WATER RIGHT LICENSE
WATER RIGHT NO. 77-07124

Priority: April 16, 1981

Maximum Diversion Rate: 0.50 CFS
Maximum Diversion Volume: 27.5 AF

This is to certify, that THUNDER MOUNTAIN GOLD INC
301 S CHESTNUT STE 7
SPOKANE WA 992040970 has complied with the terms and conditions
of the permit, issued pursuant to Application for Permit dated April 16, 1981; and
has submitted Proof of Beneficial Use on August 15, 1988. An examination indicates
that the works have a diversion capacity of 13.400 cfs of water from:

MONUMENTAL CREEK tributary to BIG CREEK

source, and a water right has been established as follows:

<u>BENEFICIAL USE</u>	<u>PERIOD OF USE</u>	<u>RATE OF DIVERSION</u>	<u>ANNUAL VOLUME</u>
MINING	01/01 to 12/31	0.50 CFS	25.7 AF
MINING STORAGE	01/01 to 12/31		1.8 AF
MINING FROM STORAGE	01/01 to 12/31		1.8 AF
DIVERSION TO STORAGE	01/01 to 12/31	0.50 CFS	
	Totals	0.50 CFS	27.5 AF

LOCATION OF POINT(S) OF DIVERSION:

NESW , Sec. 25, Township 19N, Range 10E
VALLEY County

PLACE OF USE: MINING

PLACE OF USE: MINING FROM STORAGE, same as MINING use

CONDITIONS/REMARKS:

1. The maximum diversion volume is defined as the maximum allowable volume of water that may be diverted annually from the source under this right. The use of water confirmed by this right is limited to the amount which can actually be beneficially used. The maximum diversion volume may be adjusted to more accurately describe the beneficial use or to implement accepted standards of diversion and use efficiency.

DEC 03 1993

State of Idaho
Department of Water Resources**WATER RIGHT LICENSE**

WATER RIGHT NO. 77-07124

CONDITIONS/REMARKS:

2. This water right is appurtenant to the described place of use.
3. This right is subject to all prior water rights and may be forfeited by five years of non-use.
4. Modifications to or variance from this license must be made within the limits of Section 42-222, Idaho Code, or the applicable Idaho law.
5. The issuance of this right in no way grants any right-of-way or easement across the land of another.
6. When water used under this right is discharged into the natural channel, settling ponds must be maintained which are capable of reducing the silt load to such a level that the quality of water will not be impaired for other beneficial uses.
7. Water used under this right if discharged into a natural channel or subsurface system shall meet Idaho Water Quality Standards.
8. The total combined rate of diversion under this right and Right No. 77-07129 shall not exceed .50 cfs.
9. The diversion of water under this right may be affected by the agreement dated 12/7/1984.
10. Mining use is for multiple operations for gold extraction and dust control.

This license is issued pursuant to the provisions of Section 42-219, Idaho Code, Witness the seal and signature of the Director, affixed at Boise, this 17th day of NOVEMBER, 1993.

APPROVED

To appropriate the public waters of the State of Idaho

1. Name of applicant Canadian Superior Mining (U.S.) Ltd. Phone (509) 624-4211

Post office address P. O. Box 385, Spokane, Washington 99210

2. Source of water supply Monumental Creek which is a tributary of Big Creek

3. Location of point of diversion is SE $\frac{1}{4}$ of NE $\frac{1}{4}$ of Section 24 Township 19N

Range 10E B.M. Valley County, additional points of diversion if any: _____

NE 1/4 of SE 1/4 of Section 24, Township 19N, Range 10E

4. Water will be used for the following purposes:

10 AF	Mining storage	1/1	12/31	
Amount <u>10 AF</u> for <u>Mining f/Storage</u> purposes from <u>1/1</u> to <u>12/31</u> (both dates inclusive)				
(cfs or acre-feet per annum)				
10 AF	Domestic Storage	1/1	12/31	
Amount <u>10 AF</u> for <u>Domestic f/Storage</u> purposes from <u>1/1</u> to <u>12/31</u> (both dates inclusive)				
(cfs or acre-feet per annum)				
Allow <u>0.50 cfs*</u>				
Amount <u>1.64 cfs</u> for <u>Mining</u> purposes from <u>1/1</u> to <u>12/31</u> (both dates inclusive)				
(cfs or acre-feet per annum)				
Amount <u>.36 cfs</u> for <u>Domestic</u> purposes from <u>1/1</u> to <u>12/31</u> (both dates inclusive)				
(cfs or acre-feet per annum)				

5. Total quantity to be appropriated:

Allow 0.50 cfs*

*per agreement of 12/7/1984 - kw

a. -2- cubic feet per second and/or b. 10 acre-feet per annum.

6. Proposed diverting works:

a. Description of ditches, flumes, pumps, headgates, etc. DAM, pump, Pipeline

b. Height of storage dam 8 feet, active reservoir capacity 10 acre-feet; total reservoir capacity 10 acre-feet, materials used in storage dam: earthfill

Period of year when water will be diverted to storage May 1 to Oct. 1 inclusive.
(Month/Day) (Month/Day)

c. Proposed well diameter is _____ inches; proposed depth of well is _____ feet.

7. Time required for the completion of the works and application of the water to the proposed beneficial use is 5 years (minimum 1 year - maximum 5 years).

8. Description of proposed uses:

a. If water is not for irrigation:

(1) Give the place of use of water: _____ $\frac{1}{4}$ of NW $\frac{1}{4}$ of Section 29 Township 19N
Range 11E B.M.

(2) Amount of power to be generated: _____ horsepower under _____ feet of head.

(3) List number of each kind of livestock to be watered _____

(4) Name of municipality to be served _____, or number of families to be supplied with domestic water 100.

(5) If water is to be used for other purposes describe: mining and milling of local mineral ore.

DEPARTMENT OF WATER RESOURCES

DEPARTMENT OF AGRICULTURE

b. If water is for irrigation, indicate acreage in each subdivision in the tabulation below:

TWP	RANGE	SEC.	NE¼				NW¼				SW¼				SE¼				TOTALS
			NE¼	NW¼	SW¼	SE¼	NE¼	NW¼	SW¼	SE¼	NE¼	NW¼	SW¼	SE¼	NE¼	NW¼	SW¼	SE¼	

Total number of acres to be irrigated _____

c. Describe any other water rights used for the same purposes as described above. _____

Application for water rights on Coon Creek, Divide Creek, Fall Creek, Cornish
Creek, Sunnyside Creek, Marble Creek, and Roosevelt Lake

9. a. Who owns the property at the point of diversion United States Forest Service

b. Who owns the land to be irrigated or place of use United States Forest Service

c. If the property is owned by a person other than the applicant, describe the arrangement enabling the
applicant to make this filing Mineral claims are under lease to or owned by
Canadian Superior Mining

10. Remarks The entire township and range are within the boundaries of the Idaho
Primitive Area and is unsurveyed.

ACTION OF THE DIRECTOR, DEPARTMENT OF WATER RESOURCES

This is to certify that I have examined Application for Permit to appropriate the public waters of the State of Idaho No. 77-7124, and said application is hereby APPROVED.

1. Approval of said application is subject to the following limitations and conditions:

a. SUBJECT TO ALL PRIOR WATER RIGHTS.

b. Proof of construction of works and application of water to beneficial use shall be submitted on or before January 1, 19 90.

c. The rate of diversion, if water is to be used for irrigation under this permit, when combined with all other water rights for the same land shall not exceed 0.02 cubic feet per second for each acre of land.

d. Other: Permit holder shall commence the excavation or construction of diverting works within one year of the date this permit is issued and shall proceed diligently until the project is complete.

The issuance of this permit in no way grants any right-of-way or easement across the land of another.

In the event that water used under this permit should be discharged into a natural channel, settling ponds will be required which are capable of reducing the silt load to such a level that the quality of the water would not be impaired for other beneficial uses.

Water used under this permit if discharged into a natural channel or subsurface system shall meet Idaho Water Quality Standards.

No more than 0.50 cfs may be diverted under this permit and the combined diversion of this permit and permit nos. 77-7201 and 77-7129 shall not exceed 0.50 cfs.

The diversion of water under this permit may be affected by the agreement dated 12/07/1984.

Witness my hand this 22nd day of January, 1985.

MEMORANDUM

TO: FILES

FROM: STEVE LESTER

DATE: FEBRUARY 21, 1992

SUBJECT: EXAMS FOR PERMITS 77-07123 -07124 -07129 -07201 -07211 -07217

These permits for the mining operations at Thunder Mtn. Mine should be reviewed together. The examiner did a good job of describing these and making recommendations.

Note condition of approval that rights -07124 -07129 -07201 should not exceed .50 cfs when combined. Likewise, rights -07123 -07201 should not exceed .48 cfs (use of same pump at different locations means capacity limitation).

Storage occurs at the Fire Water pond location and equals two ponds for 1.8 af. Water is diverted from several surface water sources and several wells to the pond system. Pond water is then withdrawn for a variety of mining uses. All rights with storage recommendations should reflect the storage capacity not to exceed 1.8 af. Storage is determined on the 24-hr. rule. Storage occurs in SESW S.21 per topo in -07211.

It is debatable if wells should include storage but appears that they should. If not, perhaps another method to estimate mining volume requirement (Vr) would be needed.

To estimate mining Vr, I used available information as shown in -07124. About five loads per day (5 loads for each truck) formed the basis of the estimate. This seems reasonable based on examining similar mining sites. This method was used for the wells even though well water is not used to fill trucks. No other information is available, and it seems reasonable to use this method to estimate mining Vr, which is a crude estimate under the best of circumstances.

Domestic P/U was determined from the topo and typed notes ("overview"). Domestic use does not occur in all of the mining tracts.

- * The area is an unsurveyed site. Amendments for P/D and P/U should not require a fee because of this. However, other amendments will require a fee (N/U).

For all of the permits, proof of b.u. was filed in 1988 and SRBA claims are not required.

* No basis for this comment, disregard. BC

COEUR-THUNDER MOUNTAIN INC.
2417 BANK DR. SUITE 302
BOISE, ID 83705

OVERVIEW OF ALL WATER RIGHTS AS OF 8-17-1989

Coeur-Thunder Mountain, as of this date, has seven water rights. Field exams were completed in 1988 for permits (77-7123, 77-7124, 77-7129, and 77-7201). Permits (77-7211 and 77-7217) were examined in 1988 but after the examination it was determined that additional P/Ds needed to be added to these permits and therefore they were reexamined on 8-17-1989. One permit, (77-7127), is waiting for the Proof of Beneficial Use to be filed. Proof is due in 1990.

LAPSED
8/2/91

As all rights are used in the mining operations and at times overlap in use, this is an overview of all rights as a system. Field notes are included in the individual files as to the conditions that existed at exam time and this is not to replace the notes but to condense and summarize them.

There are two major mining systems, one utilizes the fire water pond and concerns the removal of gold from the ore, and the second relates to the crushing operation. The domestic use is also divided into two different P/U locations with the sources coming from different permits. The original system description below is followed by the revised system description as was found on 8-17-89.

A COPY OF THE ORIGINAL REPORT FOUND IN 77-7124
(this is an overall system description)

Water is initially stored in a plastic lined pit divided into two parts. One portion holds 30,000 gal and acts as a settling pond for any runoff entering the system. The main pond holds 550,000 gal. (volume is from engineers report for Thunder Mtn). The pond is referred to as the "Fire Water Pond".

Water is then used from the pond on the heap leach (chemical extraction process), in the milling operations, to agglomerate the ore, and for dust abatement.

Water from permits 77-7201, 77-7123, 77-7217, 77-7129, and 77-7124 are used in this manner. Delivery from each P/D is described in it's respective field report.

No domestic use was found for the above permits.

Permit 77-7211 is for domestic use but the overflow dumps into the fire water pond. Normal operation is to shut the pump off before water reaches the overflow spout.

END OF REPORT COPY.

RECEIVED
DEC 03 1993

DOMESTIC USE REVIEW

Domestic use is covered by permits 77-7211 and 77-7217. Both permits have multiple P/Ds and also cover mining uses.

Permit 77-7211 supplies water from a well to the domestic use located near the office complex. This use is documented in the original field report dated 8-19-1988. That report is for supplemental use only as the field report dated 8-17-1989 covers the system as it exists now.

Permit 77-7217 supplies water from a well to a 50 man camp site located approximately one mile southwest of the office complex. This is not the camp site described in the report for 77-7211. The original notes are found on a supplemental sheet labeled "Golden Eagle".

PERMITS UTILIZING WATER TRUCKS AS THE PRIMARY METHOD OF CONVEYANCE

Permit 77-7124	aka	Monumental Creek Diversion
77-7129	aka	Coon Creek Diversion
77-7201	aka	Spring to Mule Creek
77-7123	aka	Sunny Side Creek Diversion

These permits utilize portable pumps to fill water trucks which then either dump the water on the road for dust control or into the Fire Water Pond for use in the extraction process.

MILLING AND CRUSHING OPERATIONS

The extraction process primarily consists of sprinkling a chemically treated water solution over crushed ore that has been placed on a water tight mat. The solution is recirculated until it is determined that the maximum extraction has been achieved. The "pregnant" solution is then routed to the lab and the remaining ore is treated with another solution to neutralize to stockpile.

The water use for the milling operation is primarily to maintain the ore at a specific water content and to aid in the agglomeration of the ore.

MINING
DEC 03 1993

SUPPLEMENTAL REVIEW OF PERMIT 77-7211

This permit consists of five different wells. At exam time there were only two wells under this permit with pumps installed but as the normal mining operations shift locations the use of different wells is called for. Rotating pumps between the wells covered under both permits is the standard practice. I am recommending all the wells be considered for licensing as P/Ds, conditioned so that the combined total diversion from each of the wells in use does not exceed the recommended diversion rate.

WELL #	LEGAL DESCRIPTION	ALSO KNOWN AS	WELL USES
1	SW/SW SEC 21 19N,11E	UPPER VENABLE	MINING AND DUST ABATEMENT
2	SW/SW SEC 21 19N,11E	LOWER VENABLE	MINING AND DUST ABATEMENT
3	NW/NW SEC 28 19N,11E	ARGEY YARD WELL	MINING AND DUST ABATEMENT
4	SE/SW SEC 21 19N,11E	BONE YARD WELL	MINING AND DUST ABATEMENT
5	SE/SW SEC 21 19N,11E	CAMP WELL	DOMESTIC, MINING, AND DUST ABATEMENT

WELL MEASURED

2	0.14 CFS (a 10 hp pump)
5	0.17 CFS (a 10 hp pump)

All the above wells are currently used in connection with the extraction process and dust abatement rather than the crushing operations.

Permit is for: Domestic at 0.12 CFS
Mining at 0.38 CFS for a total of 0.50 CFS
Fees paid for: ----- 1.00 CFS MAX

Found: Domestic: main camp, cook shack, office, and lab
Mining: multiple operations for gold extraction and dust control
Domestic diversion: 0.17 CFS (well # 5)
Total diversion rate: 0.31 CFS (wells # 2 and 5)

RECEIVED
DEC 03 1993

SUPPLEMENTAL REVIEW OF PERMIT 77-7217

This permit consists of six wells with the use being both domestic and mining. As with 77-7211, this permit had wells with no pumps installed at exam time. The same rational used with 77-7211 is considered here. I recommend that all six wells be considered as P/Ds and be licensed with the condition that the total diversion from all wells used shall not exceed the licensed rate.

WELL #	LEGAL DESCRIPTION	ALSO KNOWN AS	
1	SE/NE SEC 29 19N,11E	LOWER SUNNY SIDE CABIN WELL	MINING, MILLING AND DUST ABATEMENT
2	NE/SW SEC 29 19N,11E	GOLDEN EAGLE WELL	DOMESTIC AND DUST ABATEMENT
3	NE/SW SEC 29 19N,11E	GOLDEN EAGLE WELL, SOUTH	DOMESTIC AND DUST ABATEMENT
4	NE/NE SEC 29 19N,11E	ROAD SIDE WELL	MINING, MILLING AND DUST ABATEMENT
5	NE/NE SEC 29 19N,11E	THE PIT	MINING, MILLING AND DUST ABATEMENT

RE: Application for Permit Nos. 77-7123/7124/7127/7129

Thunder Mountain Gold, Inc.
P.O. Box 385
Spokane, WA 99210

Gentlemen:

Enclosed are copies of your approved Applications for Permit. We direct your attention to the conditions of approval on the fourth pages.

The 1982 Idaho Legislature added a requirement that as a permit holder you must commence the excavation or construction of diverting works within one year of the date the permits were issued, and you must proceed diligently until the projects are completed. The enclosed blue cards must be completed and returned to this office as soon as you commence construction, no later than one year from the date the permits were approved.

We have enclosed a form entitled "Instructions for Proof of Beneficial Use". Please read the instructions carefully since you must take further action to develop these permits into licenses.

Sincerely,

DAVID R. TUTHILL, JR., P.E.
Supervisor, Water Allocation Section

SUMMARY OF MEETING TO RESOLVE WATER RIGHT PROTESTS
APPLICATION NO.'S 77-7201 AND 77-7194

RECEIVED

DEC 12 1984

Department of Water Resources

A meeting was held at the McCall office of the Idaho Fish And Game Department on November 30, 1984 to discuss the protest of water right applications 77-7201 (protested by the U.S. Forest Service) and application 77-7194 (protested by the Idaho Department of Fish And Game). Application 77-7201 is to divert 1.02 CFS from a tributary to Mule Creek, application 77-7194 is to divert 2.0 CFS from the South Fork of Holy Terror Creek. Both applications were submitted by Coeur D'Alene Mines. Proposed use of the water includes mining and domestic use. Present at the meeting were:

Frank Monninger
Dave Lee
Rick Richins
Don Anderson
Stacy Gebhardt
Ken Weyers
Earl Kimball
John Lund
Dave Burns
Bob Kenworthy
Walter Pierson

Coeur D'Alene Mines
Coeur D'Alene Mines
James M. Montgomery Engineering
Idaho Dept. of Fish and Game
Idaho Dept. of Fish and Game
Payette National Forest
Payette National Forest
Payette National Forest
Payette National Forest
Payette National Forest

The discussion centered around Coeur's need for approximately 0.5 CFS to supplement ground water sources during dry periods. The Forest Service expressed concern over minimum flows for fish habitat and channel maintenance purposes. An additional concern was the proposal to store water (10 acre-feet) on an unstable area. Fish and game was similarly concerned with adequate flows to protect the fishery resource.

After a short discussion the following agreement was reached:

1. Coeur proposed to withdraw water rights previously applied for on four streams in addition to South Fork Holy Terror Creek. These streams are listed below.

<u>Stream</u>	<u>Application No.</u>	<u>Proposed Appropriation</u>
Divide Creek	77-7125	2.0 CFS
Marble Creek	77-7126	2.0 CFS
Fall Creek	77-7128	2.0 CFS
Roosevelt Lake	77-7130	4.0 CFS
South Fork Holy Terror	77-7194	2.0 CFS

RECEIVED

RECEIVED

DEC 14 1984

Department of Water Resources
Western Regional Office

2. Coeur will reduce its water rights applications to the streams listed below with a reduction in water quantity to the proposed appropriation as indicated. (Listed by priority)

<u>Stream</u>	<u>Application No.</u>	<u>Revised Appropriation</u>
Sunnyside Creek	77-7123	0.50 CFS
Mule Creek Spring	77-7201	0.25 CFS
Monumental Creek	77-7124 ✓	0.50 CFS
Coon Creek	77-7129	0.25 CFS
Cornish Creek	77-7127	0.25 CFS

3. Coeur will condition the permits for the streams listed in #2 above to a maximum, total withdrawal of 0.5 CFS from the Monumental Creek Drainage (Mule, Coon, Monumental Creeks) and 0.5 CFS from the Marble Creek Drainage (Sunnyside Creek and Cornish Creek).

4. Water will be diverted from only one stream at a time.

5. The U.S. Forest Service, The Idaho Department of Fish and Game, and Coeur D'Alene Mines mutually agree to conditions 1-4 listed above. The U.S. Forest Service will drop the protest for application #77-7201 (Mule Creek) under conditions 1-4 described above.

Dated this 7 day of December, 1984.

Subject: Water Right Applications No. 77-7123, 77-7124, 77-7125, 77-7126,
77-7127, 77-7128, 77-7129, 77-7130 and South Fork Holy Terror
Creek and Mule Creek (spring source); Thunder Mountain Mining
Project

Dear Mr. Shaw:

As a result of our telephone conversation yesterday, I am writing to confirm the positive efforts CDA Mines is making toward resolving the pending Water Rights Applications.

CDA Mines is currently preparing a feasibility study and a comprehensive EIS for the proposed project. These studies include metallurgical and mineral process evaluations, hydrology and instream flow (IFG) investigation, and alternative mining and processing analyses. Additionally, an ongoing water supply study is being conducted, including ground water exploration. The EIS is scheduled for completion in February, 1984. The support studies will generally be completed concurrently with the EIS. An exception may be the water supply study; however, study findings adequate to finalize water needs for mining and processing and domestic use are also anticipated at this time. Therefore, we will be officially requesting that IDWR initiate administrative action required to resolve the pending permit applications during the month of February. It is my understanding (as a result of our discussion) that as long as CDA Mines is making progress through the EIS and related studies to identify water use requirements, the pending applications will not be invalidated.

Additionally, during the next 30 days, CDA Mines will be filing permit applications for the ground water wells currently being tested and developed. It is my understanding, also based on our discussions, that the filing of these applications will not affect the quantity of surface water CDA would be appropriated by IDWR. Rather, it would be the objective of IDWR to develop an agreement which would generally promote the use of existing ground water supplies to the extent possible, prior to pumping from the surface water source. CDA Mines is supportive in concept of this type of agreement.

NOV 14 1983

Mr. David Shaw

Subject: Water Right Applications No. 77-7123, 77-7124, 77-7125, 77-7126,
77-7127, 77-7128, 77-7129, 77-7130

Dear Dave:

I recently met with Don Anderson and Will Reid of the Idaho Department of Fish and Game concerning a letter which was addressed to you and was dated June 12, 1981 from James F. Keating, Regional Supervisor of the Department about the above referenced applications. At this meeting, we discussed the seven conditions which the Idaho Department of Fish and Game requested be attached to the water right applications. Canadian Superior cannot agree to these conditions, particularly Number 4 which states: "No water withdrawals be allowed between 1 July and 15 September." This will be the period of major water use due to processing of the ore. The Department of Fish and Game explained that this condition was included due to lack of flow records and the importance of the fisheries resources in the area. Don Anderson and Will Reid explained that data on the flows are currently being taken, and after analyzing this data, water withdrawals can be more accurately determined for each water right application.

At this meeting, the Idaho Department of Fish and Game and I, acting in behalf of CSM, agreed to delay a decision on the water right applications until the data are available and analyzed. Therefore I would like you to delay your decision on these water rights until Fall 1981.

Sincerely,

Nancy L. Cookson

77-7128, 77-7129, 77-7130.

Dear Dave:

Idaho Department of Fish and Game personnel reviewed the above referenced applications and met with representatives of the applicant. We request that the below listed conditions be met:

1. A maximum of 1.2 cfs may be withdrawn from any one or combination of streams, herein applied.
2. Withdrawal duration does not exceed 30 hours.
3. Withdrawal frequency does not exceed 7 times per year.
4. No water withdrawals be allowed between 1 July and 15 September.
5. The letter from James M. Montgomery, Consulting Engineers, Inc., dated 3 June 1981 concerning clarification of the water right applications be included as conditions of the permit.
6. Revision of these water rights be reviewed after the completion of one year's operation.
7. In the event that Idaho Department of Fish and Game determines that these withdrawals significantly impact or endanger the fishery resources, these permits can be modified to protect these resources.

Based on public interests for protecting environmental and recreational resources, we formulated these conditions which meet the requirements for fish spawning.

Dear Dave:

Potential problems have developed with water right applications which were filed by Canadian Superior Mining (U.S.) Ltd. (CSM) for their proposed mining operation located near Thunder Mountain in the Boise National Forest, Valley County, Idaho. This letter is intended to clarify CSM's initial applications and address the questions raised by the Idaho Department of Fish and Game so that the water right applications may be approved.

The water right applications and their corresponding identification numbers which are affected by this letter include: (1) Sunnyside Creek, No. 77-7123; (2) Monumental Creek, No. 77-7124; (3) Divide Creek, No. 77-7125; (4) Marble Creek, No. 77-7126; (5) Cornish Creek, No. 77-7127; (6) Fall Creek, No. 77-7128; (7) Coon Creek, No. 77-7129; and, (8) Roosevelt Lake, No. 77-7130.

These water right applications were prepared with the intention that no dams will be built across the creeks. Minimal instream storage is planned with the anticipated method of water storage being small, off-stream pools which will be developed by CSM. The water will be used for mining and processing minerals at the Thunder Mountain site, and the expected maximum water use for the operation is 6.5 million gallons per year. This anticipated use was determined based upon a withdrawal rate of 1.18 cfs, seven times per operating season for the mine processing facilities with additional water withdrawal, as required, for makeup due to evaporation losses. The mine process, as presently envisioned, would entail a closed-system cyanide leaching operation similar to that approved by the Forest Service at Stibnite.

CSM intends to withdraw water from the creek closest to the mining operation. However, during periods of low flow, CSM will withdraw water from streams with sufficient flow to maintain the fishery. Special planning consideration will be given to the anadromous fishery needs in designing the project. Water will be withdrawn only on an intermittent basis from the creeks.

Mr. Dave Shaw

-2-

June 3, 1981

Water from Roosevelt Lake is not expected to be used except in periods of drought or at the end of the process season, if sufficient water is not available elsewhere.

Hopefully this letter will clear up questions and concerns on these water right applications. If you have any further questions, please do not hesitate to contact Rick Richins or myself.

Sincerely,

Nancy L. Cookson
