Subject: Fox Creek Water System

Dear Sirs,

The Fox Creek Country Club Estates Property Owners Association Board of Directors have decided to protest against the approval of the Application of Water Rights submitted by Tom Hunter using the name of the association. The Board explains this protest by the fact that the association does not own the water system, or the lot where the replacement well will be drilled. The Board has also decided that Mr. Hunter has to build the water system, has to get it approved by DEQ and then, and never before that, the association will take over the system, by phases as they are completed. The Board decided that the association is NOT going to assist Tom Hunter to get financing from any source. Mr. Hunter has to find the way to build the system by his own means. The Board is requesting that DEQ moves forward the enforcing phase of the process that deals with Mr. Hunter and his lack of compliance with state laws.

The Board is disappointed by the lack of willingness shown by DEQ to enforce state laws and forcefully pursue all means necessary to compel Mr. Hunter to build the water system. The Board calls for DEQ to get the job done.

Sincerely
Maria Stacy
President and Board member
Fox Creek Country Club Estates Property Owners Association
