Re: Permit No 31981

Attention: Mr Carl E Tappan
State Reclamation Engineer

Dear Mr Tappan:

On August 20, 1965 you wrote to Idaho Power Company with respect to the above numbered permit indicating that the Company had failed to comply with the Completion of Works Proof due July 10, 1965, and that the Company was therefore required to show notice why said permit should not be cancelled.

Permit No 31981 is for the use by Idaho Power Company for 30 cfs of the waters of Rapid River with the point of diversion located in the NW $\frac{1}{4}$ NE $\frac{1}{4}$, NE $\frac{1}{4}$ NE $\frac{1}{4}$ of Section 12, Township 23 North, Range 1 West, Boise Meridian, Idaho County, Idaho. This water permit was designed for a non-competitive use in connection with the Rapid River Fish Hatchery constructed by Idaho Power Company and maintained in accordance with the requirements of the State of Idaho Fish and Game Department and the Oregon Fish Commission in order to minimize fish loss resulting from the construction of the Hells Canyon, Oxbow and Brownlee Hydroelectric developments.

Mr Gale Farley of Idaho Power Company has been handling this filing and was responsible for the Completion of Works Proof. However, Mr Farley suffered a heart attack and was out of the office for the period from the first part of May until the latter part of July, and therefore was unable to take care of this requirement. No other person in the Idaho Power Company was aware of the fact that this Completion of Works Proof was necessary and Mr Farley, being disabled, was in no position to discuss this matter with anyone in the Company. For this reason Idaho Power Company is requesting that an additional extension for Proof of Completion of Works be granted and that the date for completion of works be extended from July 10, 1965 until November 15, 1965.

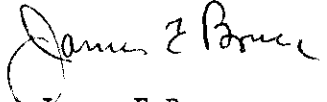

Forwarded herewith are Notice of Proof of Completion of Works and Application of Water to Beneficial Use, in duplicate, together with a letter authorizing you as State Reclamation Engineer to have the notice published in the Idaho County Free Press in Grangeville, Idaho, a newspaper published in the county where the works are situated.

531981

- 2 -

If anything further is required or if you desire further proof with respect to the reasons for the failure to comply with the July 10, 1965 date, I would appreciate hearing from you and whatever proof is necessary will be presented.

INSTRUCTIONS

Re: Permit No. 31981 PROOF OF COMPLETION OF WORKS

Idaho Power Co.
1220 Idaho St.
Boise, Idaho

Boise, Idaho,

April 30, 1965

Dear Sir:—

I enclose herewith blank form upon which to give notice that you are prepared and desire to submit proof of completion of works under your permit No. 31981.

This form should be filled out and mailed to the Department of Reclamation, at least 60 days before the date upon which proof is to be submitted, which proof MUST be on or before July 10, 1965. Upon receipt of the blank properly filled out, notice of publication will be sent to the paper direct from this office, which notice must be published a period of four weeks prior to the date of proof.

The proof may be submitted at any place convenient to you and two witnesses, where there is a notary public or other officer authorized to administer oaths.

The certificate that shall be issued under this proof does not give you a perpetual right to the use of the water for which application is made, as it only confirms the completion of the works of a capacity to divert and convey to the place of intended use a certain amount of water. The law requires that another proof be submitted when the water has been fully applied to a beneficial use, at which time license is issued for the amount of water actually in use. Information in regard to this last proof will be furnished on request.

Very truly yours,

CARL E. TAPPAN

State Reclamation Engineer
