License of Water Right No. 78-7033 Priority November 14, 1972 Amount 0.03 cfs

THIS IS TO CERTIFY, that F. GORDON &/or BERTHA MARIE FOUCH
of McCall, Idaho, has complied with the terms and conditions of Permit
No. 78-7033 issued pursuant to Application for Permit dated November 14, 1972,
and has submitted proof to the Department of Water Resources on September 20, 1976,
that he has applied water to a beneficial use; an examination by the Department indicates that the works have a
capacity for the diversion of 0.03 cfs of water from a spring,
tributary to Little Salmon, and that the permit holder has applied to a beneficial use and
established a right to use water as follows:

Beneficial Use	Period of Use	Rate of Diversion	Annual Volume
<u>Domestic</u>	from <u>January 1</u> to <u>December 31</u>	at <u>0.03</u> cfs and	<u>1.2 acre feet</u>
	from _____ to _____	cfs and	
	from _____ to _____	at _____ cfs and	
	(both dates inclusive)		

Subject, however, to the condition that no more than 0.03 cfs of water be diverted at any one time, and
that the amount of water so diverted and to which such right is entitled and confirmed for the purpose
aforementioned and is limited to the amount which can actually be beneficially used and shall not exceed
1.2 acre feet per year, said waters to be diverted within the SW 1/4, Sec. 11, Twp. 21N,

Dear Mr. and Mrs. Fouch:

A representative of this Department made an examination of the works covered by your Permit No. 78-7033 on November 18, 1977 and has found the following:

Amount of water that can be recognized as beneficially used under
Idaho law: 0.03 cfs Source: Spring

The maximum quantity diverted shall not exceed 1.2 acre feet
per year.

Point of diversion: SW¹/₄NE¹/₄, Sec. 11, Twp. 21N, Rge. 1E, B. M.

Beneficial use: Domestic use within the SW¹/₄NE¹/₄, Sec. 11, Twp. 21N,
Rge. 1E, B. M.

Priority date established: November 14, 1972

In order for the Department to issue the above license, it will be necessary for you to amend the permit to correspond with the findings of the field examiner. We are enclosing a partially completed amendment form for your use in this matter.

Please sign the amendment application and return it to this office along with a \$20.00 filing fee within 30 days in order that we might issue your license as set forth above. If you do not concur with these findings or have any questions, please contact us within the 30-day period.

Dear Mr. Ballou:

In April of this year I contacted your office regarding the status of the above application. The lady in your office told me it had been okayed by your office and sent to the State House for Processing. She also stated it might be awhile before we received the permit.

I thought it best to check on it at this time, since it has been ^{over} six months and I feel it is my responsibility to follow up on the application.

Please advise as soon as possible.

Re- Permit Application No. 78-7033

Dear Mr. Ballou:

Department of Water Resources
Western Regional Office

This letter is to serve as a follow-up on my telephone conversation with you regarding the location of our diversion point.

As I stated on the phone, I have purchased and recorded the ten acres adjacent to my upper S.E. corner where the diversion point is presently. This makes the "Proof of Application Form" read different from the original application.

My original request would have required a special use permit to transport water from the BLM lands, but since I have acquired the property just west of the BLM boundary, it was much more practical to move the diversion point downstream about 200' in order to have everything on my property.

At the time of the original application I met with BLM and we discussed on the site my plans at that time. They were in agreement and could see no reason why a special use permit covering a pickup box and transmission line could not be issued.

I have contacted a surveyor to run the property boundary lines between me BLM and my neighbor to the south. At that time (when snow melts) we will pin point the diversion location also.

In my last telephone conversation with your office (a lady) said the application had been sent to the State house and she felt there were no problems, as long as I had not heard anything, the application no doubt was being processed.

Since January 1, 1978 is the final proof of application date I thought it best to provide you with the follow-up information.

Should further discussion be necessary, please contact me at the Payette National Forest Supervisor's Office in McCall. Phone 634-2255 - Ext. 24.

Thank you for your assistance

Re- Permit No. 78-7033

Dear M. Ballou:

We have completed the survey of our property on the little Salmon River and have inclosed a sketch showing the spring location and diversion point, along with property boundaries.

The conflict of the quarter section location between our original application and the Proof of Affidavit came about when we originally planned to divert directly from the spring source in the SE $\frac{1}{4}$ of the NE $\frac{1}{4}$. This is on BLM land. Since that time we purchased an additional 10 acres described as the East 330' of the SW $\frac{1}{4}$ of the NE $\frac{1}{4}$, Section 11, T.21N-R1E. This allows us to place the point of diversion on our own land and not require a special use permit across BLM.

The entire project is now on our own land.

The diversion equipment is still temporary and will be replaced next summer with concrete boxes and permanent pipes.

We would like very much to complete the field inspection yet this fall if your schedule will permit.

Please feel free to call me at the office during the day 634-2255 Ext 24 or at home 634-5634 in the evening.

Sincerely,

WATER RIGHT APPLICATION #78-7033

Gentlemen:

The enclosed drawing outlines the water development we have installed to date.

At the time the application for water right, we did not own the property involving the pickup point and transmission. Since that time we have purchased the adjacent ten acres that provides us access beyond the pickup point and locates the entire project on our own property.

We welcome your inspection of the system in order to complete the water right.

If additional information is needed you may write me at Box 208, McCall, Idaho or call: Home 634-5634, Office 634-2255, Ext 24.

Dear Mr. & Mrs. Fouch:

We have enclosed a copy of the protest filed against the issuance of a permit pursuant to your Application No. 78-7033. You should be aware that the following are the principle items we can consider at a conference and/or hearing in either approving or denying an application for permit (Section 42-203, Idaho Code):

1. Will the proposed use reduce the quantity of water under existing water rights?
2. Is the proposed water supply insufficient for the purposes intended?
3. Is the application made in good faith or for delay or speculative purposes?
4. Has the applicant sufficient financial resources with which to complete the project?

A permit issued by this office is subject to all prior water rights and does not in any way convey or establish a right-of-way over private or governmental lands. Any right-of-way or easement must be obtained by the applicant through action outside of the water right proceedings.

You will be notified at a later date as to the time and place set for a conference and/or hearing to discuss the matters of protest. Legal counsel is not mandatory at any proceeding before the Department, although you may desire to employ an attorney in your behalf.

If we may be of assistance, please contact us.

Sincerely,

KENNETH H. FOIT, P.E.
Western District Engineer

Dear Mr. & Mrs. Olvey:

This is to acknowledge receipt of your protest to issuance of a permit pursuant to the above referenced application. The following are the principle items we can consider at a conference and/or hearing in either approving or denying an application for permit (Section 42-203, Idaho Code):

1. Will the proposed use reduce the quantity of water under existing water rights?
2. Is the proposed water supply insufficient for the purposes intended?
3. Is the application made in good faith or for delay or speculative purposes?
4. Has the applicant sufficient financial resources with which to complete the project?

The Department may reject an application and refuse issuance of a permit, partially approve the permit, approve the permit for a quantity of water less than applied for, or approve the permit subject to special conditions.

A permit issued by this office is subject to all prior water rights and does not in any way convey or establish a right-of-way over private or governmental lands. Any right-of-way or easement must be obtained by the individuals concerned through action outside of the water right proceedings.

You will be notified at a later date as to the time and place set for conference and/or hearing to discuss the matters of protest. If we may be of further assistance, please contact us.

Sincerely,

Dear Mr. Allison:

We received your protest on December 12, 1972, which is one day past the ten-day protest period. However, the filing made by Mr. and Mrs. Fauch, 78-7033, is subsequent to any prior water rights.

The amount of water that Mr. and Mrs. Fauch have filed to appropriate is for domestic use only, the quantity being 0.03 or 14 gallons per minute. This quantity may not be the total flow of the spring. Therefore, any amount above that quantity would be left flowing in the spring.

If you have any further questions, please feel free to contact our office.

Dear Sir. In regard to the application for water permit, filed by Gordon Fanch and/or Bertha Fanch, No. 78-7033 at Box 208 McCall, Idaho, we would like to protest the granting of complete control of the water from the spring on the Little Salmon.

This spring is very important to us, and many nights up & down the Little Salmon as a source of getting water when our pumps are out of order, or system frozen in the winter, and when we are low on water in summer. Campers, fishermen, hunters and tourists use this water a great deal during the summer, as well as the sheep and cattle people who take their herds up and down Hazard Creek near-by.

If it would be made possible that the public could use the water as well as the applicant, we would have no objection, but to grant a permit for full use would be doing residents and property owners an injustice.

Thank you kindly,
Mr & Mrs. J.M. Albion
