Re: Permit No. 78-7001

Mr. Miles Rice
Pollock,
Idaho 83547

Dear Miles:

We have received your letter dated May 15, 1970, and will try to explain the reason why your Water License can be issued for only 0.1 c.f.s. of water. It is true that your permit was approved for 0.2 c.f.s. of water but a Water License can be issued for only that amount of water that has been applied to a beneficial use. When our office made the field examination of your works, on March 24, 1970, we found your system capable of irrigating approximately 4 acres. Under state law the maximum rate of diversion we can allow is 1 inch per irrigated acre or 0.02 c.f.s. per irrigated acre. The maximum allowable for a single families domestic use is 0.02 c.f.s. Therefore, we arrived at the figure of 0.1 c.f.s. as follows: 0.02 c.f.s. for your domestic use and 0.02 c.f.s. for each of your 4 irrigated acres.

If you still have objections to our findings, please advise us and we can make a re-examination; otherwise, a license will be issued for 0.1 c.f.s. If we have not heard from you within 20 days of the date of this letter we shall proceed to issue a Water License on Permit No. 78-7001 in the amount of 0.1 c.f.s.

Dear Mr. Rice:

A representative from this department made an examination of your works covered by permit 78-7001. The works were found capable of producing 0.1 c.f.s. of which 0.1 c.f.s. can be recognized as beneficially used and licensed under Idaho law. The water is used for domestic use and irrigation of 4 acres within the NE 1/4 Sec. 34, T. 22 N., R. 1 E., B.M.

If you disagree with the findings, please advise within 10 days. Otherwise a license will be issued showing the findings as set forth in this letter.

Dear Mr. Rice:

Our records indicate that two rights have been filed on Camp Creek, The first one was filed in Section 27, Township 22 North, Range 1 East, B.M. and would be just a short distance south of your place. This right was filed in 1932, however, it has been cancelled. One other right filed by Clarke Childers in 1965 is several miled south and should have no bearing on your right. It seems you have a very good right on the stream. If they sell lots each person should file their own rights.

Very truly yours,

M. RUSSELL BOSCH

Dear Sir:

Regarding my permit -
78-7001 - - all I want to
do is procure a water
right on this particular

Creek - - However if there
is ~~an~~ a prior water
right to which my permit
is subject, then my permit
would not be valid, or necessary.

There is an older place
adjacent to mine which also
uses the water out of this
Creek - To date there has
been enough water for both

2/ .

does - Now the property has
been sold & may be sub-divided
into several lots. If this
happens there will not be
enough water. What I want
to know is does this older
place have a prior water
right and if so how is it
established? Have the previous
owners in years past filed a
water right? If not then
would my water right be
valid - How can I find out
if a prior water right has
been filed?

Yours truly,
Miles Rice

Dear Mr. Rice:

One of the conditions of the approval of your permit 78-7001 was that proof of application of the water to beneficial use be submitted to this office on or before November 1, 1968.

Enclosed is an affidavit form which must be used to submit this proof. You may also request an extension of time provided the delay is for reasonable cause as indicated in Section 42-204, ICA.

Either the proof or a request for extension must be received by this department on or before the above mentioned date, otherwise the permit will lapse and be of no further force or effect.
