PROOF OF BENEFICIAL USE

Department of Water Resources

The Idaho Department of Water Resources considers this form a statement that the permit holder(s) has/have completed all development that will occur under this permit and that water has been applied according to the provisions of the permit for the beneficial use(s) described below. This form must be accompanied by a license examination fee, when necessary, or be accompanied by a completed field examination report prepared by a certified water right examiner who has been appointed by the department.

1. Permit No. 78-07340 Telephone No. _____

2. Name(s) of Permit Holder(s): DASHA BELKOVA

3. Mailing Address: PO BOX 88 New Meadows ID 83654

4. Source of Water: SPRINGS If **GROUNDWATER** (well), Date Drilled: mo. _____ / yr. _____

a. Well Driller: _____ Drilling Permit Number: _____ - _____ - _____

b. **OPTIONAL:**
Pump Horsepower: _____ Pressure (psi): _____ Dynamic pumping level (ft): _____

5. Use(s) (as authorized by the water right permit):

Domestic (No. of households): _____ Stockwater (No. and type of stock): _____

Irrigation (No. of acres): _____ Other: _____

6. Total rate of diversion and/or volume for which proof is submitted: _____ cfs OR _____ acre feet

7. Measuring Device Requirement: (refer to the approval conditions on your permit and respond accordingly)

(This question is not optional. Please check either yes or no. Proofs returned not checked accordingly, will be considered incomplete)

Measuring Device: Is a measuring device required? Yes _____ or No _____

Has the measuring device been installed? Yes _____ or No _____

Flow Measurement Port: Is a flow measurement port required? Yes _____ or No _____

Has the measurement port been installed? Yes _____ or No _____

8. Fee Enclosed: \$ 50.- (See Fee Schedule on back of the instructions for filing proof of beneficial use)

9. Person to contact to accompany the Department representative during field examination of the water system.

Name: DASHA BELKOVA Telephone Number: None, for emergency call daughter 208 347 2295

Address: 3000 Fish Lake Rd. New Meadows ID 83654

10. The information given on this form is my true statement of the extent to which the above numbered permit has been developed and I relinquish any undeveloped portion of the permit to the State of Idaho.

Water Right Number: 78-07340

Comment Date: 10/26/1992 User ID: LESTER

Subject: REVISED APPLICATION

Applicant revised application per 10-26-92 office visit to allow .04 cfs & 1.5 afa storage for several small ponds in SWSWNW. The total surface area for the ponds will not exceed 1/2 acre. This should be within the moratorium exemption for Basin 78. Applicant may pursue additional development as conditions warrant. Springs are several (unknown number) within area to be converted into ponds per 10-21-92 site visit by GG & per applicant's information in office visit.

RE: PERMIT NO. 78-07340

Dear Permit Holder:

The department acknowledges receipt of the proof of beneficial use form submitted for the above referenced permit. The next step in the process of developing a water right is for the department to conduct a field examination to determine and confirm the use being made of the water.

Please be advised that Section 42-248, Idaho Code, which became affective on July 1, 1996, requires you or the owner of this water right to maintain current ownership and address records on file with the department. Please contact any office of the department for the proper form to file a change of ownership of a water right and/or a change in the address of the owner. Failure to maintain current records with the department could result in the assessment of a monetary penalty.

If you have questions concerning the field examination, contact the **WESTERN** Regional Office in Boise, at (208)334-2190.

Sincerely,

JULIE L. YARBROUGH
Senior Secretary

PROOF DUE NOTICE

RE: PERMIT NO. 78-07340

Dear Permit Holder:

One of the conditions of approval of the above referenced water permit was that proof of the extent of your beneficial use must be submitted to this office on or before August 1, 1997.

(See last page of your approved permit or your last approved extension request.) Enclosed is a form which when accompanied by the license examination fee or a complete field examination report prepared by a certified water right examiner may be used to submit the required proof.

If you have not fully completed your project, and you or a previous owner of this permit have not received a prior extension of time, you may request an extension of time if the delay is for reasonable cause as provided in Section 42-204, Idaho Code. If you have been prevented from proceeding by a governmental agency or by litigation which might bring title to the water in question, more than one extension of time can be granted. An extension of time request form is enclosed for your convenience.

Either an acceptable proof of beneficial use submittal or an acceptable request for an extension of time must be received by this department on or before the above described proof due date. If neither is received, the department will send you a lapse notice. Within sixty (60) days of the mailing of the lapse notice, the permit will no longer be of any force nor effect.

SINCERELY,

JULIE L. YARBROUGH
Senior Secretary

RE: APPLICATION FOR PERMIT NO. 78-07376

Department of Water Resources

Dear Dasha:

You recently filed the above-referenced application for permit to construct a new pond for wildlife and recreation uses. However, upon reviewing your previous water right filings, I wonder if a new application is necessary. Please review the following information to see if you indeed do need a new water right. The attached map also shows the rights discussed below.

1. Permit No. 78-07340 was filed in 1992 for springs to be developed into small ponds southwest of the creek. Apparently, you recently obtained a reinstatement of this permit to provide more time to complete the project (until August 1, 1997 it appears).
2. Permit No. 78-07347 was filed in 1993 for a pond to be located on Little Creek. Development of this right should be completed by October 1, 1996.
3. Permit No. 78-07364 is a 1994 filing for springs and runoff ("unnamed stream") for two small ponds next to the creek in the general vicinity of the development listed for Permit No. 78-07340. Development under the 1994 permit should be completed by December 1, 1996.

Note that Application for Permit No. 78-07376 that you filed last month appears to cover one pond that is already mentioned in 78-07364. The maps for these two filings show the same exact site.

If you do not intend to develop a third pond at the site shown for Permit No. 78-07364, the new application serves no use and can be withdrawn by completing and returning the attached withdrawal form. You would then receive a \$50 refund. If you do intend to add a third pond at this location, then the application should be processed.

Based on your response within 30 days, I will take the appropriate steps regarding your water right filings.

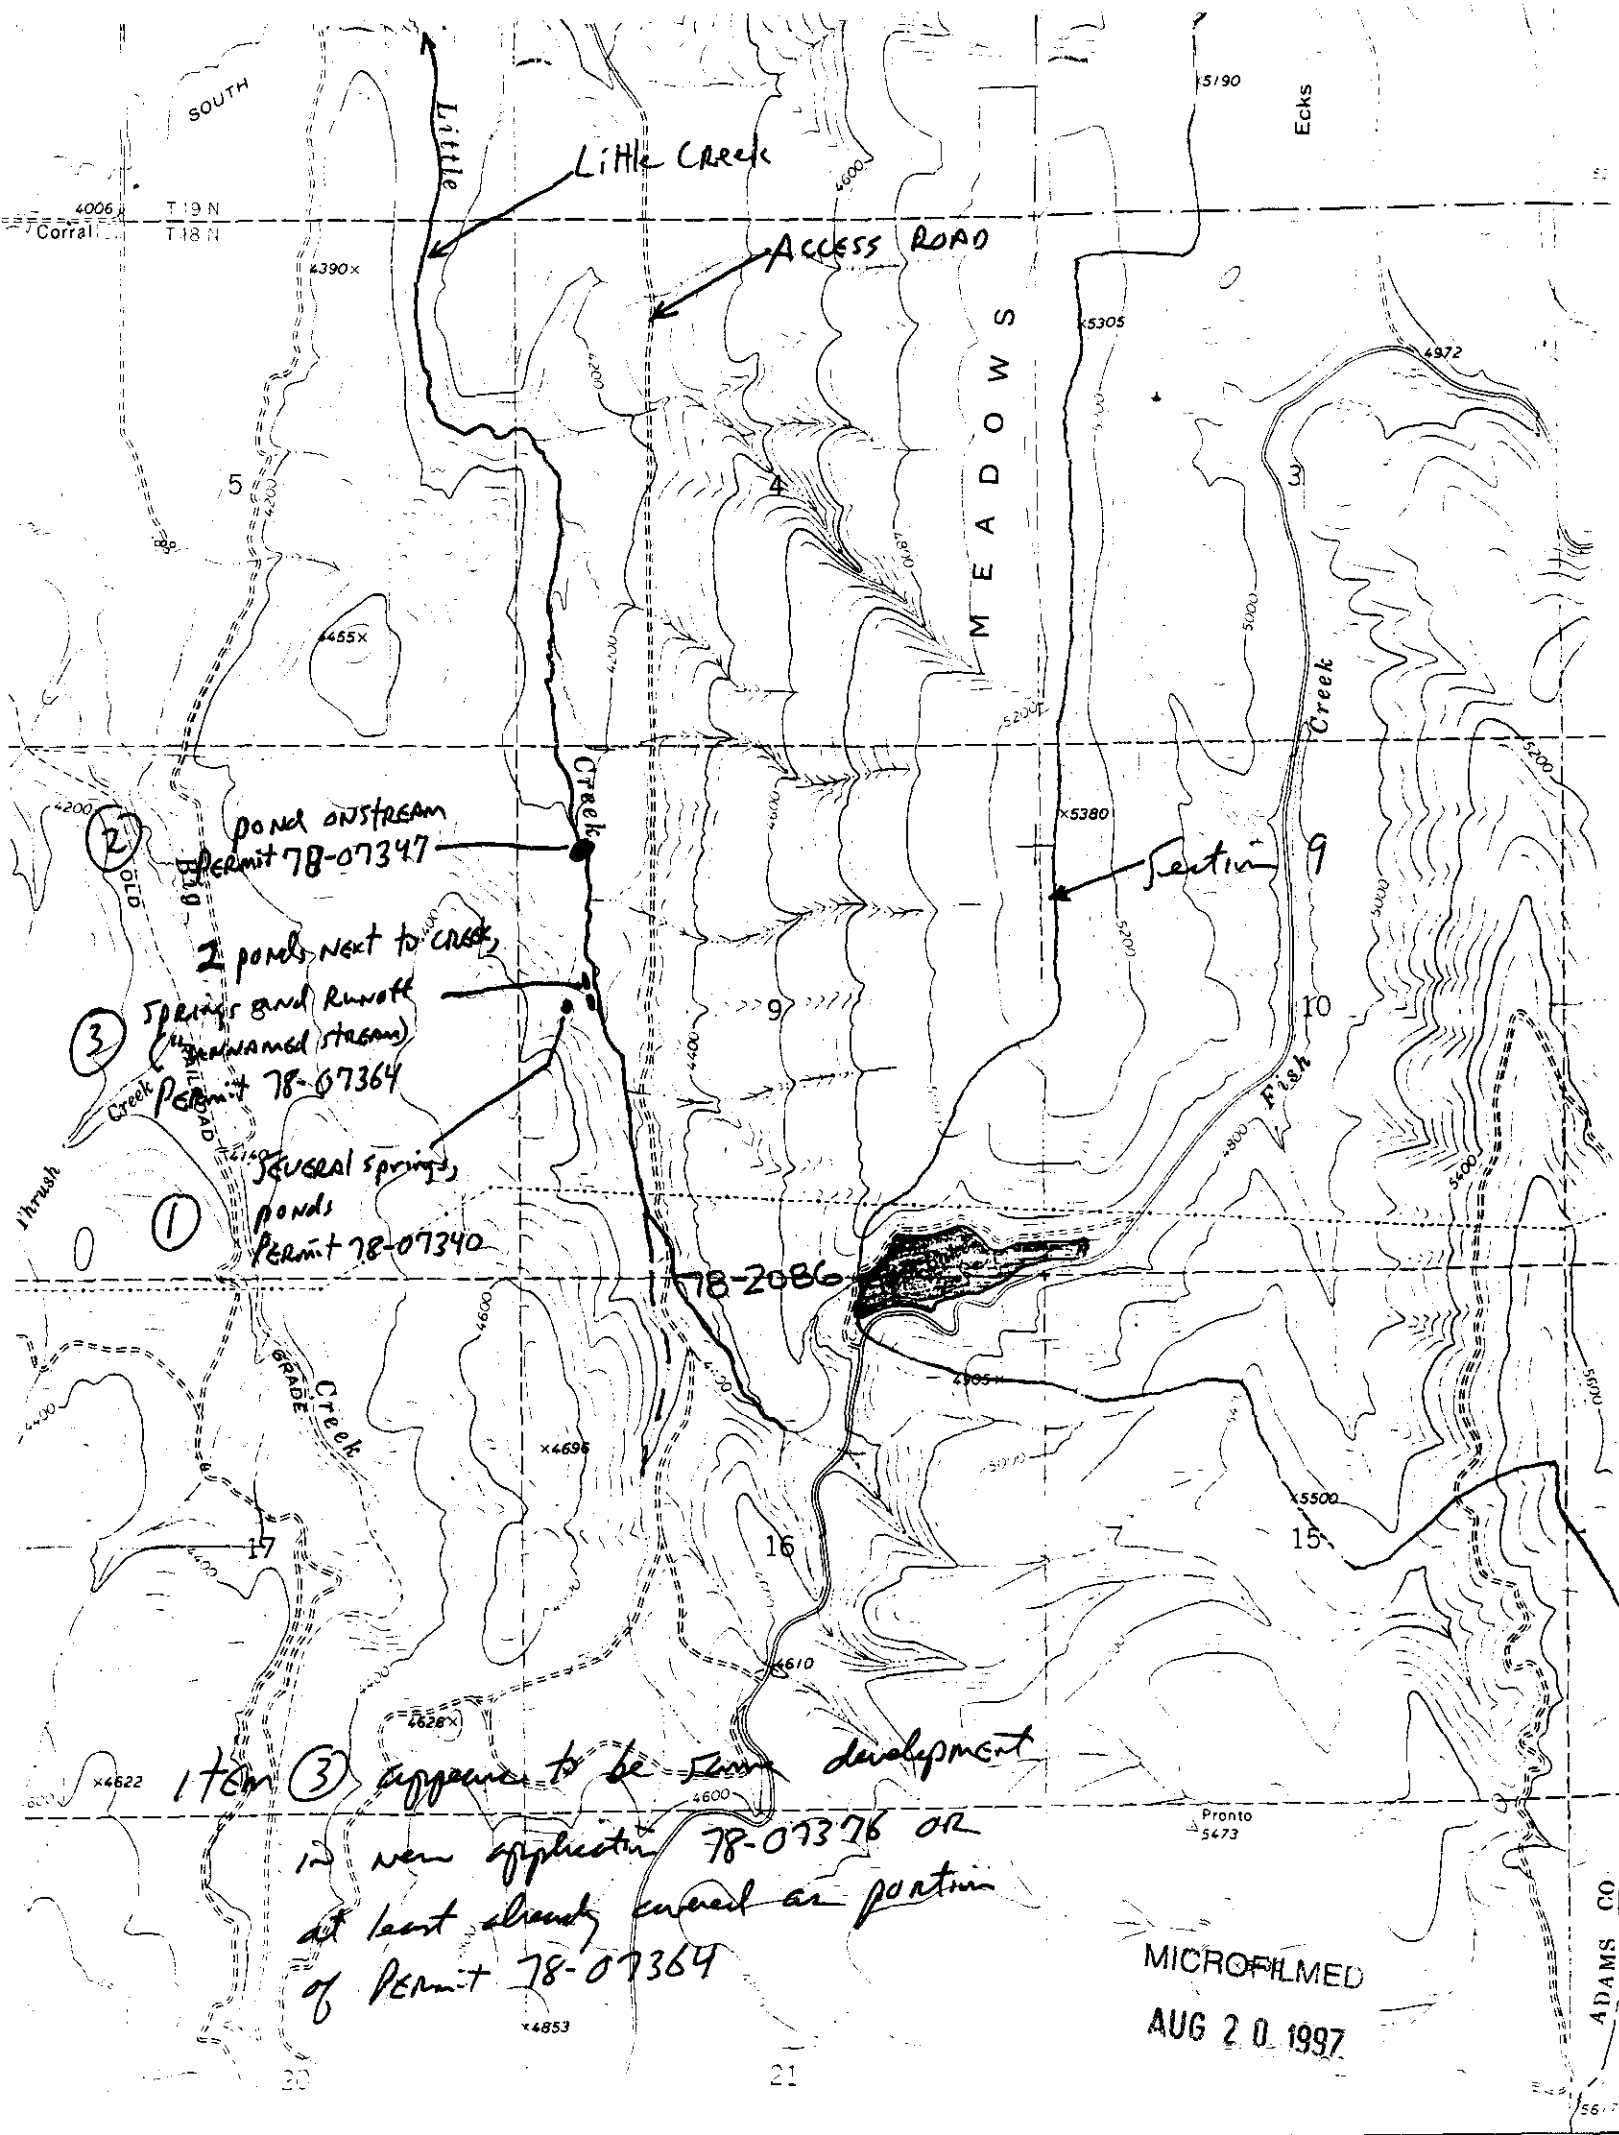

Sincerely,

Steve Lester
Water Rights Supervisor

RE: Permit No. 78-07340

Dear Permit Holder:

Enclosed is a copy of the approved request for extension of time. The time within which to submit proof of beneficial use is extended to **August 1, 1997**. Please note that the department has granted this extension based on due diligence. It is important that you work diligently toward the completion of this project during the construction period allowed. The department will not be able to grant additional requests based on due diligence.

Please be advised that since the extension was received after the proof due date of August 1, 1995, it was necessary for the department to reinstate your permit and advance your priority date to October 8, 1992.

If you have any questions or if I can be of any assistance, please feel free to contact me at (208)327-7900.

Sincerely,

JULIE L. YARBROUGH

LAPSE NOTICE

RE: PERMIT NO. 78-07340

Dear Permit Holder:

You are hereby notified that under the provisions of Section 42-218A, Idaho Code, the above referenced permit has lapsed and is of no further force nor effect. The department provided the proper forms to you in our proof due notice dated May 31, 1995. No further construction or additional development is authorized under this permit unless it is reinstated.

The permit can only be reinstated if you submit an acceptable proof of beneficial use or an acceptable request for extension of time to the department within sixty (60) days of the mailing of this lapse notice. An acceptable proof of beneficial use submittal must include the examination fee or a completed field examination report. A request for extension of time must be accompanied by a fifty dollar (\$50.00) fee.

Enclosed again for your use are a proof of beneficial use form and a request for extension of time form. Please note that only one extension of time can be granted unless the project has not been completed because of lack of a necessary approval by a government agency or by litigation which may bring title to the water in question.

PERMIT APPROVAL NOTICE

RE: PERMIT NO. 78-07340

Dear Permit Holder:

Enclosed is a copy of your approved application for permit. Please be sure to thoroughly review the "CONDITIONS/REMARKS:" listing on the permit.

As a permit owner you must commence the excavation or construction of the diverting works within one year of the date the permit was issued, and you must proceed diligently until the project is completed. The date shown under condition no. 1 is the date when the project must be completed. You will receive a "Proof Due Notice" from this Department approximately 60 days prior to the completion date requiring you to file either a Proof of Beneficial Use form stating that the project has been completed or file a Request for an Extension of Time in which to file the proof statement.

Sincerely,

A handwritten signature in black ink, appearing to read 'Jim Johnson', written over a horizontal line.

RE: Application for Permit No. 78-07340

Dear Mr. Raney:

Attached is a copy of the above-referenced application for permit in the name of Dasha Belkova. Based on your last contact with this office, the applicant was asked to discuss the project with you and have you send your comments to the department. No additional comments have been received from you since that time.

Please review the application and use the enclosed form for your reply. It appears from the application and from Ms. Belkova's comments during several office visits that most of the water for her minor pond will be supplied by excavating an area fed by springs. Water diverted from Little Creek, if any, would be limited to 0.04 cfs or 18 gallons per minute.

This office will proceed in processing the application if a reply is not received within ten days. Please contact me if you have any questions.

Sincerely,

A handwritten signature in cursive script that reads "Steve Lester".

RE: Application for Permit No. 78-07340

Dear Ms. Belkova:

This office recently received a comment letter from the Watermaster of the Big Creek Water District regarding your application for permit to use water from Little Creek and springs tributary to Big Creek. The Watermaster, Mr. Ed Raney, stated that he needed to know more about the proposed project before he could make a favorable recommendation for the application.

Please contact Mr. Raney (New Meadows, Id., 83654) and explain the extent of your project and its probable impacts, or lack of impacts, on water available in Big Creek. This office will hold your application until a written response is received from the Watermaster after he is contacted by you.

Please contact me if you have any questions about this situation.

Sincerely,

Steve Lester
Water Rights Supervisor

Steve Lester
Department of Water Resources
2735 Airport Way
Boise, Idaho 83705-5082

Dear Steve:

Dasha Belkora contacted me and asked if I could explain her plans for water development on Little Creek (application number 78-07340).

It is not feasible to construct the pond described in the HIP information you received if surface area is restricted to less than one-half acre. This proposal should be shelved until your moratorium ends.

Ms. Belkora would like to excavate some small areas adjacent to Little Creek upstream from the pond site described above. This operation would involve excavation in wetland areas with removal of excavate to upland areas. Her desire is to create two open water areas of approximately 25--30 feet in diameter and up to 6 feet in depth. The design considered is to allow stream flow to enter and leave the excavated area at whatever rate the stream flows.

Because the ponds will be excavated in wetland/spring source areas, this will quickly fill with ground water and will have no impact on downstream water rights. Because the surface areas involved are so small, the evaporative losses will be negligible.

This, of course, doesn't address the conversion of emergent wetland to open water type and I suppose a 404 will be required. With the moratorium on pond development, I can not envision how mitigation for lost emergent wetland can be conducted.

If you have questions, you can contact me through this office.

Sincerely,

Andy Ogden

RE: Application for Permit No. 78-07340

Dear Applicant:

Your application for permit to appropriate Little Creek water for wildlife and recreation uses via two ponds was received on 9/17/92. Due to continued drought and the need to protect existing water rights and water supplies, the director of this agency declared a moratorium on 5/15/92 concerning water right applications proposing new consumptive uses of public water. Your application cannot be processed in its entirety for possible approval until the moratorium ends. Delays related to department decisions do not affect the date of priority or seniority of an application.

A possibility exists that you could obtain an approved water right for a portion of the application. Storage ponds covering up to one-half acre of surface area can be exempted from the moratorium. The Idaho Fish and Game HIP information attached to the application states that a maximum area of 2.5 acres and a minimum area of 1 acre are proposed. If you reduce the maximum surface area for ponds to one-half acre, the application can be considered for approval.

If the reduction is made, the balance of the storage proposal can be eliminated (will not be built) or postponed until the moratorium is lifted. Please let me know within 30 days if you want to proceed with a reduced application and if the balance of the project will be postponed. If I do not hear from you, I will assume that the entire project will be delayed pending withdrawal of the drought moratorium.

You will be informed of any changes related to the moratorium delay. Please let me know if you need additional information.

Sincerely,

Steve Lester
Water Rights Supervisor
