License of Water Right No. 78-7060 Priority August 27, 1974 Amount 0.04 cfs

THIS IS TO CERTIFY, that HENRY &/or BETTE L. NORTUNE
of Donnelly, Idaho, has complied with the terms and conditions of Permit
No. 78-7060 issued pursuant to Application for Permit dated August 27, 1974,
and has submitted proof to the Department of Water Resources on April 7, 1978,
that he has applied water to a beneficial use; an examination by the Department indicates that the works have a
capacity for the diversion of 0.04 cfs of water from Dewitt Creek,
tributary to Little Salmon River, and that the permit holder has applied to a beneficial use and
established a right to use water as follows:

Beneficial Use	Period of Use	Rate of Diversion	Annual Volume

We hereby protest the issuance of a permit to appropriate the waters of Dewitt Creek No. 78-7060 by Henry Nortune &/or Bette L. Nortune of Donnelly, ID.

The spring fed gulley refered to is totally used to fulfill our existing water right.

Until the flooding experience this year the water did not flow in its present location. As a temporary measure the Highway Department relocated the culvert which carries the water to Mr. Nortune's intended point of diversion. After we relocate the spring water back to the original, there will be no water at all to fulfill Mr. Nortune's permit.

NOTICE OF CONFERENCE
AND/OR HEARING

On August 27, 1974, Henry &/or Bette L. Nortune filed with the Department of Water Resources an application to appropriate the public waters of the State of Idaho. On September 23, 1974, the Department received a protest against approval of said application from Evelyn DeWitt.

The Department has set the matter of protest for conference and/or hearing for Thursday, October 24, 1974, at 1:30 p.m., in the Courtroom of the Adams County Courthouse, Council, Idaho. Any hearing will be held in accordance with the Rules and Regulations of the Idaho Code and adopted Rules of Practice and Procedure of the Department of Water Resources. Opportunity shall be afforded all parties to respond and present evidence and argument on all issues involved.

Any party may request in writing five (5) days before any hearing that the oral proceedings thereof be taken in the form of stenographic notes. Any party may have such stenographic notes of the oral proceedings, or part thereof, transcribed at his own expense. A taped record of the proceedings will be maintained for the appeal period.

Failure to appear at the time and place set for hearing by the applicant or protestant may allow the Department without prejudice to dismiss the protest or the application. Any and all cost incurred by reason of such non-appearance may be assessed against such non-appearing parties.

Dated this 11th day of October, 19 74.

Dear Sir:

In regard to permit No. ⁷⁸⁻⁷⁰⁶⁰ 8-7060

After looking over the alternatives which I have to get my water back to my point of diversion, I find that it is approximately 500 feet from the present culvert which DeWitt or unnamed creek flows through now, to the South one which Mr. DeWitt is talking of transferring my water filing too. It will make it 1000 feet round trip through sandy porous ground on under side of the Highway and large boulders on the lower side of Highway. It looks impossible to me to go this way with my water.

Therefore, I have only one alternative. I will have to go North along Highway barrow pit with plastic pipe to the same culvert that the water is now flowing through.

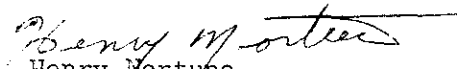

After looking over Mr. DeWitts property I could not determine location to which Mr. DeWitt is going to rechannel the creek to, so was unable to survey the course of my pipe line and determine whether the water would run.

Therefor, I feel that in as much as Mr. DeWitt is closing off my water source he should furnish me an alternate course approximately as good, which would be easy for him to do.

I would be most grateful if you would find time to stop on Highway 55 and look this project over, as you go to Mr. Howard William's place for final inspection on his filing.

Thank you for your time.

Very truly yours,

Henry Portyne,

Dear Mr. Foit:

The State of Idaho, Transportation Department, Division of Highways, District Three office, was contacted on October 15, 1974 by Mr. Henry Nortune regarding the possibility of installing a water line across U.S. Highway 95 in the Pinehurst area.

This water line crossing will be approximately a two (2) inch pipe and will be for domestic use as well as irrigation.

Mr. Nortune was informed that the Division of Highways would approve a permit for the water line crossing. Mr. Nortune would have to provide evidence that the water was his and that he would not be interfering with other water rights. He would also have to bore the pipe line crossing under the roadway.

If we can be of any further assistance, please feel free to contact this office.

Dear Mr. Foit:

In reply to your letter of Sept. 23, 1974

As to the hearing to discuss matters of protest.

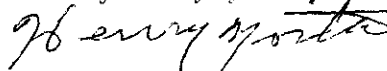

I would like to have the hearing at the location of water diversion either at our home or DeWitts home, and the sooner the better.

Dewitts are logging contractors and they can remodel the looks of their property any time they see fit, so I would like to have the hearing very soon, before they relocate the creek again, as they threatened to in their letter of protest.

I am quite sure the Highway Dept. does not intend to move the four foot diameter culverty that they installed under Highway 55 where DeWitts are dumping the water off of their property on to the Highway right of way since the flood in January and yet today.

I wish this to be confidential.

Very truly yours,

Henry & Bette Nortune

We hereby protest the issuance of a permit to appropriate the waters of Dewitt Creek No. 78-7060 by Henry Nortune &/or Bette L. Nortune of Donnelly, ID.

The spring fed gulley refered to is totally used to fulfill our existing water right.

Until the flooding experience this year the water did not flow in its present location. As a temporary measure the Highway Department relocated the culvert which carries the water to Mr. Nortune's intended point of diversion. After we relocate the spring water back to the original, there will be no water at all to fulfill Mr. Nortune's permit.

Re: Application No. 78-7060 - Henry Nortune

Dear Mrs. DeWitt:

This is to acknowledge receipt of your protest to issuance of a permit pursuant to the above referenced application. The following are the principle items we can consider at a conference and/or hearing in either approving or denying an application for permit (Section 42-203, Idaho Code):

1. Will the proposed use reduce the quantity of water under existing water rights?
2. Is the proposed water supply insufficient for the purposes intended?
3. Is the application made in good faith or for delay or speculative purposes?
4. Has the applicant sufficient financial resources with which to complete the project?

The Department may reject an application and refuse issuance of a permit, partially approve the permit, approve the permit for a quantity of water less than applied for, or approve the permit subject to special conditions.

A permit issued by this office is subject to all prior water rights and does not in any way convey or establish a right-of-way over private or governmental lands. Any right-of-way or easement must be obtained by the individuals concerned through action outside of the water right proceedings.

You will be notified at a later date as to the time and place set for conference and/or hearing to discuss the matters of protest. If we may be of further assistance, please contact us.

Very truly yours,

Re: Application for Permit No. 78-7060

Dear Mr. Nortune:

We have enclosed a copy of the protest filed against the issuance of a permit pursuant to your Application No. 78-7060. You should be aware that the following are the principle items we can consider at a conference and/or hearing in either approving or denying an application for permit (Section 42-203, Idaho Code):

1. Will the proposed use reduce the quantity of water under existing water rights?
2. Is the proposed water supply insufficient for the purposes intended?
3. Is the application made in good faith or for delay or speculative purposes?
4. Has the applicant sufficient financial resources with which to complete the project?

The Department cannot allow a permit for irrigation purposes which would entail the use of more than a continuous flow of 0.02 cubic feet per second of water for each acre of land, or an annual amount of 5 acre feet for each acre of land, unless the applicant can show that more is required. (Section 42-202, Idaho Code)

A permit issued by this office is subject to all prior water rights and does not in any way convey or establish a right-of-way over private or governmental lands. Any right-of-way or easement must be obtained by the applicant through action outside of the water right proceedings.

You will be notified at a later date as to the time and place set for a conference and/or hearing to discuss the matters of protest. Legal counsel is not mandatory at any proceeding before the Department, although you may desire to employ an attorney in your behalf. If we may be of any assistance, please contact us.
