WATER RIGHT LICENSE

WATER RIGHT NO. 77-07201

Priority: June 28, 1983

Maximum Diversion Rate: 0.25 CFS
Maximum Diversion Volume: 27.5 AF

This is to certify, that COEUR D ALENE MINES CORP
2417 BANK DR STE 302
BOISE ID 83705

has complied with the terms and conditions
of the permit, issued pursuant to Application for Permit dated June 28, 1983; and
has submitted Proof of Beneficial Use on August 15, 1988. An examination indicates
that the works have a diversion capacity of .480 cfs of water from:

SPRING tributary to MULE CREEK

source, and a water right has been established as follows:

<u>BENEFICIAL USE</u>	<u>PERIOD OF USE</u>	<u>RATE OF DIVERSION</u>	<u>ANNUAL VOLUME</u>
MINING	01/01 to 12/31	0.25 CFS	25.7 AF
MINING STORAGE	01/01 to 12/31		1.8 AF
MINING FROM STORAGE	01/01 to 12/31		1.8 AF
DIVERSION TO STORAGE	01/01 to 12/31	0.25 CFS	
	Totals	0.25 CFS	27.5 AF

LOCATION OF POINT(S) OF DIVERSION:

SENWSW , Sec. 29, Township 19N, Range 11E
VALLEY County

PLACE OF USE: MINING

	SENE	NESW	NWSW
	SWSW	SESW	NESE
	NWSE	SWSE	SESE

PLACE OF USE: MINING FROM STORAGE, same as MINING use

CONDITIONS/REMARKS:

1. The maximum diversion volume is defined as the maximum allowable volume of water that may be diverted annually from the source under this right. The use of water confirmed by this right is limited to the amount which can actually be beneficially used. The maximum diversion volume may be adjusted to more accurately describe the beneficial use or to implement accepted standards of diversion and use efficiency.

OCT 25 1993

State of Idaho
Department of Water Resources**WATER RIGHT LICENSE**

WATER RIGHT NO. 77-07201

CONDITIONS/REMARKS:

2. This water right is appurtenant to the described place of use.
3. This right is subject to all prior water rights and may be forfeited by five years of non-use.
4. Modifications to or variance from this license must be made within the limits of Section 42-222, Idaho Code, or the applicable Idaho law.
5. The issuance of this right in no way grants any right-of-way or easement across the land of another.
6. When water used under this right is discharged into the natural channel, settling ponds must be maintained which are capable of reducing the silt load to such a level that the quality of water will not be impaired for other beneficial uses.
7. Water used under this right if discharged into a natural channel or subsurface system shall meet Idaho Water Quality Standards.
8. The total combined rate of diversion under this right and Right No. 77-07123 shall not exceed .48 cfs.
9. The diversion of water under this right may be affected by the agreement dated 12/7/1984.
10. Mining use is for multiple operations for gold extraction and dust control.

This license is issued pursuant to the provisions of Section 42-219, Idaho Code.
Witness the seal and signature of the Director, affixed at Boise, this 7th
day of September, 1993.

ACTION OF THE DEPARTMENT OF WATER RESOURCES

I, R. Keith Higginson, of the Department of Water Resources hereby approve the above Application for Amendment for Permit No. 77-07201 with the following;

CONDITIONS/REMARKS:

1. The maximum diversion volume is defined as the maximum allowable volume of water that may be diverted annually from the source under this right. The use of water confirmed by this right is limited to the amount which can actually be beneficially used. The maximum diversion volume may be adjusted to more accurately describe the beneficial use or to implement accepted standards of diversion and use efficiency.
2. This water right is appurtenant to the described place of use.
3. This right is subject to all prior water rights and may be forfeited by five years of non-use.
4. Modifications to or variance from this license must be made within the limits of Section 42-222, Idaho Code, or the applicable Idaho law.
5. The issuance of this right in no way grants any right-of-way or easement across the land of another.
6. When water used under this right is discharged into the natural channel, settling ponds must be maintained which are capable of reducing the silt load to such a level that the quality of water will not be impaired for other beneficial uses.
7. Water used under this right if discharged into a natural channel or subsurface system shall meet Idaho Water Quality Standards.
8. The total combined rate of diversion under this right and Right No. 77-07123 shall not exceed .48 cfs.
9. The diversion of water under this right may be affected by the agreement dated 12/7/1984.
10. Mining use is for multiple operations for gold extraction and dust control.

APPLICATION FOR PERMIT

To appropriate the public waters of the State of Idaho

APPROVED

1. Name of applicant Coeur d'Alene Mines Corporation Phone (208) 556-1121
Post office address 416 River Street Wallace Idaho 83873
2. Source of water supply Spring (unnamed) which is a tributary of Mule Creek
3. Location of point of diversion is SW $\frac{1}{4}$ of SW $\frac{1}{4}$ of Section 29 Township 19N
Range 11E B.M. VALLEY County, additional points of diversion if any: _____

4. Water will be used for the following purposes:

- Amount 1.04 cfs for Exploration, mining, processing and domestic purposes from Jan 1 to Dec 31 (both dates inclusive)
(cfs or acre-feet per annum) Allow 0.25*
- Amount 1.04 cfs for Diversion to Storage purposes from Jan 1 to Dec 31 (both dates inclusive)
(cfs or acre-feet per annum)
- Amount 10 AF for Storage for mining from purposes from Jan 1 to Dec 31 (both dates inclusive)
(cfs or acre-feet per annum)
- Amount 10 AF for Storage purposes from Jan 1 to Dec 31 (both dates inclusive)
(cfs or acre-feet per annum) 1.0 cfs Mining
5. Total quantity to be appropriated: 1.0 cfs *per agreement of 12/7/1984- kw
Allow 0.25 cfs*
- a. 1.0 cubic feet per second and/or b. 10 acre-feet per annum.

6. Proposed diverting works:

- a. Description of ditches, flumes, pumps, headgates, etc. Spring box with pumping to storage tank
- b. Height of storage dam 8 feet, active reservoir capacity 10 acre-feet; total reservoir capacity 10 acre-feet, materials used in storage dam: Earthfill
Period of year when water will be diverted to storage Jan 1 to Dec 31 inclusive.
(Month/Day) (Month/Day)
- c. Proposed well diameter is _____ inches; proposed depth of well is _____ feet.
7. Time required for the completion of the works and application of the water to the proposed beneficial use is 5 years (minimum 1 year - maximum 5 years).

8. Description of proposed uses:

- a. If water is not for irrigation:
- (1) Give the place of use of water: SW $\frac{1}{4}$ of SW $\frac{1}{4}$ of Section 29 Township 19N
Range 11E B.M.
- (2) Amount of power to be generated: _____ horsepower under _____ feet of head.
- (3) List number of each kind of livestock to be watered _____
- (4) Name of municipality to be served _____, or number of families to be supplied with domestic water _____.
- (5) If water is to be used for other purposes describe: Exploration, mining, processing and domestic use as needed in the development and operation of a mining property.

MAY 1984

b. If water is for irrigation, indicate acreage in each subdivision in the tabulation below:

TWP	RANGE	SEC.	NE¼				NW¼				SW¼				SE¼				TOTALS
			NE¼	NW¼	SW¼	SE¼	NE¼	NW¼	SW¼	SE¼	NE¼	NW¼	SW¼	SE¼	NE¼	NW¼	SW¼	SE¼	

Total number of acres to be irrigated _____

c. Describe any other water rights used for the same purposes as described above. _____

9. a. Who owns the property at the point of diversion United States Forest Service

b. Who owns the land to be irrigated or place of use United States Forest Service

c. If the property is owned by a person other than the applicant, describe the arrangement enabling the applicant to make this filing Mineral Claims that are under lease, owned by, or otherwise controlled by Coeur d'Alene Mines Corporation.

10. Remarks _____

ACTION OF THE DIRECTOR, DEPARTMENT OF WATER RESOURCES

This is to certify that I have examined Application for Permit to appropriate the public waters of the State of Idaho No. 77-7201, and said application is hereby APPROVED.

1. Approval of said application is subject to the following limitations and conditions:

a. SUBJECT TO ALL PRIOR WATER RIGHTS.

b. Proof of construction of works and application of water to beneficial use shall be submitted on or before January 1, 19 90.

c. The rate of diversion, if water is to be used for irrigation under this permit, when combined with all other water rights for the same land shall not exceed 0.02 cubic feet per second for each acre of land.

d. Other: Permit holder shall commence the excavation or construction of diverting works within one year of the date this permit is issued and shall proceed diligently until the project is complete.

The issuance of this permit in no way grants any right-of-way or easement across the land of another.

In the event that water used under this permit should be discharged into a natural channel, settling ponds will be required which are capable of reducing the silt load to such a level that the quality of the water would not be impaired for other beneficial uses.

Water used under this permit if discharged into a natural channel or subsurface system shall meet Idaho Water Quality Standards.

No more than 0.25 cfs may be diverted under this permit and the combined diversion of this permit and permit nos. 77-7124 and 77-7129 shall not exceed 0.50 cfs.

The diversion of water under this permit may be affected by the agreement dated 12/07/1984.

Witness my hand this 22nd day of January, 1985.

AMEND ☒

MEMORANDUM

TO: FILES

FROM: STEVE LESTER

DATE: FEBRUARY 21, 1992

SUBJECT: EXAMS FOR PERMITS 77-07123 -07124 -07129 -07201 -07211 -07217

These permits for the mining operations at Thunder Mtn. Mine should be reviewed together. The examiner did a good job of describing these and making recommendations.

Note condition of approval that rights -07124 -07129 -07201 should not exceed .50 cfs when combined. Likewise, rights -07123 -07201 should not exceed .48 cfs (use of same pump at different locations means capacity limitation).

Storage occurs at the Fire Water pond location and equals two ponds for 1.8 af. Water is diverted from several surface water sources and several wells to the pond system. Pond water is then withdrawn for a variety of mining uses. All rights with storage recommendations should reflect the storage capacity not to exceed 1.8 af. Storage is determined on the 24-hr. rule. Storage occurs in SESW S.21 per topo in -07211.

It is debatable if wells should include storage but appears that they should. If not, perhaps another method to estimate mining volume requirement (Vr) would be needed.

To estimate mining Vr, I used available information as shown in -07124. About five loads per day (5 loads for each truck) formed the basis of the estimate. This seems reasonable based on examining similar mining sites. This method was used for the wells even though well water is not used to fill trucks. No other information is available, and it seems reasonable to use this method to estimate mining Vr, which is a crude estimate under the best of circumstances.

Domestic P/U was determined from the topo and typed notes ("overview"). Domestic use does not occur in all of the mining tracts.

The area is an unsurveyed site. Amendments for P/D and P/U should not require a fee because of this. However, other amendments will require a fee (N/U).

42-211 requires a fee. 5.5.

For all of the permits, proof of b.u. was filed in 1988 and SRBA claims are not required.

BOISE, ID 83705

OVERVIEW OF ALL WATER RIGHTS AS OF 8-17-1989

Coeur-Thunder Mountain, as of this date, has seven water rights. Field exams were completed in 1988 for permits (77-7123, 77-7124, 77-7129, and 77-7201). Permits (77-7211 and 77-7217) were examined in 1988 but after the examination it was determined that additional P/Ds needed to be added to these permits and therefore they were reexamined on 8-17-1989. One permit, (77-7127), is waiting for the Proof of Beneficial Use to be filed. Proof is due in 1990.

As all rights are used in the mining operations and at times overlap in use, this is an overview of all rights as a system. Field notes are included in the individual files as to the conditions that existed at exam time and this is not to replace the notes but to condense and summarize them.

There are two major mining systems, one utilizes the fire water pond and concerns the removal of gold from the ore, and the second relates to the crushing operation. The domestic use is also divided into two different P/U locations with the sources coming from different permits. The original system description below is followed by the revised system description as was found on 8-17-89.

A COPY OF THE ORIGINAL REPORT FOUND IN 77-7124
(this is an overall system description)

Water is initially stored in a plastic lined pit divided into two parts. One portion holds 30,000 gal and acts as a settling pond for any runoff entering the system. The main pond holds 550,000 gal. (volume is from engineers report for Thunder Mtn). The pond is referred to as the "Fire Water Pond".

Water is then used from the pond on the heap leach (chemical extraction process), in the milling operations, to agglomerate the ore, and for dust abatement.

Water from permits 77-7201, 77-7123, 77-7217, 77-7129, and 77-7124 are used in this manner. Delivery from each P/D is described in it's respective field report.

No domestic use was found for the above permits.

Permit 77-7211 is for domestic use but the overflow dumps into the fire water pond. Normal operation is to shut the pump off before water reaches the overflow spout.

END OF REPORT COPY.

OCT 25 1993

DOMESTIC USE REVIEW

Domestic use is covered by permits 77-7211 and 77-7217. Both permits have multiple P/Ds and also cover mining uses.

Permit 77-7211 supplies water from a well to the domestic use located near the office complex. This use is documented in the original field report dated 8-19-1988. That report is for supplemental use only as the field report dated 8-17-1989 covers the system as it exists now.

Permit 77-7217 supplies water from a well to a 50 man camp site located approximately one mile southwest of the office complex. This is not the camp site described in the report for 77-7211. The original notes are found on a supplemental sheet labeled "Golden Eagle".

PERMITS UTILIZING WATER TRUCKS AS THE PRIMARY METHOD OF CONVEYANCE

Permit 77-7124	aka	Monumental Creek Diversion
77-7129	aka	Coon Creek Diversion
77-7201	aka	Spring to Mule Creek
77-7123	aka	Sunny Side Creek Diversion

These permits utilize portable pumps to fill water trucks which then either dump the water on the road for dust control or into the Fire Water Pond for use in the extraction process.

MILLING AND CRUSHING OPERATIONS

The extraction process primarily consists of sprinkling a chemically treated water solution over crushed ore that has been placed on a water tight mat. The solution is recirculated until it is determined that the maximum extraction has been achieved. The "pregnant" solution is then routed to the lab and the remaining ore is treated with another solution to neutralize to stockpile.

The water use for the milling operation is primarily to maintain the ore at a specific water content and to aid in the agglomeration of the ore.

RECEIVED
OCT 25 1993

SUPPLEMENTAL REVIEW OF PERMIT 77-7211

This permit consists of five different wells. At exam time there were only two wells under this permit with pumps installed but as the normal mining operations shift locations the use of different wells is called for. Rotating pumps between between the wells covered under both permits is the standard practice. I am recommending all the wells be considered for licensing as P/Ds, conditioned so that the combined total diversion from each of the wells in use does not exceed the recommended diversion rate.

WELL #	LEGAL DESCRIPTION	ALSO KNOWN AS	WELL USES

WELL MEASURED

2	0.14 CFS (a 10 hp pump)
5	0.17 CFS (a 10 hp pump)

All the above wells are currently used in connection with the extraction process and dust abatement rather than the crushing operations.

Permit is for: Domestic at 0.12 CFS
Mining at 0.38 CFS for a total of 0.50 CFS
Fees paid for: ----- 1.00 CFS MAX

Found: Domestic: main camp, cook shack, office, and lab
Mining: multiple operations for gold extraction and dust control
Domestic diversion: 0.17 CFS (well # 5)
Total diversion rate: 0.31 CFS (wells # 2 and 5)

RECEIVED
OCT 25 1993

SUPPLEMENTAL REVIEW OF PERMIT 77-7217

This permit consists of six wells with the use being both domestic and mining. As with 77-7211, this permit had wells with no pumps installed at exam time. The same rational used with 77-7211 is considered here. I recommend that all six wells be considered as P/Ds and be licensed with the condition that the total diversion from all wells used shall not exceed the licensed rate.

WELL #	LEGAL DESCRIPTION	ALSO KNOWN AS

OVERALL VIEW OF MINING USES FOR COUER-THUNDER MOUNTIAN WATER RIGHTS:

WATER INITIALLY IS STORED IN A PLASTIC LINED PIT DIVIDED INTO TWO PARTS. ONE PORTION HOLDS 30,000 GAL AND ACTS AS A SETTLING POND FOR ANY RUNOFF ENTERING THE SYSTEM. THE MAIN POND HOLDS 550,000 GAL. (VOLUME IS FROM ENGINEERS REPORT FOR THUNDER MTN) POND IS REFERRED TO AS THE "FIREWATER" POND.

WATER IS THEN USED FROM THE POND ON THE HEAP LEACH (CHEMICAL EXTRACTION PROCESS), IN THE MILLING OPERATIONS, TO AGGLOMERATE THE ORE, AND FOR DUST CONTROL.

WATER FROM PERMITS 77-7201, 77-7123, 77-7217, 77-7129, AND 77-7124 ARE USED IN THIS MANNER. DELIVERY FROM EACH P/D IS DESCRIBED IN ITS RESPECTIVE FIELD REPORT.

NO DOMESTIC USE WAS FOUND FOR THE ABOVE PERMITS.

PERMIT 77-7211 IS FOR DOMESTIC USE BUT THE OVER FLOW DUMPS INTO THE FIRE WATER POND. NORMAL OPERATION IS TO SHUT THE PUMP OFF BEFORE WATER REACHES THE OVERFLOW SPOUT.

RE: PERMIT NO. 77-7201

DEAR PERMIT HOLDER:

ENCLOSED IS A COPY OF YOUR APPROVED APPLICATION FOR PERMIT. WE DIRECT YOUR ATTENTION TO THE CONDITIONS OF APPROVAL ON THE FOURTH PAGE.

THE 1982 IDAHO LEGISLATURE ADDED A REQUIREMENT THAT AS A PERMIT HOLDER YOU MUST COMMENCE THE EXCAVATION OR CONSTRUCTION OF DIVERTING WORKS WITHIN ONE YEAR OF THE DATE THE PERMIT WAS ISSUED, AND YOU MUST PROCEED DILIGENTLY UNTIL THE PROJECT IS COMPLETED. THE ENCLOSED BLUE CARD MUST BE COMPLETED AND RETURNED TO THIS OFFICE AS SOON AS YOU COMMENCE CONSTRUCTION, NO LATER THAN ONE YEAR FROM THE DATE THE PERMIT WAS APPROVED.

WE HAVE ENCLOSED INSTRUCTIONS ENTITLED "MAKING PROOF OF BENEFICIAL USE". PLEASE READ THE INSTRUCTIONS CAREFULLY SINCE YOU MUST TAKE FURTHER ACTION TO DEVELOP THIS PERMIT INTO A LICENSE.

SINCERELY,

DAVID R. TUTHILL, JR., P.E.

Dear Mr. Shaw:

We are writing with regard to Application for Permit No. 77-7201, filed by Coeur d'Alene Mines, which we protested in September 1983. We have met with the applicant and resolved the protest per the enclosed agreement. We therefore withdraw our protest subject to the conditions of the agreement. Please reference the agreement in the application upon approval.

Sincerely,

J. S. Tixier

**SUMMARY OF MEETING TO RESOLVE WATER RIGHT PROTESTS
APPLICATION NO.'S 77-7201 AND 77-7194**

A meeting was held at the McCall office of the Idaho Fish And Game Department on November 30, 1984 to discuss the protest of water right applications 77-7201 (protested by the U.S. Forest Service) and application 77-7194 (protested by the Idaho Department of Fish And Game). Application 77-7201 is to divert 1.02 CFS from a tributary to Mule Creek, application 77-7194 is to divert 2.0 CFS from the South Fork of Holy Terror Creek. Both applications were submitted by Coeur D'Alene Mines. Proposed use of the water includes mining and domestic use. Present at the meeting were:

Frank Monninger	Coeur D'Alene Mines
Dave Lee	Coeur D'Alene Mines
Rick Richins	James H. Montgomery Engineering
Don Anderson	Idaho Dept. of Fish and Game
Stacy Gebhards	Idaho Dept. of Fish and Game
Ken Weyers	Payette National Forest
Earl Kimball	Payette National Forest
John Lund	Payette National Forest
Dave Burns	Payette National Forest
Bob Kenworthy	Payette National Forest
Walter Pierson	Payette National Forest

The discussion centered around Coeur's need for approximately 0.5 CFS to supplement ground water sources during dry periods. The Forest Service expressed concern over minimum flows for fish habitat and channel maintenance purposes. An additional concern was the proposal to store water (10 acre-feet) on an unstable area. Fish and game was similarly concerned with adequate flows to protect the fishery resource.

After a short discussion the following agreement was reached:

i. Coeur proposed to withdraw water rights previously applied for on four streams in addition to South Fork Holy Terror Creek. These streams are listed below.

<u>Stream</u>	<u>Application No.</u>	<u>Proposed Appropriation</u>
Divide Creek	77-7125	2.0 CFS
Marble Creek	77-7126	2.0 CFS
Fall Creek	77-7128	2.0 CFS
Roosevelt Lake	77-7130	4.0 CFS
South Fork Holy Terror	77-7194	2.0 CFS

RECEIVED
JAN 31 1985

Department of Water Resources
Western Regional Office

RECEIVED

2. Coeur will reduce its water rights applications to the streams listed below with a reduction in water quantity to the proposed appropriation as indicated. (Listed by priority)

<u>Stream</u>	<u>Application No.</u>	<u>Revised Appropriation</u>
Sunnyside Creek	77-7123	0.50 CFS
Mule Creek Spring	77-7201	0.25 CFS
Monumental Creek	77-7124	0.50 CFS
Coon Creek	77-7129	0.25 CFS
Cornish Creek	77-7127	0.25 CFS

3. Coeur will condition the permits for the streams listed in #2 above to a maximum, total withdrawal of 0.5 CFS from the Monumental Creek Drainage (Mule, Coon, Monumental Creeks) and 0.5 CFS from the Marble Creek Drainage (Sunnyside Creek and Cornish Creek).

4. Water will be diverted from only one stream at a time.

5. The U.S. Forest Service, The Idaho Department of Fish and Game, and Coeur D'Alene Mines mutually agree to conditions 1-4 listed above. The U.S. Forest Service will drop the protest for application #77-7201 (Mule Creek) under conditions 1-4 described above.

Dated this 7 day of December, 1984.

<u>Stream</u>	<u>Application No.</u>	<u>Revised Appropriation</u>
Sunnyside Creek	77-7123	0.50 CFS
Mule Creek Spring	77-7201 ✓	0.25 CFS
Monumental Creek	77-7124	0.50 CFS
Coon Creek	77-7129	0.25 CFS
Cornish Creek	77-7127	0.25 CFS

3. Coeur will condition the permits for the streams listed in #2 above to a maximum, total withdrawal of 0.5 CFS from the Monumental Creek Drainage (Mule, Coon, Monumental Creeks) and 0.5 CFS from the Marble Creek Drainage (Sunnyside Creek and Cornish Creek).

4. Water will be diverted from only one stream at a time.

5. The U.S. Forest Service, The Idaho Department of Fish and Game, and Coeur D'Alene Mines mutually agree to conditions 1-4 listed above. The U.S. Forest Service will drop the protest for application #77-7201 (Mule Creek) under conditions 1-4 described above.

Dated this 7 day of December, 1984.

BEFORE THE DIRECTOR OF THE DEPARTMENT OF WATER RESOURCES
OF THE
STATE OF IDAHO

IN THE MATTER OF APPLICATIONS FOR PERMIT NO.) NOTICE OF COMBINED
77-7194 AND NO. 77-7201 IN THE NAME OF) HEARINGS AND/OR
COEUR D'ALENE MINES) CONFERENCES

On June 24 and June 28, 1983, Coeur d'Alene Mines filed with the Department of Water Resource applications to appropriate the public waters of the State of Idaho. On August 4, 1983, the Department received protest against approval of permit No. 77-7194 from Stacy Gebhards, Regional Supervisor, Idaho Department of Fish and Game. On September 30, 1983, the Department received protest from T. A. Roederer, Deputy Regional Forester, U. S. Dept. of Agriculture, Forest Service. on 77-7201.

The Department has set the matter of protests for a combined hearing for Monday, December 3, 1984, 10:00 a.m., in the State Tower Building, Department of Water Resources, Third Floor Conference Room, 450 W. State St., Boise, ID., 83720. The hearings will be held in accordance with provisions of Chapter 2, Title 42, and Chapter 52, Title 67, of the Idaho Code and adopted Rules of Practice and Procedure of the Department of Water Resources. Opportunity shall be afforded all parties to respond and present evidence and argument on all issues involved. A pre-hearing conference may be held beginning at the above set time and prior to the hearing.

Dated this 14 day of November, 1984

DAVID B. SHAW
Western Regional Supervisor

RECEIVED
NOV 14 1984

CONFERENCE AND HEARING INFORMATION
IN THE MATTER OF APPROVAL OF AN APPLICATION FOR PERMIT

In accordance with Idaho Code, Section 42-203, the following issues are involved in the consideration of the application and protest(s):

1. Will the proposed use reduce the quantity of water under existing water rights?
2. Is the proposed water supply insufficient for the purpose intended?
3. Is the application made in good faith or for delay or speculative purposes?
4. Has the applicant sufficient financial resources with which to complete the project?
5. Will the proposed use conflict with the local public interest?

Any party may request in writing five (5) days before any hearing that the oral proceedings thereof be taken in the form of stenographic notes at the expense of the requesting party. Any party may have such stenographic notes of the oral proceedings, or part thereof, transcribed at his own expense. A taped record of the proceedings will be maintained for the appeal period.

If the hearing is conducted by a hearing officer appointed by the Director, rather than the Director himself, a proposed decision will be submitted to the parties and the parties may be afforded an opportunity to file exceptions to the proposed decision and present briefs and oral arguments to the Director prior to the issuance of a final decision by the Director. This procedure is required by Idaho Code, Section 42-1701A.

The parties by written stipulation may waive their right to a proposed decision, however, the failure of either party to waive a proposed decision will not prejudice the Director's review of a party's evidence and arguments. However, such a waiver will shorten the decision-making process and may expedite substantially the issuance of a final decision. Whether compliance with Section 42-1701A is waived will not affect a party's right to petition for a rehearing of the final decision pursuant to Rule 11 of the Department's Rules of Practice and Procedure or affect a party's right to appeal the final decision to the district court.

Under the provisions of Idaho Code, Sections 42-1701A and 67-5215, any court review of the Department's decision on appeal shall be confined to the record created before the Department.

Failure to appear at the time and place set for hearing by the applicant or protestant(s) may allow the Department to dismiss without prejudice the protest(s) or the application. Any and all cost incurred by reason of such non-appearance may be assessed against such non-appearing parties.

Subject: Thunder Mountain Water Right Applications for Permits

Dear Dave:

As you are aware, Coeur Explorations, Inc. (Coeur d'Alene Mines Corporation) is proceeding with the design and construction of a 450,000 to 500,000 tons/year production schedule at their Thunder Mountain project near Stibnite, Idaho.

Currently, the following Applications for Permit are being held in obedience by the Department:

77-7194
7201 A.F.P. Nos. 77-7123, 77-7124, 77-7125, 77-7126, 77-7127, 77-7128, 77-7129, 77-7130 and South Fork Holy Terror Creek and Mule Creek (spring source).

7158 - power

The applications were placed on hold due to objections by the IDF&G concerning withdrawals and potential fisheries impacts, and the fact that Coeur is conducting a detailed groundwater supply study at the site, and feasibility studies related to processing needs.

This letter is to inform the Department that Coeur plans on finalizing the groundwater supply study by the end of November, and at that time desires to move ahead with the administrative process required to resolve the pending applications during the month of December. The groundwater supply data and testing results, in combination with the water needs evaluation on the results of Hydrology and Fisheries baseline reports prepared for the project will, in our opinion, provide the necessary level of information necessary to process the application.

Subject: Thunder Mountain Water Rights Applications

Dear Mr. Shaw:

In reference to Water Rights Application for Permit 77-7201, please be advised that Coeur d'Alene Mines Corporation (CDA Mines) is currently completing a comprehensive water supply needs evaluation, metallurgical testing, and instream flow studies to determine actual mining and process facilities requirements and domestic water supply needs. These studies are scheduled for completion in November, 1983. At that time, CDA Mines would be prepared to enter into negotiations to resolve the pending protest.

This letter will also serve to confirm my September telephone notification related to the South Fork Holy Terror Water Rights Application for Permit protest (77-7194). As I indicated during our conversation, CDA Mines wishes to include this Application in the overall negotiations package. A detailed proposal is forthcoming later this month or early November.

Sincerely,

Rick Richins

Gentlemen:

Enclosed is a copy of a protest(s) filed against the issuance of a permit pursuant to your Application No. 77-7201. The Department suggests you contact the protestant(s) directly in an effort to determine the nature of the protest(s) and to attempt to resolve the protest(s).

If this office has not been advised within twenty (20) days that the protest(s) has been resolved, the matter will be scheduled for conference and/or hearing. At such a conference and/or hearing, the following are the principle items the Department can consider in either approving or denying the application for permit (Section 42-203, Idaho Code):

1. Will the proposed use reduce the quantity of water under existing water rights?
2. Is the proposed water supply insufficient for the purposes intended?
3. Is the application made in good faith or for delay or speculative purposes?
4. Has the applicant sufficient financial resources with which to complete the project?
5. Will the proposed use under this permit conflict with the local public interest?

If this office can be of further assistance, please contact us.

Yours truly,

DAVID B. SHAW
Western Regional Supervisor

SEP 28 1983

Mr. David B. Shaw
Western Region Supervisor
Idaho Department of Water Resources
Towers Building, 3rd Floor
450 West State Street
Boise, ID 83720

Dear Mr. Shaw:

We are writing you concerning Application for Permit No. 77-7201. The application was filed by Coeur D'Alene Mines Corporation to divert 1 cfs from a spring tributary to Mule Creek, impound the diverted water in a 10 acre foot pond, and use the water for mining and domestic purposes.

Mule Creek is a tributary to Monumental Creek, which contains a resident and anadromous fishery, is used heavily by recreationists, and is within the River of No Return Wilderness below Mule Creek. Points of diversion and use of this application are on National Forest land at the headwaters of Mule Creek within or near an identified landslide area.

The United States has nonconsumptive federal water rights on Mule Creek and Monumental Creek. These federal water rights are for the purpose of securing favorable conditions of water flow as identified in the Organic Act of 1897 and for the purposes of protecting and maintaining fishery and recreational resources as required by the Multiple Use Sustained Yield Act of 1960. Priority dates for these water rights are December 27, 1919, and June 12, 1960, respectively. Quantification of the nonconsumptive federal water rights for the affected streams has not been determined.

If implemented, the applicants proposal could seriously reduce flows in Mule Creek. The proposal also has the potential to add to the instability of the area and jeopardize downstream water quality, fishery, and recreation values.

We are, therefore, requesting that Application for Permit No. 77-7201 be denied.

Sincerely,

for 
T. A. ROEDERER
Deputy Regional Forester

Dear Mr. Mays:

Enclosed is a copy of the above referenced application for permit which may be of interest to your agency. Please review the application and submit any comments you may have.

This office normally completes the processing of an application within a six-week period and is required to take final action shortly thereafter, however, if your agency desires to file a formal protest against the approval of this application, your written protest must be received in this office by September 26, 1983.
~~October 3~~

If you have any questions regarding the application, please contact this office.

Sincerely,

DAVID B. SHAW
