Dear Sirs:

A representative of this Department made an examination of the works covered by your Permit No. 78-7012 on February 28, 1977, and has found the following:

Amount of water that can be recognized as beneficially used under
Idaho law: 1.30 cfs Source: groundwater

The maximum quantity diverted shall not exceed N/A acre feet per
year.

Point of diversion: SW 1/4, Sec. 24, Twp. 19N, Rge. 1E, B.M.

Beneficial use: Municipal use for the City of New Meadows, Idaho

Priority date established: September 27, 1969

If you do not concur with these findings please contact us within 10 days, otherwise a water license will be issued as set forth above.

Re: City of New Meadows Application for Public
Water Rights, City Well No. 3

Dear Mr. MacAllister:

This letter is written with regard to our telephone conversation of a week or so past, concerning a representative pumping rate for the above referenced application.

In your inspection of the system it was noted that the Well No. 3 itself is not metered; however, the system is metered at the new booster pump facility, which is the distribution outlet.

In Well No. 3's case, the average peak pumping rates are not readily measured due to both this well's large amount of drawdown (430 ft.) and the time required to pump to the equilibrium condition.

Toward the end of project construction, and during testing and disinfection of the new water storage tank, measurements were taken during the tank's initial filling in order to determine Well No. 3's flow rate. The manner in which the new water system now operates consists of Well No. 3 pumping upon command to the water tank and the booster pumps drawing off of the tank in order to supply the municipality with domestic and fire flows. The tank not only serves to hold a reserve of fire fighting water, but also functions on a pump storage capacity basis for the domestic and irrigation flows.

Subsequent to our conversation, I requested all existing well and pump data from both the City and Layne Pump, Inc.

After a cursory review of past well reports, manufacturer's pump curves, recent discharge observations, and new well and pump operational criteria, it is my opinion that the supply system (Well No. 3) is capable of producing an average discharge of 1.3 cfs. Furthermore, it would be my recommendation to the City to file for water rights on no less than this amount.

RE: Exam on Permit #78-7012

Dear Mr. Hansen:

I have contacted Alpha Engineers and they have promised to supply me with test data documenting the capacity of your water system. In all probability I will be able to complete the field exam once this data is provided. It will still be necessary to move your present meter or install another meter so that the rate of diversion from the well can be measured in compliance with the conditions of the permit. In other words there should be a meter between the well head and the holding tank.

If you have any questions about this matter, please feel free to contact me.

Sincerely,

Gentlemen:

We acknowledge receipt of the affidavit submitted as proof of beneficial use for the above referenced permit. Enclosed is an Order of Reinstatement; please note that the priority has been advanced to September 27, 1969.

Before a license can be issued, a field examination must be made by a representative of this Department. We cannot tell just when this exam will be made, but our examiner will try to contact you at the time he makes the exam so that you may show him the system.

If you have any questions regarding the field exam, please contact our Regional Office in Boise.

Gentlemen:

Enclosed is an Order which DENIES extension of time of the proof due date in connection with the above referenced permit.

You should be aware that Idaho is under a mandatory permit system, therefore, it will be necessary for you to file an application for permit at such time as you continue to develop this project.

This permit will automatically lapse on September 1, 1976. Sixty days after September 1, 1976, you could still make proof of beneficial use. We suggest that you make proof then. The date would be November 1, 1976. You would lose a day of priority for every day that the permit is late past the September 1, 1976 date. Enclosed for your use is a proof form and instructions.

Sincerely,

D. DARLENE REICH

Gentlemen:

One of the conditions of approval of your water Permit No. 78-7012 (see last page of your approved permit) was that evidence of the extent of development be submitted as proof of application of water to beneficial use to this office on or before September 1, 1976. Enclosed is an affidavit form which must be used to submit the required proof of beneficial use.

If you have not fully completed your project, and you have not previously received an extension of time, you may request an extension of time provided the delay is for reasonable cause as indicated in Section 42-204, Idaho Code, amended. If you have been prevented from proceeding by a governmental agency or by litigation, more than one extension of time can be granted.

Either the beneficial use affidavit or a request for an extension of time must be received by this Department on or before the above mentioned date, otherwise the permit will lapse and be of no further force or effect.

Re: Permit No. 78-7012

Dear Mr. Higginson:

The City of New Meadows is requesting a second extension of time for installing a water meter on our most recent well. Our reason for this request is that we have been granted an EDA grant to improve our water system. One of the improvements is to install a 250,000 gal. storage tank and booster station. A meter will be installed upon completion of this project which should be adequate, but completion date of this project will extend beyond Sept. 1, 1975. Construction is supposed to start in August and take about 90 days. Alpha Engineers, Inc, in Caldwell, %Doyle Mecham, is in charge of this project in case you'd like to contact them.

Sincerely,

Colleen Moore (Mrs.)

Dear Sir:

Due to an oversight of the City Board when our last city well was drilled, a meter was not installed and evidence of the extent of development was never submitted, and consequently forgotten. The present Board was unaware of this condition until receiving your letter of July 1, 1974. Since receiving your letter, information is being sought and some received, from different companies handling these meters. However, the Board feels an extension of time is needed to study the project, install the meter and fill out the needed report for approval of our water permit No. 78-7012. So at this time I am requesting an extension of time from your office.

Waiting to here from you, we remain----
