CONDITIONS OF APPROVAL AND REMARKS

1. The maximum diversion volume is defined as the maximum allowable volume of water that may be diverted annually from the source under this right. The use of water confirmed by this right is limited to the amount which can actually be beneficially used. The maximum diversion volume may be adjusted to more accurately describe the beneficial use or to implement accepted standards of diversion and use efficiency.
2. This water right is appurtenant to the described place of use.
3. This right is subject to all prior water rights and may be forfeited by five years of non-use.
4. Modifications to or variance from this license must be made within the limits of Section 42-222, Idaho Code, or the applicable Idaho law.
5. Single point of diversion located on or near line between SWNESE and SENESE, S28, T28N, R01W.
6. Domestic use is for 1 home.

E. NARRATIVE/REMARKS/COMMENTS

- No cont. lots were found.
- Use is domestic. D/I drinking water, clean up, & fire protection if needed. Other uses, the overflow pond for wildlife & fire protection if needed.
- The system consists of a spring w/ perforated for a collection area, 268' of 2" PVC to (5') 15" plastic pipe used as a storage tank, 100' 2" PVC to a hydrant, overflow from the storage tank goes into a pond for fire protection if needed & wildlife. The system is totally gravity flow.
- Recommend allowing the domestic D/I .02cfs since a measurement would not be a measurement of the spring, but instead a measurement of the storage tank. Pipeflow Capacity for 2" diameter = .11cfs.
- No other water available.
- No other water rights.
- Only 1 P/D, but on ~~P~~ 1/4 1/4 line between SWNESE & SENESE.

Re: Permit No. 79-07206

Dear Permit Holder:

Returned is the proof of beneficial use you submitted in connection with the above referenced permit. Unfortunately, it is unacceptable as filed.

The Department has determined, from pertinent sections of the Idaho Code, that the permit holder must meet two requirements in order to be exempt from the license exam fee. They are:

1. The water right must use a groundwater source.
2. The rate of diversion must be .04 cfs or less.

As you can see, you do not meet requirement #1 since you use a spring (surface) for your source. Therefore, a license examination fee of \$50 applies to your permit. I have enclosed a copy of the Instructions for the Proof of Beneficial Use for your convenience.

Please return the proof and fee within 30 days of the date of this mailing.

If you have any questions or if I can be of any further assistance, please feel to contact me.

Sincerely,

RE: PERMIT NO. 79-07206

Dear Permit Holder:

Enclosed is a copy of your approved application for permit. We direct your attention to the conditions of approval on the final page.

As a permit owner you must commence the excavation or construction of the diverting works within one year of the date the permit was issued, and you must proceed diligently until the project is completed. The date shown under condition no. 1 is the date when the project must be completed. You will receive a "Proof Due Notice" from this Department approximately 60 days prior to the completion date requiring you to file either a Proof of Beneficial Use form stating that the project has been completed or file a Request for an Extension of Time in which to file the proof statement.
