Dear Mr. Fredlund:

Our field examiner's report on his inspection of proof of completion of works and application of water to beneficial use under the terms of Permit No. 32476 shows the tank and ditch are capable of conveying 2 miner's inches, or 0.04 c.f.s. However, due to the limitations of your permit, we can only allow the amount of water originally requested, the amount of water actually used beneficially, or 1 (one) miner's inch per irrigated acre.

Upon receipt of the statutory fees, totaling \$7.00, we will issue the Certificate of Completion of Works for 0.04 c.f.s. and the License and Certificate of Water Right for 0.04 c.f.s. confirming the right, with priority of August 11, 1965, to the use of surface water from a spring and Papoose Creek, with the point of diversion in SW1/4SW1/4, Sec. 17, T. 24 N, R. 1 E, for irrigation of $\frac{1}{4}$ acre in NE1/4SW1/4, Sec. 17, T. 24 N, R. 1 E, and also for domestic purposes.

Dear Mr. Fredlund:

We acknowledge receipt of the depositions of holder and two witnesses, also affidavit of publication in the Idaho County Free Press all submitted in proof of completion of works and beneficial use on Permit No. 32476.

Before final action is taken in the matter, the law requires that a field examination be made by an engineer from this department.

We cannot tell just when this examination will be made, but our field engineer will try to contact you at the time he makes the examination so that arrangements may be made to show him over the grounds.

Re: Permit No. **32476**

Date:
June 1, 1966

Arvid Fredlund
Box 24
Riggins, Idaho

Dear Mr. Fredlund:

Under the terms of your Permit No. 32476 you are required to make proofs of completion of works and application of water to beneficial use on or before **Aug. 13, 1966**

Before this proof can be made, the statutory requirement is that a notice of your intention of proof be published once a week for four consecutive weeks in a newspaper in the county.

We enclose Form 36-A in duplicate, which is to be filled in and returned to this department at least forty (40) days before the above mentioned date and/or before the time you intend to make proof (this may be at any place that is convenient for you and your two witnesses), the quantity of water, for what purpose it is used, the point or points of diversion and the location of use, or lands which are irrigated - - by legal description. Descriptions should be taken from your Permit, including any amendments thereto, as recorded in this department. If changes have been made and no amendments are on record, we advise that you request a form for this purpose before your notice is published, or you may have to readvertise and complete another set of proof forms.

Also enclosed is Form 11, which is the authorization for us to have the notice published in the designated county newspaper, at your expense. This is to be returned with Forms 36-A

At the time we send the notice to the newspaper we will send you the forms for the depositions of holder and two disinterested witnesses. It is important that the depositions be executed at the time, on the date set, and at the place named, before the Notary Public as advertised in the publication notice.

The amount of water allowed in a license cannot be more than is actually produced and measured and put to beneficial use, and cannot be more than the statutory amount allowable per acre of land actually found by the field inspection to have been irrigated at the time of proof.

32478, Dale E. Astle
License No. 15844, C. M. Clay

Arvid Fredlund
Box 24
Riggins, Idaho

Dear Mr. Fredlund:

We received your request in regard to water rights out of Papoose Creek and also a protest to proofs under Permit No. 32408.

This office cannot make a survey with instruments, of acreage irrigated under water permits. The area of land is estimated by pacing or taken from recent maps in the S.C.S. Office.

Water License No. 15844 was issued to C. M. Clay, priority of June 26, 1924, for 2.64 c.f.s. out of Shingle and Papoose Creeks for irrigation of 132 acres in the SE1/4SW1/4, Sec. 25; E1/2SW1/4, NE1/4, Sec. 36, Twp. 24 N., Rge. 1 W., B.M.

Permit No. 32408 was issued to N. O. Taylor, filed June 18, 1965, for 0.12 c.f.s. out of Papoose Creek for irrigation of 6 acres in the NE1/4SW1/4, Sec. 17, Twp. 24 N., Rge. 1 E., B.M.

The other three permits all have the same priority, being filed August 11, 1965.

The water code in Idaho provides that the first in time has the first right to the available water up to the amount used beneficially. The District Courts have decreed in other cases that when undisturbed water in a stream will not reach a prior right on account of sinking, the next right upstream has the right to use the water.

32476

continued

Arvid Fredlund, page 2

Use rights obtained by diversion and beneficial use of the water without a permit from this office are legal in this state. Such rights are not recorded and can only become recorded, dating back to first use, by action in the District Court. This office has no record of such rights to use the water.

This office cannot assume division of the waters of any stream until the rights of the various users have been decreed by the District Court.

The records of this office are shown above. If the users of the water cannot agree as to rights to the water, the only recourse is to take the matter to the District Court.
