Remarks:

In the year 1905 your applicant began the construction of the ditches shown on the plat accompanying this application and from year to year added thereto and that he has expended in making said ditches and in reclaiming said land about \$650.00. That the water hereby applied for has been in use at this point for about twenty years and that your applicant purchased from prior users their rights. That the said land at the time your applicant purchased said water rights was unsurveyed. That your applicant, in the year 1912 filed in the United States Land Office at Lewiston, Idaho, a desert land entry for said land and that in making proof under said entry he must show title to the water and that the records of the county showing the original water appropriation are so meagre that he desires to secure title through the present law which will be unquestioned by the government. That the work has been completed and the water actually applied for several years on the said land. Your applicant therefore requests early action.

APPLICATION FOR AMENDMENT TO PERMIT
TO APPROPRIATE THE PUBLIC WATERS OF THE STATE OF IDAHO,
NO. 9239.

Comes now Benj. F. Reeves and represents to the State Engineer of the State of Idaho,

That he is the owner and holder of Permit to appropriate the Public Waters of the State of Idaho, No. 9239, and requests that the list of lands to be irrigated, as described in said permit, be changed to read as follows: About fifty acres in irregularly shaped bodies, lying within the SE $\frac{1}{4}$ of SW $\frac{1}{4}$ and SW $\frac{1}{4}$ of SE $\frac{1}{4}$ of Sec.12, and NE $\frac{1}{4}$ of NW $\frac{1}{4}$ and NW $\frac{1}{4}$ of NE $\frac{1}{4}$ of Sec.13, Township 30, North Range 4 West B.M., or more particularly, About 13 acres in the SE $\frac{1}{4}$ of SW $\frac{1}{4}$ Sec.12, About 9 acres in the SW $\frac{1}{4}$ of SE $\frac{1}{4}$ Sec.12, About 18 acres in the NE $\frac{1}{4}$ of NW $\frac{1}{4}$ Sec.13, About 7 acres in the NW $\frac{1}{4}$ of NE $\frac{1}{4}$ Sec.13, making a total of about 47 acres.

That an additional amount of water is not asked for, and that the rights of others will not be adversely affected by such change.

Signed at Lewiston, Idaho, this 20th day of September, 1913.

Ques. 3. Have you read or heard read said Permit No. 9239, and are you familiar with its provisions and conditions?

Ans. Yes.

Ques. 4. State source of water supply, place of diversion, and describe works for conveying water from point of diversion to place of use.

Ans. Waphilla Creek; one point of diversion being from the right hand fork of said creek, located in NW $\frac{1}{4}$ of SE $\frac{1}{4}$ Sec. 12, Tp. 30 N.R. 4 W.B.M., and the other point of diversion being from the left fork of said creek in the SW $\frac{1}{4}$ of SW $\frac{1}{4}$ of Sec. 12, Tp. 30 N.R. 4 W.B.M.

Ques. 5. How many second feet of water do you estimate said works will safely conduct to place of use, and how much water have you seen being so conveyed?

Ans. One cubic foot of water, in high water season.

Ques. 6. State for what purpose water is used and at what place. (If for irrigation, give each subdivision in which water has been used and number of acres irrigated in each subdivision.) State whether cultivated or natural meadow land and the nature of all improvements which have been made as a direct result of said use.
