<----- PICTURE # 1

This picture shows what I believe to be the correct P/D. This picture shows a riser leading from a portion of the spring development and the depression around the storage tank (at the ladder location). The tank is approximately 6 ft in diameter and 8 ft deep. Also shown is two vertical culverts that allow access to two gate valves which indicate that at least two lines exist at this point. The buildings shown within the trees are the worker bunkhouses. That is not the P/U. The main house is located to the right of the field of view of this picture. Running water could be heard from both the riser and the storage tank indicating that there is a discharge point from this system.

PICTURE # 2 ----->

This picture taken from the road shows the access to the spring development and probable water line route. This picture is looking northwest. The main line apparently crosses the road here and then runs southeast with one line going to the pond (see picture # 3) and the other going to the P/U (see picture # 4).

OCT 31 1994

PICTURE # 3

This picture shows water being discharged into a small pond. Note the mining operations for reference to location with picture # 1. Both pictures show the same point. The man camp is behind the trees that are above the discharge point. This pond is approximately 300 yards below the spring development. I believe that one of the valves (see photo # 1) would control this water. I do not believe that it is on the same line as the main house.

PICTURE # 4

This picture is looking west northwest and shows the P/U. This house is the only building currently receiving water.

PICTURE # 5

This is a picture of another spring development showing disconnected lines and lines removed from the system. There was no indication of an intact line leaving this spring or the other spring that is approximately 100 yds away from this location. These springs are located north of the main cabin.

PICTURE # 6

This picture was taken to show where you leave the road to reach the two springs discussed in picture # 5. The main road sharply turns to the left where there is a break in the shadows crossing the road. The access to the springs is on a trail that veers slightly to the right at the shown end of the road. It is approximately 1000 feet to the springs. The main camp is also approximately 1000 ft from the bend, but on the main road.

SUBJECT: RETURNED MAIL

=====

The Water Right License and Order of Reinstatement mailed to our owners of record, Golden Reef Mining Inc., Box 8007, Boise ID 83707-8007 were returned by the U.S. Postal Service with the following notation:

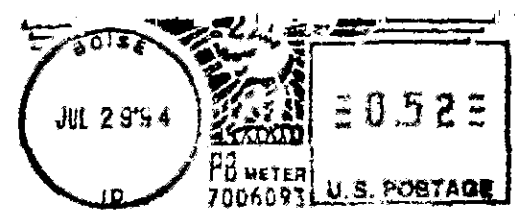

Addressee Unknown.

A call to the Valley County Assessor's Office revealed that our legal description is inadequate for them to locate the owner of this property. Due to the fact that there are several mining operations in that area, the only way the assessor can be specific is with a mineral patent number or a survey number.

The paperwork was returned to the file until we have additional information.

THIS PERMIT IS FOR DOMESTIC USE. I FOUND EVIDENCE OF SEVERAL SPRING DEVELOPMENTS THAT ARE NOT USED AT THIS TIME. ALSO THE MINING OPERATIONS ARE ON HOLD, WAITING FOR THE COURT SYSTEM TO DETERMINE OWNERSHIP.

THE SPRING IDENTIFIED AS THE SOURCE ON THIS PERMIT WAS NOT 100% IDENTIFIED AS THE ACTUAL SOURCE, AS THE SUPPLY LINE IS BURIED AND NO INDIVIDUAL WAS FOUND THAT "KNEW" THE SOURCE AND ROUTE FROM THE SPRING. SKETCHES

H. REMARKS AND OVERLAP REVIEW ANALYSIS

INDICATING THIS SPRING AS THE SOURCE EXIST AT THE MINE SITE. ALSO THIS SPRING IS THE ONLY SPRING SHOWING PHYSICAL EVIDENCE OF WATER LEAVING THE SOURCE. THEREFORE I HAVE IDENTIFIED THIS SPRING AS THE P/D.

I FOUND A RISER & STEEL STORAGE TANK (PICTURE 1). EVIDENCE IS A 2 1/2" RISER (RUNNING WATER CAN BE HEARD) AND A 2' MANHOLE LEADING TO A STEEL TANK APPROX 8 TO 10' DEEP (NOT MEASURED ONLY LADDER AVAILABLE WAS BROKEN) WATER WAS VISIBLE AND CASCADING WATER COULD BE HEARD. TWO BURIED VALVES WERE ALSO LOCATED THERE. THE CABIN HAD RUNNING WATER THEREFORE BENEFICIAL USE WAS FOUND. ALSO FOUND WAS WATER SPILLING INTO A SMALL POND SOUTH OF THE P/D & THE ROAD, ALSO WEST OF 40 MAN CAMP WATER

←----- PICTURE # 1

This picture shows what I believe to be the correct P/D. This picture shows a riser leading from a portion of the spring development and the depression around the storage tank (at the ladder location). The tank is approximately 6 ft in diameter and 8 ft deep. Also shown is two vertical culverts that allow access to two gate valves which indicate that at least two lines exist at this point. The buildings shown within the trees are the worker bunkhouses. That is not the P/U. The main house is located to the right of the field of view of this picture. Running water could be heard from both the riser and the storage tank indicating that there is a discharge point from this system.

PICTURE # 2 ----->

This picture taken from the road shows the access to the spring development and probable water line route. This picture is looking northwest. The main line apparently crosses the road here and then runs southeast with one line going to the pond (see picture # 3) and the other going to the P/U (see picture # 4).

OCT 31 1994

PICTURE # 3

This picture shows water being discharged into a small pond. Note the mining operations for reference to location with picture # 1. Both pictures show the same point. The man camp is behind the trees that are above the discharge point. This pond is approximately 300 yards below the spring development. I believe that one of the valves (see photo # 1) would control this water. I do not believe that it is on the same line as the main house.

PICTURE # 4

This picture is looking west northwest and shows the P/U. This house is the only building currently receiving water.

RECEIVED
OCT 31 1994

PICTURE # 5

This is a picture of another spring development showing disconnected lines and lines removed from the system. There was no indication of an intact line leaving this spring or the other spring that is approximately 100 yds away from this location. These springs are located north of the main cabin.

PICTURE # 6

This picture was taken to show where you leave the road to reach the two springs discussed in picture # 5. The main road sharply turns to the left where there is a break in the shadows crossing the road. The access to the springs is on a trail that veers slightly to the right at the shown end of the road. It is approximately 1000 feet to the springs. The main camp is also approximately 1000 ft from the bend, but on the main road.

License Examination Fee

You are hereby notified that under the provisions of Section 42-217 and 42-218a, Idaho Code, the above referenced permit will lapse and be of no further force nor effect on June 9, 1988, for failure of the permit holder to submit either the license examination fee or an acceptable field examination report prepared by or under the supervision of a certified water right examiner.

Provisions of § 42-217, Idaho Code, and the Beneficial Use Examination Rules and Regulations provide that failure of the permit holder to submit either the fee or an acceptable field examination report within one (1) year and sixty (60) days after notification by the director that the submittal is due is cause for the director to reject the proof of beneficial use and lapse the permit. The Department notified you of the required submittal on April 10, 1987.

The lapsed permit can be reinstated upon a showing of reasonable cause for late submittal of proof of beneficial use, if you submit to the Department on or before August 8, 1988, either the license examination fee or an acceptable field examination report prepared by or under the supervision of a certified water right examiner.

Enclosed is a fee information sheet that must be completed and submitted to the Department to keep the permit in good standing. If you have questions, please contact any office of the Department.

EXAMINATION FEE NOTICE

Dear Permit Holder:

Department records show that proof of beneficial use has been submitted for the above-referenced permit, but that a field examination has not yet been conducted to determine the extent of beneficial use of the water for licensing purposes.

House Bill 671 (effective April 4, 1986) enacted by the 1986 Idaho Legislature requires the payment of a fee before this department can conduct the field examination needed to issue a license confirming use of water under the permit. This letter is notification that the license examination fee is due within sixty (60) days of the date of this letter. The examination fee information sheet (enclosed) must be returned with the fee.

As an alternative to submitting the fee, the department will accept a field examination report completed by a certified water right examiner from the private sector. If you choose to have the examination done by a certified water right examiner, you need not submit the license examination fee to the department, but you must within sixty (60) days of the date of this letter return to the department, the examination fee information sheet showing appropriate information together with a statement from the certified examiner to verify that you have retained a certified examiner to conduct the field examination. If you choose this alternative, a completed field examination report must be submitted within one year of the date of this letter. You cannot later change your decision to use this alternative and submit the fee needed for the department to conduct the field examination, but you may change to another certified examiner.
