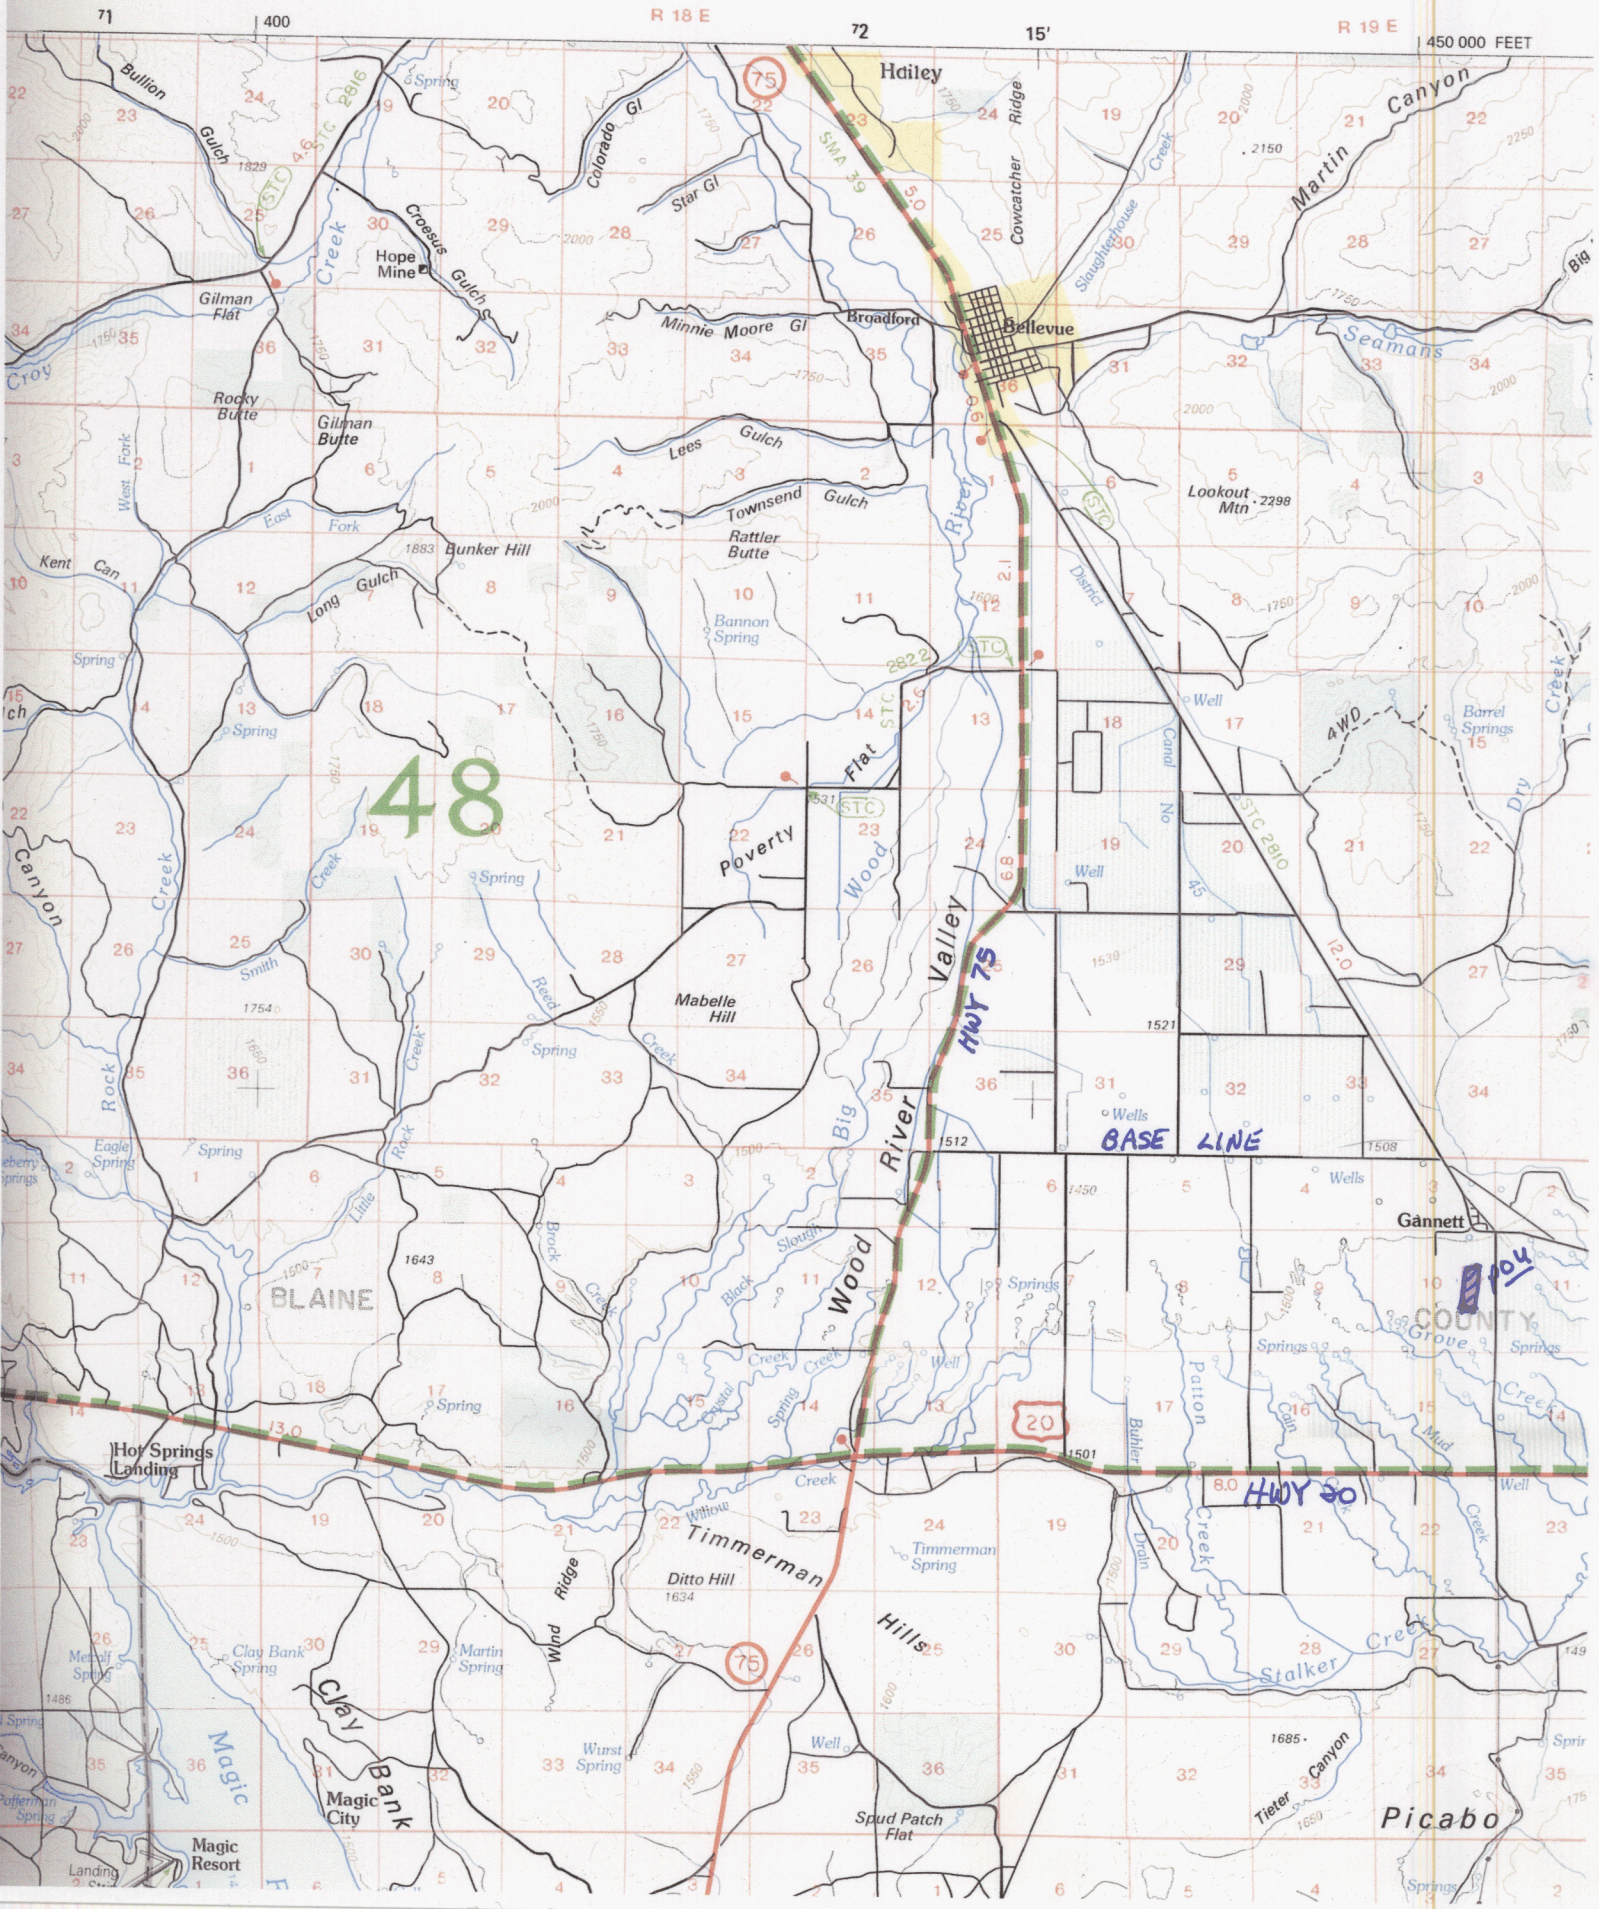

- Local Public Interest:

No negative impacts anticipated.

- Beneficial Use/Conservation of Water Resources:

Proposed use is recognized as beneficial use of water and sprinklers are used for irrigation.

Review of the application finds there is no clear inconsistency with criteria set forth in Section 42-222 Idaho Code preventing processing of this application.
