Re: Elizabeth Halter Transfer Application

Dear Mr. Foster,

Thank-you for submitting the above referenced transfer application. In order to continue to process, there is some additional information required. This includes the following:

1. Map clarification,
We require the actual location of the proposed pond relative to the recommended area of the water right. Sufficient detail is required that it can be input as a shape into our GIS program. Please mark up the enclosed layout and return.
Location of the remaining irrigated acreage. Do we just leave the shape for the irrigated area in the same location and subtract out for the Pond or is the irrigated areas planned to be changed?
2. Proof of ownership. This may be in the form of warranty deed, tax notice, or other.
3. What was the nature of the irrigated crop prior to this transfer? In order to consider the pond, we need to consider what was irrigated in that location prior.

For your convenience, I have included two map/layouts based upon infrared aerial photography. Please mark these maps accordingly and return to my attention. Also please check that the point of diversion is correct as it appear that the water inlet and outlet are towards the Snake River whereas the water right claims Burton Ditch/Burton Springs

If you should have any questions, please feel free to call.

Sincerely,

W. Roger Warner
Water Right Supervisor – Eastern Region
