A spring's seepage area forms a small pond (40'x15'x1') from which water is routed by a buried 2" pipe to another small pond (40'x15'x2') approx. 300' South. From this second pond, which is on Walker's property, a small pump channels water through a buried 1 1/2" line to several 3/4" standpipes for garden hose/sprinkler use. Other "channels" from the pump include a valve with one 3/4" attachment (hose) and a small riser with two valves for 2 garden hoses. A small earth ditch leaves the pond to allow gravity irrigation on the property. Also, a 3" pipe leaves the pond and runs west to allow gravity irrigation on other parts of the land. Irrigated areas include lawn, pasture, garden, and misc. ornamental & fruit trees. ☐ See Remarks on page 4 for continuation

H. REMARKS AND OVERLAP REVIEW ANALYSIS

Limit license to .02 cfs as permit shows. The storage components and diversion to ~~the~~ storage from 1 pond to the other pond are such minor components in terms of volume that right should continue to be described as irrigation (Pond volume at spring is $(40' \times 15' \times 1') / 43,560 = .014 \text{ AF}$. Pond volume on Walker's property is $(40' \times 15' \times 2') / 43,560 = .028 \text{ AF}$).

Overlap: 1 P/O CONFLICT:

P/O - 78-7103 is same spring but used for Becker's property ground spring.

78-7102 is well on Becker's property for off int. + ext. use (info from field exam conducted by Rich. G. 7/87).

P/U - 78-7103 irrigation & stockwater of other land.; 78-7102 see P/O overlap;

78-7071 Relinquished 10/7/87; 78-7263 is permit to increase storage at Brundage Reservoir. Proof due 11/1/90. Split into A (Brundage water users) and B (Forest Service). Does not provide water to Walker's property.
