WATER RIGHT LICENSE

WATER RIGHT NO. 78-07281

Priority: September 1, 1987 Maximum Storage Volume: 3.0 AF

This is to certify, that MELVIN C BRANSTETTER
ALICE L BRANSTETTER

PO BOX 245

NEW MEADOWS ID 83654

has complied with the terms and conditions of the permit, issued pursuant to Application for Permit dated September 1, 1987; and has submitted Proof of Beneficial Use on January 29, 1991. An examination indicates that the works have a storage capacity of 0.000 af of water from:

SPRINGS

tributary to SINKS

source, and a water right has been established as follows:

<u>BENEFICIAL USE</u>	<u>PERIOD OF USE</u>	<u>RATE OF DIVERSION</u>	<u>ANNUAL VOLUME</u>
IRRIGATION STORAGE	01/01 to 12/31		1.7 AF
IRRIGATION FROM STORAGE	04/15 to 10/15		1.7 AF
STOCKWATER STORAGE	01/01 to 12/31		3.0 AF
STOCKWATER FROM STORAGE	01/01 to 12/31		3.0 AF
	Totals		3.0 AF

LOCATION OF POINT(S) OF DIVERSION: SWNESEW, Sec. 5, Township 19N, Range 02E
ADAMS County

PLACE OF USE: IRRIGATION STORAGE

TWN RGE SEC

19N 02E 5

NESW 9

9

PLACE OF USE:

IRRIGATION FROM STORAGE, same as IRRIGATION STORAGE use

PLACE OF USE:

STOCKWATER FROM STORAGE, same as IRRIGATION STORAGE use

CONDITIONS/REMARKS:

1. This water right is appurtenant to the described place of use.
2. This right is subject to all prior water rights and may be forfeited by five years of non-use.
3. Modifications to or variance from this license must be made within the limits of Section 42-222, Idaho Code, or the applicable Idaho law.
4. Two points of diversion are located within SWNESEW, S05, T19N, R02E.
5. Stockwater storage is for 200 range cattle.

ACTION OF THE DIRECTOR, DEPARTMENT OF WATER RESOURCES

This is to certify that I have examined Application for Permit to appropriate the public waters of the State of Idaho No. 78-7281, and said application is hereby APPROVED.

1. Approval of said application is subject to the following limitations and conditions:

a. SUBJECT TO ALL PRIOR WATER RIGHTS.

b. Proof of construction of works and application of water to beneficial use shall be submitted on or before
February 1, 19 89.

c. The rate of diversion, if water is to be used for irrigation under this permit, when combined with all other water rights for the same land shall not exceed 0.02 cubic feet per second for each acre of land.

d. The water right acquired under this permit if for hydropower purposes shall be junior and subordinate to all rights to the use of water, other than hydropower, within the State of Idaho that are initiated later in time than the priority of this permit and shall not give rise to any right or claim against any future rights to the use of water, other than hydropower, within the State of Idaho initiated later in time than the priority of this permit.

MEMORANDUM

TO: File 78-07281 / Melvin Branstetter
FROM: Brenda Chapman
DATE: February 8, 1995
RE: Recommendation Adjustment(s)

=====

The final licensing recommendations for the above referenced water right are based on the information below:

E. NARRATIVE/REMARKS/COMMENTS

The examiner has recommended an active flow rate of .18 cfs based on 9 acres @.02 cfs per acre. Based on information in the exam, that flow rate appears excessive. In addition, there is no diversion facility from the springs into the ponds. The ponds are just "catch basins" for the drainage from both springs. Allowing an active flow component of .18 cfs could lead to an expansion of the right beyond the original 10 afa limit.

Also, the original application for permit for 10 afa was based on the capacity of the two ponds. The exam shows the total capacity of both ponds is 3 af.

Based on the above information, an active flow component is not being recommended nor is an amendment being solicited to add it.

I. RECOMMENDATIONS

1. Recommended Amounts

Beneficial Use	Period of Use	Rate of Div	Annual Vol
Irr Storage	1-01 to 12-31		1.7
Irr from Stor	4-15 to 10-15		1.7
Stock Storage	1-01 to 12-31		3.0
Stock from Stor	1-01 to 12-31		3.0

MEMORANDUM

TO: Permit Nos. 78-07281 and 78-07288 Files

FROM: Cindy Hodges

RE: System Descriptions and Recommendation Analysis

Water right permit 78-07288 has been recommended for licensing pursuant to transfer no. 4430, which affects SESW Section 5. Some acres under water right license no. 78-02027, from 4-Mile Creek, were forfeited and permit 78-07288 was shown to have been developed in their place (see transfer memo). This transfer removes the remaining acres in this QQ from 78-02027 to an adjacent area. The water right resulting from the licensing of 78-07288 will be the only right authorizing irrigation within SESW Section 5. The balance of the irrigated acreage must be retired.

Permit 78-07281 was developed within NESW Section 5 during the same period as 78-07288. There are no recorded overlapping rights in NESW Section 5, and none found. Other than the circumstances surrounding transfer 4430 in SESW Section 5, the two permits are very similar and required the same analysis.

Each permit was developed for unique acres. Two small ponds were constructed at each site (see B/U reports for exact volumes) in existing drainages where springs were evident. The upper, and in both cases, the larger of the ponds, each were constructed with a 6" outlet and valve in the left end of an earthen embankment, through which excess or irrigation flows could be released. Early in the season when there is sufficient inflow, and with these valves closed, the pond levels can usually be raised enough that flows will spill into a ditch at the opposite end of the embankment. At the time of the field exam, inflows had ceased in NESW Section 5 and irrigation was no longer occurring. The water level in the upper pond had fallen below the outlet. In SESW Section 5, a minimal inflow was still allowing some irrigation through the lower outlet.

The lower ponds at each site were constructed using earthen berms without outlets. These ponds are used to catch any irrigation runoff and/or seepage flows, and are used for stockwater along with the upper ponds.

Both permits were written showing storage components only, not to exceed 10 AFA. Developed storage under each permit is less than 35% of the permitted maximum storage capacity. Rather than a single fill, any available live or natural inflows are used to fill and refill the ponds for continued irrigation throughout mid-summer.

FEB 17 1995

To compensate, ~~the additional~~ of a live irrigation flow component has been added to both recommendations, at the standard rate of flow per acre, with total diverted volume not to exceed 10 AFA. Even though not originally shown on the permits, I believe this fits within the implied permit limits, and most accurately describes the beneficial use developed. The inverse of this concept, that of adding storage to a live flow only permit, has been demonstrated as being acceptable in previous licensing.

In comparison to the acres irrigated, the permitted volume limits do not appear to accommodate the beneficial use as shown under these permits. However, the characteristics of the area do allow for beneficial use to the extent which I have described. It was shown to my satisfaction that beneficial use can be accomplished under these conditions at a relatively low volume per acre per season.

The crops grown under these systems were pasture and grass hay. In the New Meadows area, diverted and consumptive volume guidelines are 3 AF and 2 AF per season, respectively. As the consumptive volume quota for a given locale is based on crops which have higher consumptive requirements than either grass or pasture, it can be presumed that actual required consumptive volume for these crops is significantly lower.

According to Mr. Branstetter, the grass hay in NESW Section 5 (78-07281) is irrigated only once or twice during the irrigation season. Depending on natural precipitation, a maximum of one or two cuttings are made before the area is opened as range. The final cutting had occurred some time before my visit and hay bales were still laying in the field. Even though semi-dryland management contributes to a short cropping season, beneficial use is undeniably occurring. Likewise, the pasture in SESW Section 5 (78-07288) is irrigated infrequently, and requires less overall irrigation because it is located within a naturally wetted area. The area had been actively pastured all summer.

REAL ESTATE PURCHASE AND SALE AGREEMENT

New Meadows, Idaho

Date: APRIL 1, 1994

1. BUYER. W.H. ADAIR, A SINGLE PERSON (hereinafter called "Buyer") agrees to purchase, and the undersigned Seller agrees to sell the following described real estate hereinafter referred to as "The Premises", which real property is more particularly described on Exhibit "A", which is attached hereto and incorporated herein by reference.

2. PRICE/TERMS. The total purchase price is TWO HUNDRED NINETY SIX THOUSAND DOLLARS. (\$296,000.00) Such price shall be paid as follows:

- a. \$15,000.00 in earnest money deposit;
- b. \$35,000.00 additional cash at the time of closing;
- c. The balance of \$246,000.00 shall be evidenced by a note secured by a first mortgage on the premises and shall bear interest at the rate of eight percent (8%) per annum from the date of closing. Payments of \$2,112.00 per month shall be made with the first payment due thirty (30) days after closing and a like payment due on the same day of each month thereafter with a balloon payment of all outstanding principal and interest payable in full, on the 10th anniversary of the closing of this transaction. In addition, a payment of \$25,000.00 plus interest at the rate of eight percent (8%) per annum shall be made on or before June 1, 1994.

d. There shall be no pre-payment in excess of ten

acknowledges that it has independently verified with the various agencies of the Department of Agriculture its obligation under said contracts.

c. Buyer has made an independent investigation of the water rights to such property and solely relies on such investigation. Buyer acknowledges that he is not relying on any information supplied by Seller or any of its agents. Buyer further acknowledges that he has been informed that, over the various years, Seller has utilized irrigation water which is not appurtenant to this property in farming such property. Such irrigation waters will not be available to Buyer and, such property is without any water rights other than that collected on the property through certain storage permits, as demonstrated by the Idaho Department of Water Reserve records, which may or do require additional work and/or proceedings for perfection.

d. Seller is selling the real estate "AS IS" and makes no representation of any kind to Buyer concerning the real property. Buyer agrees to rely only upon Buyer's own inspection and investigation with regard to any decision of Buyer to purchase the real property, and by accepting the terms of this agreement, Buyer accepts the real property "AS IS" based solely upon Buyer's and his agent's or representative's own inspection.

e. Buyer hereby acknowledges that Buyer has not received or relied upon statement or representation by Seller, Seller's broker, or Seller's representative which are not set forth in this agreement. Buyer has entered into this agreement

Minneapolis
FEB 17 1995

18. Except as specifically altered by the parties' subsequent written understandings, paragraphs 5, 6, 7 and 16 are specifically intended to survive the closing of this transaction.

19. TIME IS OF THE ESSENCE IN THIS AGREEMENT. THIS IS A LEGALLY BINDING AGREEMENT. IF NOT UNDERSTOOD, BUYER AND SELLER ARE ADVISED TO SEEK THE ADVICE OF COMPETENT LEGAL COUNSEL.

Buyer: W.M. Adair

Buyer's address: 318 Willoughby Avenue, Juneau, AK 99801

PROOF ACKNOWLEDGMENT LETTER

RE: PERMIT NO. 78-07281

Dear Permit Holder:

The department acknowledges receipt of the proof of beneficial use form submitted for the above referenced permit. The next step in the process of developing a water right is for the department to conduct a field examination to determine and confirm the use being made of the water.

If you have questions concerning this matter, please feel free to contact the WESTERN Regional Office in Boise at (208)334-2190.

Sincerely,

Rita Fleck
Secretary/Records Manager

PROOF DUE NOTICE

RE: PERMIT NO. 78-07281

Dear Permit Holder:

One of the conditions of approval of the above referenced water permit was that proof of the extent of your beneficial use must be submitted to this office on or before February 1, 1991. (See last page of your approved permit or your last approved extension request.) Enclosed is a form which when accompanied by the license examination fee or a complete field examination report prepared by a certified water right examiner may be used to submit the required proof.

If you have not fully completed your project, and you or a previous owner of this permit have not received a prior extension of time, you may request an extension of time if the delay is for reasonable cause as provided in Section 42-204, Idaho Code. If you have been prevented from proceeding by a governmental agency or by litigation which might bring title to the water in question, more than one extension of time can be granted. An extension of time request form is enclosed for your convenience.

Either an acceptable proof of beneficial use submittal or an acceptable request for an extension of time must be received by this department on or before the above described proof due date. If neither is received, the department will send you a lapse notice. Within sixty (60) days of the mailing of the lapse notice, the permit will no longer be of any force nor effect.

SINCERELY,

Rita Fleck
Secretary/Records Manager

Dear Mr. and Mrs. Branstetter:

Re: Permit No. 78-7281

Enclosed is a copy of the approved request for extension of time. The time within which to submit proof of beneficial use is extended to February 1, 1991.

Note that the department has granted this extension based on litigation. It is important that you work diligently toward the completion of this project during the construction period allowed. The department may not be able to grant additional requests.

Sincerely,

RITA I. FLECK

Alice L. & Terri E. Branstetter
P.O. Box 245
New Meadows, ID 83654

Dear Alice & Terri:

Enclosed are copies of the applications for permit you filed with the changes made using the dimensions of the ponds.

Please note I have changed the proposed uses to storage for and from. This gives you the right to store the water in the ponds and then use it from the ponds. Alice, I located the 15 acres in the same quarter-quarter as the spring and since there is no diversion(pump) directly in the spring, the only amount of water that needs to be shown is in acre feet. Because of this, no additional fee will be needed since the fee for 5 acre feet is \$30.00. Terri, please note I changed your amount from cfs to acre feet also based on the dimensions given. The cfs amount is only used when there is a ditch or pump from the source to the place of use as explained above.

If there is a problem with these applications, please contact me as soon as possible, or prior to the week of October 26th because our advertising will be sent out that week. If I do not hear from you, both applications will be submitted for advertising on November 4th and 11th, 1987, in the Adams County Leader.

Sincerely,

JAN SHURTE
Sr. Water Resource Agent
