STATE OF IDAHO
DEPARTMENT OF WATER RESOURCES
CLAIM TO A WATER RIGHT

Under the provisions of Section 42-243, Idaho Code, any person using or claiming rights to the public waters of Idaho established by diversion and application to a beneficial use must file a claim with the Department of Water Resources on or before June 30, 1983. Exempted from this filing are single family domestic uses as defined in Section 42-230(d), Idaho Code. Also exempted are rights represented by a permit, license, decree, adjudicated right, or a previously filed claim.

The filing of this claim does not confirm the water right claimed but failure to file may result in forfeiture of a water right.

Notice is hereby given that U.S.D.I., Bureau of Land Management, Coeur d'Alene District
(Name of Claimant)
1808 North Third, Coeur d'Alene, ID 83814 Telephone No. (208) 765-7356
(Mailing Address) (Zip Code)

claims a right to the diversion and beneficial use of the surface or ground water. The extent and nature of said claim is as follows:

(1) Date of priority: (When was the water first applied to a beneficial use) September 23, 1944

A claim is not acceptable on a ground water source with a priority later than March 25, 1963 or on a surface water source with a priority later than May 20, 1971. An exception is that a claim may be filed on single family domestic use from a ground water source.

(2) Describe the source of water: (Name of stream, lake, spring, etc., or ground water)
Harriman Spring tributary to Getta Creek/Snake River

(3) Describe the purpose for which the water has been used and the time during the year when you have used the right claimed:

Quantity	(cfs, gpd, AFA)	Use (Domestic, Irrigation, Stock, Etc.)	(Both dates inclusive)	
			(Mo., Day)	(Mo., Day)
0.01		Wildlife	1/1	12/31

(4) 0.01 TOTAL QUANTITY USED.
(cfs, gpd, AFA)

(5) A) Point of diversion: (Location of point where water is diverted from its source)
NW ¼ SE ¼, Sec. 23 Twp. 28N. Rge. 1 W. B.M., County of Idaho
Additional points of diversion:

B) Describe means of diversion of water: (Pump and pipeline, well, diversion dam, reservoir, length of ditch and field, etc.). Give sizes and capacities: be as specific as possible. Describe any changes in the system and give the date of the change. The springbox is a wooden box about 18 inches square and 15 inches high with 2 inch outlet piping.

(6) A) Describe location of use by listing number of irrigated acres within each 40-acre tract in appropriate box. If use is not for irrigation, place an "X" in appropriate box to show location.

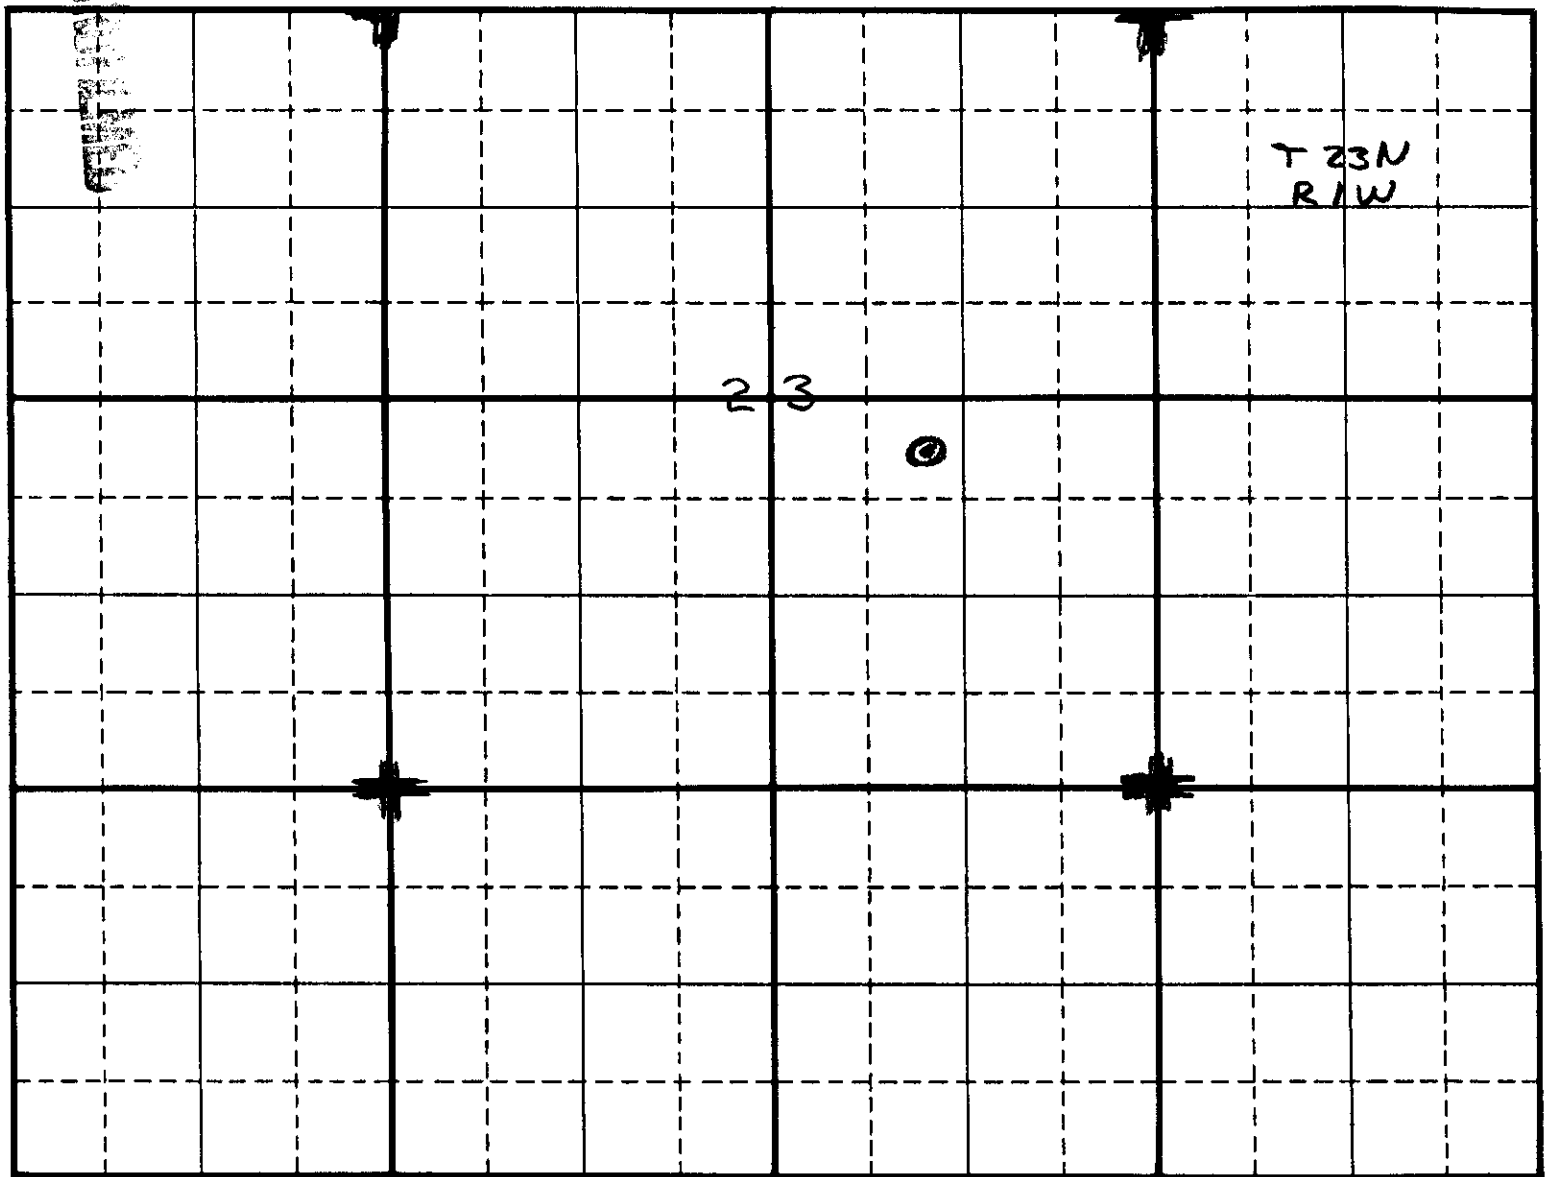

T	R	SEC.	NE¼				NW¼				SW¼				SE¼				TOTAL
			NE¼	NW¼	SW¼	SE¼	NE¼	NW¼	SW¼	SE¼	NE¼	NW¼	SW¼	SE¼	NE¼	NW¼	SW¼	SE¼	
28N	1W	23														X			

No. of acres

B) If water is used for other than irrigation, fully describe that use, being as specific as possible: This spring is used by wildlife year-round in addition to the earlier permit for livestock usage (D-Permit 1004; 79-2100).

NOTE: Include here the type and number of stock watered:
If you are claiming water as a member of an organization, list name of organization: U.S.D.I., BLM

(8) Remarks Applicants include the Bureau of Land Management and the lessee in the Scully Creek allotment. The lessee cooperating in this project includes: Justin and Roscoe Smith of Grangeville, Idaho. Livestock usage was claimed by D-permit.1004 and is IDWR #79-2100. The priority date is based on our grazing files and project report (attached).

Scale: 4 inches equal 1 mile.

Final Report
Idaho Project 11-S
Spring Development
T. 28 N., R. 1 W.,
NW $\frac{1}{4}$ SE $\frac{1}{4}$ Sec. 23

XXXXXXXXXXXX
Range Development Service
714 Spalding Building
Portland, 4, Oregon

February 3, 1945

Approved:

G. P. Howell
Regional Conservationist

The Commissioner,
General Land Office,
Washington, D.C.

Sir:

Submitted herewith is a final report on Idaho Project No. 11-S, which is a spring development on public lands leased to D. L. Harriman, Cottonwood, Idaho, under Section 15 of the Taylor Grazing Act. Mr. Harriman's grazing lease is 013557, Coeur d'Alene Series.

Location: Idaho County, Idaho.

This improvement is located in the NW $\frac{1}{4}$ SE $\frac{1}{4}$ section 23, T. 28 N., R. 1 W., Boise Meridian. The spring bears north 45° 22' west a distance of 2,542 feet from the southeast corner of the above mentioned section 23.

The southeast section corner of section 23 was identified as a rock imbedded in the ground with four blazed witness trees with appropriate markings.

Description of Improvement,

1. Project started; September 20, 1944. Completed September 23, 1944.
2. The spring was developed by excavating the source of the water flow and by placing a wooden head box about eighteen inches square and fifteen inches high in the excavation. The box was built with two inch lumber and the sides of the box, adjacent to the water flow, were bored with sufficient number of holes to permit ingress of the water. The space outside the head box, adjacent to the inlet holes, was backfilled with gravel and rock to eliminate collection of silt and rock dust within the head box and to eliminate plugging of the inlet holes. A two inch wooden cover was placed on top of the head box to keep out debris and to permit cleaning.

POOR QUALITY ORIGINAL

1942 1945

The collected water was then taken out of the box through fifteen feet of two-inch galvanized pipe, laid on solid rock, and delivered into two metal troughs, having a capacity of approximately two hundred thirty gallons. These troughs were semi-cylindrical, the approximate diameter being twenty-nine inches, the length being eight feet, and were connected near the bottom with a galvanized pipe which keeps the water in both troughs level.

A two-inch galvanized overflow pipe twenty feet long carries the excess water to a natural drainageway.

The two metal troughs are held from overturning by six treated cedar posts set securely in the ground and are fastened on either side to wooden stringers which in turn are fastened with lag screws to the above mentioned posts. Wooden supports were placed under the troughs and stringers to give the structure greater stability. A substantial guard was built over the troughs to provide protection from the stock.

After this spring development was completed, the flow of water during December was ascertained to be at the rate of six hundred sixty gallons per twenty-four hours.

3. Water Rights;

Since the water developed originates upon the public domain, and as there are no prior appropriators of record who have put this water to beneficial use, no water filing has been made. In putting this water to beneficial use, the Government's rights thereto should be assured at all times.

4. Benefits;

One operator is directly benefited by this improvement with stock benefited as follows:

	<u>Cattle</u>	<u>Horses</u>
D. L. Harriman	75	8

Acreage benefited as follows;

Lands subject to Section 15 of the Taylor Grazing Act -	320 acres
Deeded lands - - - - -	120 "
Total - - - - -	440 acres

5. Cost of Improvement;

To the Government	1942	1945
<u>Materials;</u>	<u>"S&M"</u>	<u>"S&M"</u>
2 half-round metal troughs, 8' long, 29" diam.	\$61.20	
35 linear feet 2" galvanized pipe - - - - -	12.25	
8-7" round treated cedar posts, 6' long - - -	7.50	
Misc. hdw. and lumber - - - - -	8.79	
Total cost of materials - - -	\$89.74	

1942	1945
"S&M"	"S&M"

7. Total cost of materials - - - - - \$89.74
Labor:
Development of spring - - - - - \$71.00
Total cost to the Government - - - - - \$160.74

There were no contributions on this project.

8. Maintenance Agreement:

The lessee has agreed to maintain the development at his expense and has executed an agreement to that effect, original of which is attached.

RANGE REPORT

1. Status:

Mr. D. L. Harriman's grazing lease, Coeur d'Alene Serial No. 013557, extends for a period of five years beginning March 29, 1943. It includes 1120.0 acres and is under an annual rental of \$56.00.

2. Area:

The area is hilly and mountainous and interspersed by ravines, but is entirely accessible to livestock. The elevation varies with an average elevation of approximately 3500 feet above sea level. The growing season, which generally commences about April 15th, extends until about September 1st. The annual precipitation is approximately twenty-five inches, of which about forty percent is received during the growing season. The soil in general is a clay loam, both deep and shallow, with outcrops of rock.

3. Forage:

<u>Principal Plants</u>	<u>Density</u>	<u>Vigor</u>	<u>Palatability</u>
Wheatgrass	Medium	Medium	Good
Bluegrass	Fair	Fair	Good
Fescue	Fair	Fair	Good
<u>Secondary Plants</u>			
Cheat grass	Medium	Good	Good

4. Erosion:

Sheet and gully erosion is moderate on this range and wind erosion is not noticeable.

5. Watering Places:

The spring located in the NW $\frac{1}{4}$ SE $\frac{1}{4}$ of section 23 has been developed as described previously in this report. Stock can be watered in the SE $\frac{1}{4}$ section 22, T. 28 N., R. 1 W., Boise Meridian.

6. Value for Purposes Other Than Grazing:

There is some scattering timber on this range, but apparently its greatest value is for grazing of domestic livestock.

7. Grazing Value:

Meager information is available relative to the past use of this land. Prior to building of the fences much stray stock drifted over these ranges and prior to developing of the spring in the NW $\frac{1}{4}$ SE $\frac{1}{4}$ section 23, many areas on the long steep slopes were underutilized. At the present time the lessee grazes about seventy-five cattle and eight horses on his range.

8. Conclusions:

This spring development, as described in the foregoing report, is located within an area containing a good stand of forage grasses. This forage was not used much in the past due to deficiency of water. The spring is also located rather low in an area of long and steep slopes. The development will eliminate a great deal of climbing and trailing with resulting damage to the forage and will create better utilization of the pasture and better stock distribution over the range unit.

Respectfully submitted,

George S. Huddleston
Asst. Agricultural Engineer

RE: Claim No. 79-4419

Dear Claimant:

The Department of Water Resources has completed the advertising of your claim to a water right, and no further action is authorized under Section 42-243 and 42-244, IDAHO CODE. Your claim will be retained in our files and will be available at any time for use by you or the court.

The filing and advertising of the claim does not confirm the water right claimed, but will serve to record and preserve the information and the evidence which you included in your claim.

If, at a later date, you find that you have additional information or supporting evidence that you would like to have included with the claim, you may have that information or evidence added at any time. Please refer to the claim identification number when corresponding with this office.

We are enclosing a copy of your claim for your records. If you have questions, or if this office may be of further assistance, please feel free to contact us.

Sincerely,
Yours truly,

DAVID B. SHAM
Western Region Supervisor
