Gentlemen:

You have thirteen permits ready to be licensed. As you know, under Idaho law, an inspection is required by an engineer from this department before license can be issued.

I am wondering if we could not better make this inspection by having someone from your department that is familiar with these various permits to accompany me on a tour of inspection and make them all at one time rather than for me to try to contact a ranger at each station to make the inspection during the busy season.

Due to the extremely heavy load of well inspections that must be made during the irrigation season, I would like to arrange with you to make this inspection sometime before the irrigation season opens or after it has closed in the fall.

Please let me hear from you regarding this.

Very truly yours,
