ACTION OF THE DEPARTMENT OF WATER RESOURCES

I, R. Keith Higginson, of the Department of Water Resources hereby approve the above Application for Amendment for Permit No. 77-07293 with the following;

CONDITIONS/REMARKS:

1. The maximum diversion volume is defined as the maximum allowable volume of water that may be diverted annually from the source under this right. The use of water confirmed by this right is limited to the amount which can actually be beneficially used. The maximum diversion volume may be adjusted to more accurately describe the beneficial use or to implement accepted standards of diversion and use efficiency.
2. This water right is appurtenant to the described place of use.
3. This right is subject to all prior water rights and may be forfeited by five years of non-use.
4. Modifications to or variance from this license must be made within the limits of Section 42-222, Idaho Code, or the applicable Idaho law.
5. When water used under this right is discharged into the natural channel, settling ponds must be maintained which are capable of reducing the silt load to such a level that the quality of water will not be impaired for other beneficial uses.
6. Water used under this right if discharged into a natural channel or subsurface system shall meet Idaho Water Quality Standards.
7. Mining use is for dust control in association with mining activities.

Witness my hand this 15th day of June, 1995.

CONDITIONS/REMARKS:

1. Proof of construction of works and application of water to beneficial use shall be submitted on or before **September 1, 1990.**
2. Subject to all prior water rights.
3. Prior to diversion and use of water under this permit, the permit holder shall comply with all bonding requirements of appropriate governmental entities.
4. The issuance of this permit in no way grants any right-of-way or easement across the land of another.
5. In the event that water used under this permit should be discharged into a natural channel, settling ponds will be required which are capable of reducing the silt load to such a level that the quality of the water would not be impaired for other beneficial uses.
6. Water used under this permit if discharged into a natural channel or subsurface system shall meet Idaho Water Quality Standards.
7. Use of water under this permit shall be non-consumptive.
8. A separate stream alteration permit from the IDWR is required for any activity in the stream channel other than construction and/or maintenance of the diversion structure. If your proposed construction or operation involves construction of an outfall or any other work in the stream channel other than the diversion, you must contact the Department and obtain a Stream Channel Alteration permit prior to the start of construction.

RE: Consumptive Use

=====

Application for Permit 77-07293 was filed for dust abatement purposes associated with a mine. Dust abatement is a consumptive use. Dust abatement requires application of the water to the ground, from which it evaporates. Nevertheless, permit 77-07293 was issued with a condition that the use of water be non-consumptive. The field examination confirmed the dust abatement use.

For two reasons, I recommend license 77-07293 be issued without the condition which limits the use to non-consumptive purposes. First, when the permit was issued the department knew that the intended use, dust abatement, would be consumptive. Therefore, the condition seems to have been imposed in error. Second, when the permit was approved there was no moratorium in place to limit approval of applications for consumptive uses.

RE: PERMIT NOS. 77-07285 AND 77-07293

Dear Water Right Holder(s):

The above referenced water rights are in the process of being reviewed for licensing. However, before licenses can be issued, your permits must be amended to correspond with the findings of the Department's field examiner.

The enclosed Applications for Amendment contain information that will be included on the licenses when issued. The amendment for water right no. 77-07285 reflects changes in the place of use description and in the nature of use. The amendment for water right no. 77-07293 reflects a change in the location of the places(s) of use description.

The last page of the Application for Amendment form contains a list of CONDITION/REMARKS proposed for the licenses when they are issued. These conditions/remarks may be modified upon further administrative review.

Please review carefully and if you concur, sign the amendments and return with the \$50.00 (each) filing fee within 14 days.

Thank you for your assistance and if you have any questions about this information, please contact me as soon as possible at (208)-327-7946.

Sincerely,

Shelley Walter Keen
Water Rights Supervisor

RE: Permit No. 77-07071

Dear Sirs:

Enclosed is an Order which voids the above referenced permit for failure to comply with the requirements of such permit and failure to show cause why such action should not be taken.

Please be advised that if you do not agree with the decision of the Department you may, within fifteen (15) days of receipt of the order voiding your permit, request a hearing before the Director. Failure to timely petition the Director within fifteen days of receipt of the order may prevent you from further contesting the voiding of your permit.

Respectfully,

JIM JOHNSON

System Description (continued)

3. Narrative: Description (As operating at time of measurement. Indicate pressure, number of sprinklers, etc.)

A small pool is created on unim. stream via a checkdam. A portable pump is used to fill tanks for dust control use on haul roads throughout mining area. The pump is similar to that in 77-07071 (same Road system, same method of operation, same tanks). Although pump was not at site in 5.3 during exam, the obvious pool's tank-filling area offered evidence of diversion water. The pump was in use at the preshow ck. site (p/d for 77-07071) during exam.

H. REMARKS AND OVERLAP REVIEW ANALYSIS

Mining use is for dust control on roads. This is ± same plan as 77-07071 with some additional roads in new permit. Plan also includes portions of M.S. 3246 in S.3 & S.34, M.S. 3039 in S.15.

Mining is for dust control.

This right, when combined with right 77-07071, shall not exceed 1.25 cfs. Diversion capacity (in both rights) is 4.09 cfs.

For apparent permit conditions are OK. Don't see any obvious violations of conditions.

Overlap - The only other right used for dust control on ± same roads is 77-07071 (mineral (h)). The other rights are either no longer valid or are other sources for other uses in mining-related operations in this area.

I. RECOMMENDATIONS

PROOF ACKNOWLEDGMENT LETTER

RE: PERMIT NO. 77-07293

Dear Permit Holder:

The department acknowledges receipt of the proof of beneficial use form submitted for the above referenced permit. The next step in the process of developing a water right is for the department to conduct a field examination to determine and confirm the use being made of the water.

If you have questions concerning this matter, please feel free to contact the WESTERN Regional Office in Boise at (208)334-2190.

Sincerely,

Rita Fleck

Department of Water Resources

Dear Mr. Higginson:

We are writing regarding Applications for Permit Nos. 77-7292, 77-7293, and 77-7294 filed by Hecla Mining Company to appropriate water for mining purposes.

The Forest Service will ask the Department of Justice to file claims to water rights for water in the East Fork of the South Fork of the Salmon River. The water is necessary for the Forest Service to provide suitable fisheries habitat to meet its obligations under Federal law, to protect the public interest in wildlife resources, and to meet its treaty responsibilities to the Columbia River Indian Tribes.

If the Applications are approved, it should be with the express understanding that senior water rights of the United States might reduce the amount of water available to the applicant. It should also be understood that the United States will protect the public's interest in anadromous fish habitat.

Please call if you have any questions.

Sincerely,

for J. S. Tixier

Publisher's Affidavit of Publication

STATE OF IDAHO

.SS

County of Valley

I, Maggie Aganew, being duly sworn and say, I am the receptionist of The Central Idaho Star-News, a weekly newspaper published at McCall, in the County of Valley, State of Idaho; that said newspaper is in general circulation in the county of aforesaid and is a legal newspaper; that the NOTICE OF APPLICATION FOR WATER RIGHT, a copy of which is enclosed hereto and is a part hereof, was published in said newspaper once a week for two consecutive weeks in the regular and entire issue of every number thereof during the period of time of publication, and was published in the newspaper proper and not in a supplement; and that publication of such notice began June 7, 1989, and ended June 14, 1989.

M. A. Aganew

Subscribed and sworn before me this the 15th day of June, 1989.

STATE OF IDAHO

COUNTY OF VALLEY

On this 15th day of June, in the year of 1989, before me, a Notary Public, personally appeared Maggie Aganew, known or identified to me to be the person whose name subscribed to the within instrument, and being by me first duly sworn, declared that the statements therein are true, and acknowledged to me that she executed the same.
