RE: Permit No. 75-7434

Dear Permit Holder:

One of the conditions of approval of the above referenced water permit was that proof of the extent of your beneficial use must be submitted to this office on or before December 1, 1987. (See last page of your approved permit or your last approved extension request.) Enclosed is a form which when accompanied by the license examination fee or a completed field examination report prepared by a certified water right examiner may be used to submit the required proof.

If you have not fully completed your project, and you or a previous owner of this permit have not received a prior extension of time, you may request an extension of time if the delay is for reasonable cause as provided in Section 42-204, Idaho Code. If you have been prevented from proceeding by a governmental agency or by litigation which might bring title to the water in question, more than one extension of time can be granted. An extension of time request form is enclosed for your convenience.

Either an acceptable proof of beneficial use submittal or an acceptable request for an extension of time must be received by this Department on or before the above described proof due date, or the permit will no longer be of any force nor effect.

Sincerely,

RITA FLECK

RE: Application for Permit No. 75-7434

Stephanie Snook, Bureau of Land Management, advised me she had been in contact with the applicant Joe Bailey and informed he was in the process of altering his proposal for diverting water from Dumpy Creek. Mr. Bailey indicated he contacted the Soil Conservation Service and they had consented to assist him in preparing some plans for construction of a diversion and a conveyance system to the proposed place of use. But the plans probably could not be finalized for a few months since they were busy at this time working on another project. Ms. Snook indicated they would review the plans once they had been prepared and then advise our office of their intent regarding the protesting of the application.

Further administration action on the application should be deferred until January 1, 1987 unless the applicant is successful in finalizing the new proposal prior to that date.

Enclosed is a copy of a protest filed against the issuance of a permit pursuant to your Application No. 75-7434. The Department suggests you contact the protestant directly in an effort to determine the nature of the protest and to attempt to resolve the protest.

If you do not advise us within twenty (20) days that the protest has been resolved, the matter will be scheduled for conference and/or hearing. 1. Will the proposed use reduce the quantity of water under existing water rights?
2. Is the proposed water supply insufficient for the purpose intended?
3. Is the application made in good faith or for delay or speculative purposes?
