Re: Field Examinations of Water Systems

Dear Water Right Owner:

You are one of five water right owners of individual water right permits serving property in Trails End Subdivision. I plan to conduct field exams of completed water delivery systems right after Labor Day of this year. The purpose of the field exams is to verify the completed development in order for this department to issue water right licenses, which represent the end product of your water right process.

Seven water right permits for five owners are involved. I already conducted the exam for Keithley's cabin (#77-07346). I also conducted the field work for the community system several years ago, so I am familiar with the site.

A field exam can be done for a permit in which the proof of beneficial use has been filed by the owner. The proof filing is your statement that the development has been completed. For domestic situations, you do not necessarily have to finish building the cabin. As long as you have completed a water delivery system and have made beneficial use of that water in a domestic setting such as camping etc., your domestic use will be recognized in the licensing process.

For example, a diversion system and a delivery line ending at your domestic site -- whether it be a cabin, an occasional use of a trailer or camping set up, or something similar -- can be licensed within your domestic permit.

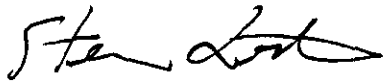

Proof has been filed for three permits. Proof is due within the next two years for three other permits. For the latter group, you may choose to file your proof right away if your development is completed as discussed above. The proof filing fee is \$50. Early filing of the proof of beneficial use will allow me to conduct all of the field exams at once, which will save the taxpayers quite a lot of money in the long run. Do not file your proof if your development is not completed as discussed above -- instead, use

August 4, 1999
Page 2

your remaining development time to complete your system before filing proof.

Please review the attached table and diagram and send your response to me as soon as possible. That will help me complete the necessary field work to advance your permit into a license, which will protect your water right and enhance the value of your property. Please call me at 334-2190 if you have any questions or concerns about this arrangement. Thank you very much for your help in this matter.

Sincerely,

If you have filed or are filing proof now so exams can be done:

- 1) See attached diagram with your lot(s) shown.
- 2) Send me a brief diagram that describes what your cabin or site looks like.
- 3) Include directions of how to locate your diversion point once I get to your lot. Indicate how water is conveyed from the diversion point to your cabin or other place of use (i.e., 50' of 2" buried pipe).
- 4) If your diversion is a portable pump, list the brand name, horsepower (hp) and serial number of the pump. If the portable pump is stored at the site but I will not be able to see it to read the pump tag, please provide your best recollection of at least the hp of the pump.

If I can identify your point of diversion, type of diversion, conveyance system from the diversion, place of use (cabin, camping spot etc.) and any hp etc. specs for pumps, the field exam will be completed and your license will be issued.

PROOF ACKNOWLEDGEMENT LETTER

RE: PERMIT NO. 77-07346

Dear Permit Holder:

The department acknowledges receipt of the proof of beneficial use form submitted for the above referenced permit. The next step in the process of developing a water right is for the department to conduct a field examination to determine and confirm the use being made of the water.

Please be advised that Section 42-248, Idaho Code, which became affective on July 1, 1996, requires you or the owner of this water right to maintain current ownership and address records on file with the department. Please contact any office of the department for the proper form to file a change of ownership of a water right and/or a change in the address of the owner. Failure to maintain current records with the department could result in the assessment of a monetary penalty.

If you have questions concerning the field examination, contact the WESTERN Regional Office in Boise, at (208)334-2190.

Sincerely,

PERMIT APPROVAL NOTICE

RE: PERMIT NO. 77-07346

Dear Permit Holder:

Enclosed is a copy of your approved application for permit. Please be sure to thoroughly review the "CONDITIONS/REMARKS:" listing on the permit.

Enclosed is a form entitled "Instructions for Proof of Beneficial Use". Please read the instructions carefully since you must take further action to develop this permit. Also enclosed is a form entitled "Proof of Beneficial Use". If your project is already completed you should complete and submit this form immediately.

Please note that a separate stream channel alteration permit must be obtained from the IDWR prior to any activity in the stream channel other than construction or maintenance of the diversion structure for your water right(s). Applications for stream channel alteration permits must be filed at least sixty days prior to the commencement of work in the stream.
