Dear Mr. Hill:

Pursuant to our telephone conversation, we are forwarding 8 sets of depositions for the above referenced permits. Please have the completing notary public submit a deposition stating why the proofs are to be taken late and before another notary public. Also, this deposition must state that the office of the original notary public was open on the advertised date and state if any protests were offered or received.

Contact us if we can be of any assistance.

Dear Sirs:

32773
32774
32776
32775

Under the terms of your Permit No. 32773 you are required to make proofs of completion of works and application of water to beneficial use on or before **MARCH 10, 1967**

Before this proof can be made, the statutory requirement is that a notice of your intention of proof be published once a week for four consecutive weeks in a newspaper in the county.

We enclose Form 36-A in duplicate, which is to be filled in and returned to this department at least forty (40) days before the above mentioned date and/or before the time you intend to make proof (this may be at any place that is convenient for you and your two witnesses), the quantity of water, for what purpose it is used, the point or points of diversion and the location of use, or lands which are irrigated - - by legal description. Descriptions should be taken from your Permit, including any amendments thereto, as recorded in this department. If changes have been made and no amendments are on record, we advise that you request a form for this purpose before your notice is published, or you may have to readvertise and complete another set of proof forms.

Also enclosed is Form 11, which is the authorization for us to have the notice published in the designated county newspaper, at your expense. This is to be returned with Forms 36-A

At the time we send the notice to the newspaper we will send you the forms for the depositions of holder and two disinterested witnesses. It is important that the depositions be executed at the time, on the date set, and at the place named, before the Notary Public as advertised in the publication notice.

The amount of water allowed in a license cannot be more than is actually produced and measured and put to beneficial use, and cannot be more than the statutory amount allowable per acre of land actually found by the field inspection to have been irrigated at the time of proof.
