APPLICATION FOR PERMIT

APPROVED

To appropriate the public waters of the State of Idaho

1. Name of applicant A. W. Brown Co., Inc. Phone (714) 673-8119

   Post office address 3416 Via Lido, Suite F, Newport Beach, California 92663

2. Source of water supply Lake Creek which is a tributary of Salmon River

3. Location of point of diversion is NWNE Lot 2 ¼ of _____ ¼ of Section 2 Township 19N

   Range 21E B.M. Lemhi County, additional points of diversion if any: _____

4. Water will be used for the following purposes:

   Amount _____ (cfs or acre-feet per annum) for _____ purposes from _____ to _____ (both dates inclusive)

   Amount 6 CFS (cfs ~~or acre-feet per annum~~) for Power purposes from 1/1 to 12/31 (both dates inclusive)

   Amount _____ (cfs or acre-feet per annum) for _____ purposes from _____ to _____ (both dates inclusive)

   Amount _____ (cfs or acre-feet per annum) for _____ purposes from _____ to _____ (both dates inclusive)

5. Total quantity to be appropriated:

   a. 6.0 cubic feet per second and/or b. _____ acre-feet per annum.

6. Proposed diverting works:

   a. Description of ditches, flumes, pumps, headgates, etc. Existing irrigation diversion dam at first addition to Lake Creek Subdivision No. 1, Lot 19, Block 7, Section 2 and gravity flow pipeline 15 inches in diameter by 2300 feet long.

   b. Height of storage dam N/A feet, active reservoir capacity _____ acre-feet; total reservoir capacity _____ acre-feet, materials used in storage dam: _____

   Period of year when water will be diverted to storage _____ (Month/Day) to _____ (Month/Day) inclusive.

   c. Proposed well diameter is N/A inches; proposed depth of well is _____ feet.

7. Time required for the completion of the works and application of the water to the proposed beneficial use is 5 years *(minimum 1 year – maximum 5 years).*

8. Description of proposed uses:
   a. If water is **not** for irrigation: L-6
      (1) Give the place of use of water: SW ¼ of NW ¼ of Section 1 Township 19N

      Range 21E B.M.

      (2) Amount of power to be generated: 60 KW horsepower under 150 feet of head.

      (3) List number of each kind of livestock to be watered N/A

      (4) Name of municipality to be served N/A, or number of families to be supplied with domestic water _____.

      (5) If water is to be used for other purposes describe: N/A

MICROFILMED

MICROFILMED

b. If water is for irrigation, indicate acreage in each subdivision in the tabulation below: N/A

TWP	RANGE	SEC.	NE¼				NW¼				SW¼				SE¼				TOTALS
			NE¼	NW¼	SW¼	SE¼	NE¼	NW¼	SW¼	SE¼	NE¼	NW¼	SW¼	SE¼	NE¼	NW¼	SW¼	SE¼	

Total number of acres to be irrigated _____

c. Describe any other water rights used for the same purposes as described above. _____

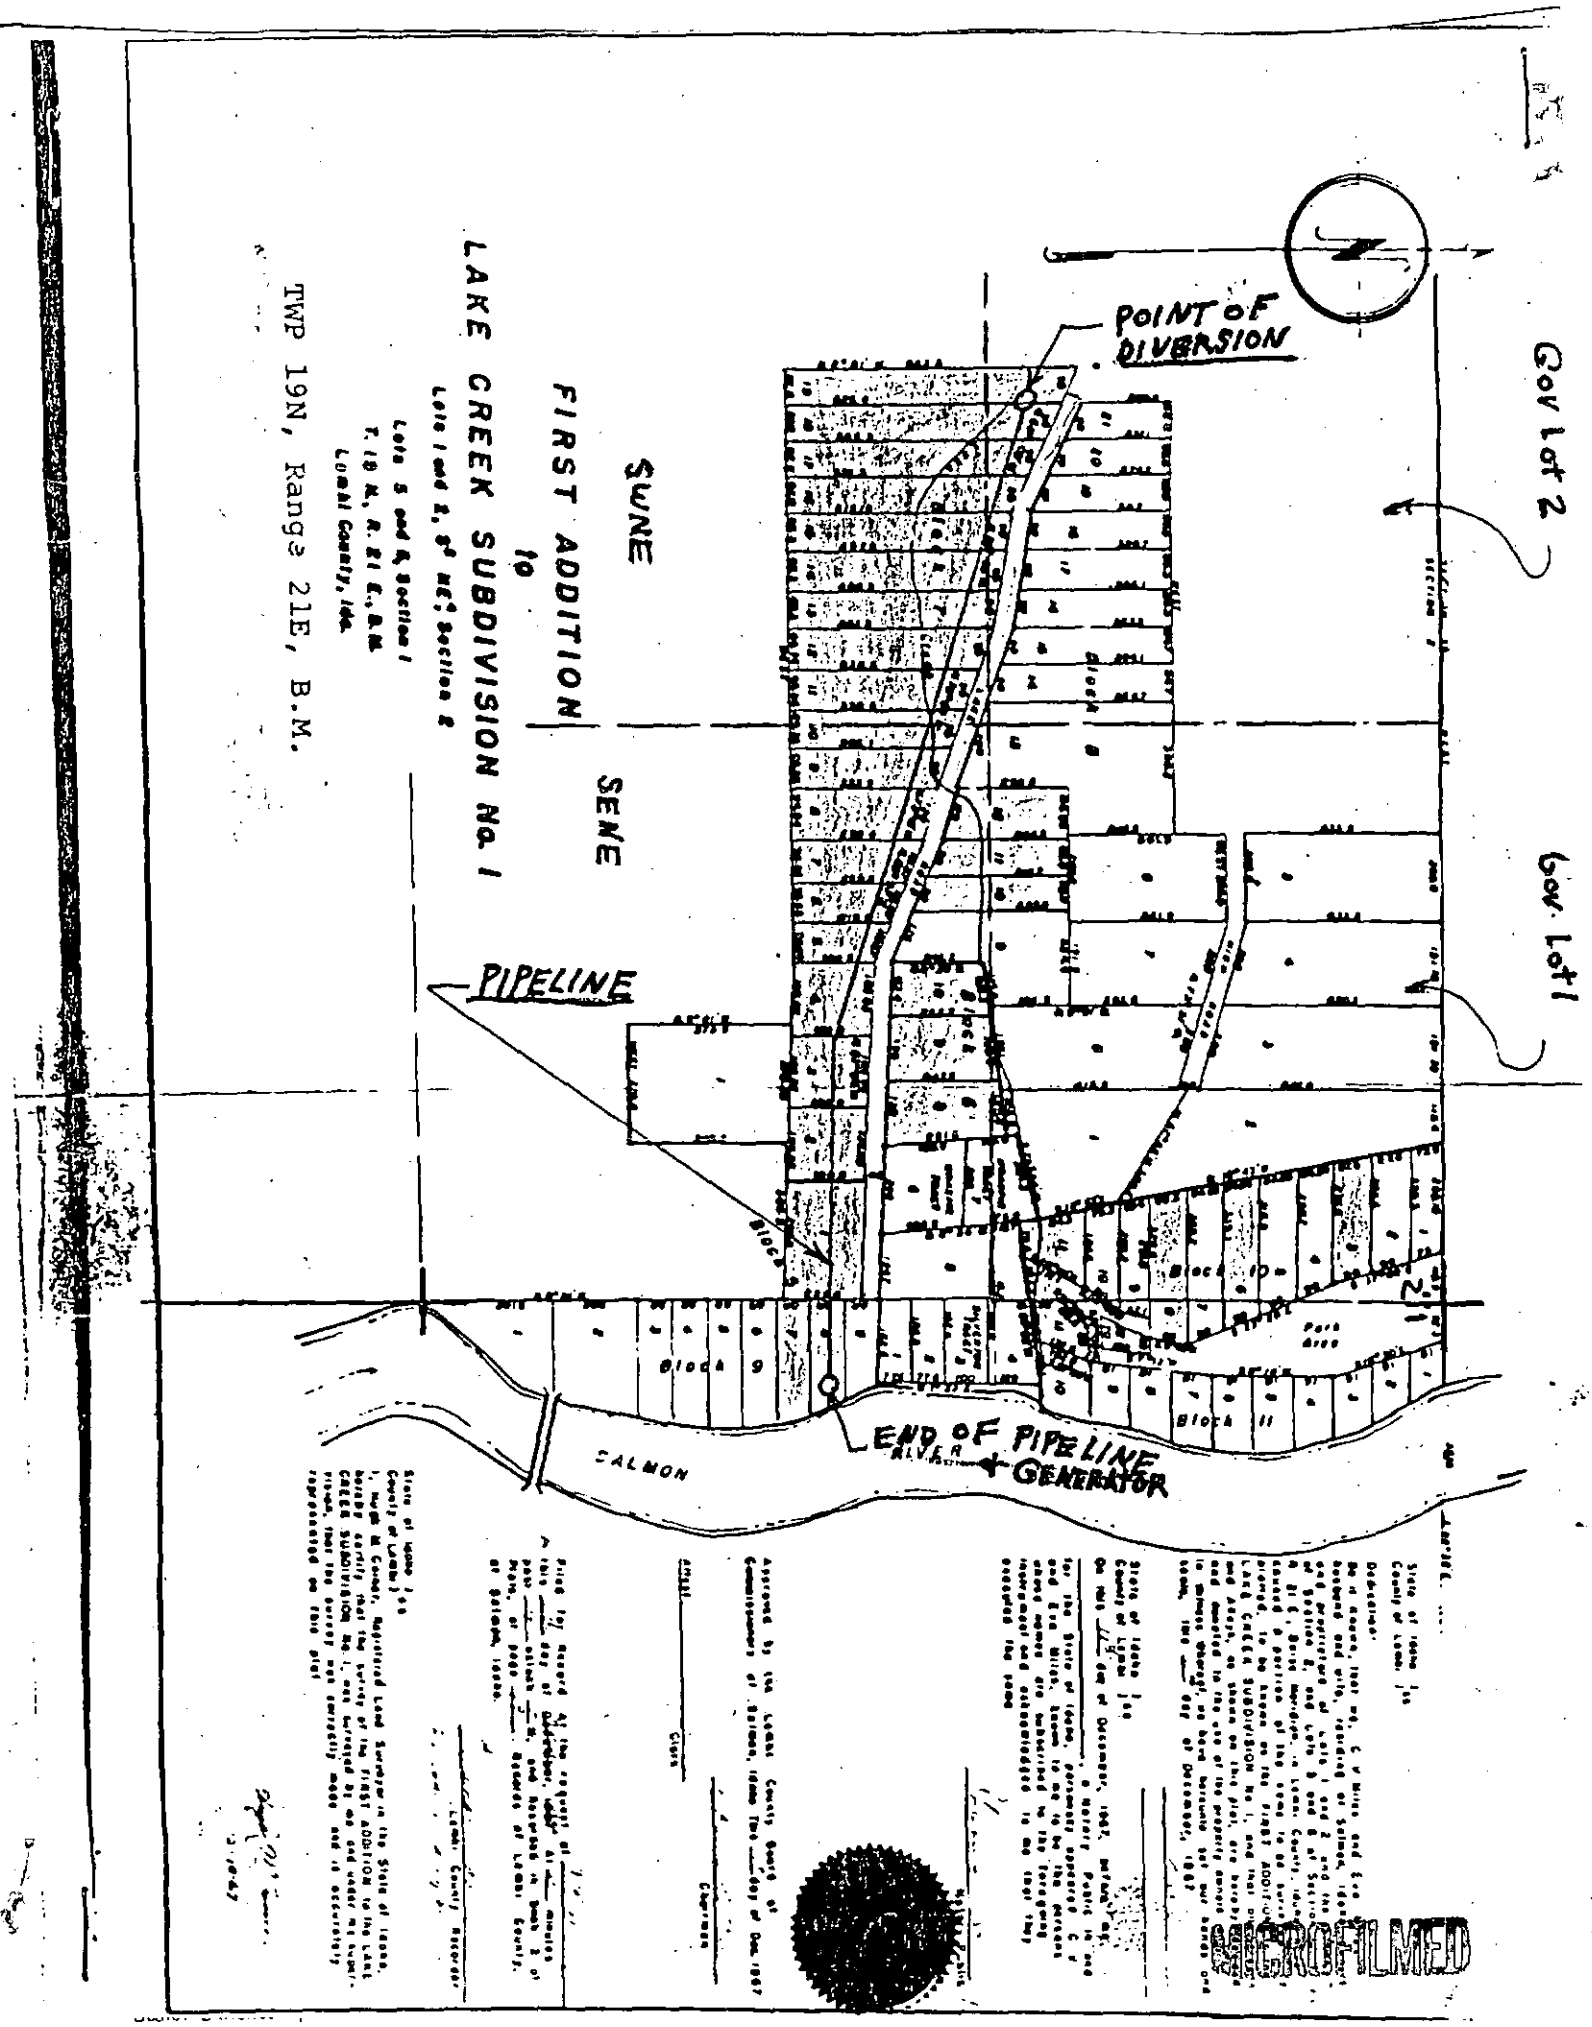
9. a. Who owns the property at the point of diversion Albert W. and Diane E. Brown

b. Who owns the land to be irrigated or place of use Albert W. and Diane E. Brown

c. If the property is owned by a person other than the applicant, describe the arrangement enabling the applicant to make this filing By verbal agreement between owners of record and family corporation.

10. Remarks It is intended to give priority of the available water to irrigate the shaded areas shown on the attached maps by means of a pressurized sprinkling system with a maximum flow rate of .44 CFS. It is also intended to make use of the surplus water in the system to generate electrical power after the requirements for irrigation are satisfied for the system prescribed and for any other user with prior right to water. It is estimated that the average flow rate for power generation will be 6 CFS. All water used for this purpose will be returned to the Salmon River at the end of the Pipeline shown on Subdivision Lot No. 8, Block 9 (See Map).

11. Map of proposed project: show clearly the proposed point of diversion, place of use, section number, township and range number.



BE IT KNOWN that the undersigned hereby makes application for permit to appropriate the public waters of the State of Idaho as herein set forth.

ACTION OF THE DIRECTOR, DEPARTMENT OF WATER RESOURCES

This is to certify that I have examined Application for Permit to appropriate the public waters of the State of Idaho No. 75-7427, and said application is hereby APPROVED.

1. Approval of said application is subject to the following limitations and conditions:

   a. SUBJECT TO ALL PRIOR WATER RIGHTS.

   b. Proof of construction of works and application of water to beneficial use shall be submitted on or before October 1, 19 90.

   c. The rate of diversion, if water is to be used for irrigation under this permit, when combined with all other water rights for the same land shall not exceed 0.02 cubic feet per second for each acre of land.

   d. Other: See attached sheet for conditions d through

Witness my hand this 28th day of October, 1985.

L. Glen Saxton

Chief, Operations Bureau

ATTACHMENT TO CONDITIONS OF APPROVAL FOR PERMIT NO. 75-7427

d. This permit is subject to the provisions of Sections 42-205 through 42-210, Idaho Code, restricting the sale, transfer, assignment, or mortgage of this permit. Failure to comply with these provisions is cause for immediate cancellation of this permit.

e. Project construction shall commence within one year from the date of permit issuance and shall proceed diligently to completion unless it can be shown to the satisfaction of the Director of the Department of Water Resources that delays were due to circumstances over which permit holder had no control.

f. The permit holder shall either install a measuring device or a flow measurement port or provide a certified measurement or computation of flow based upon system design to be prepared by a professional engineer.

g. Water used under this permit if discharged into a natural channel shall meet Idaho Water Quality Standards.

h. Use of water under this permit shall be non-consumptive.

i. The water right acquired under this permit for hydropower purposes shall be junior and subordinate to all rights to the use of water, other than hydropower, within the State of Idaho that are initiated later in time than the priority of this permit and shall not give rise to any right or claim against future rights to the use of water, other than hydropower, within the State of Idaho initiated later in time than the priority of this permit.

j. The diversion and use of water under this permit and any license subsequently issued is subject to review by the Director thirty-five (35) years from the date of issuance of this permit. Upon appropriate findings relative to the interest of the public, the Director may cancel all or any part of the use authorized herein and may revise, delete or add conditions under which the right may be exercised.

k. Use of water under this permit may be affected by an agreement between the protestant and the applicant.

l. This permit does not constitute Idaho Public Utilities Commission or Federal Energy Regulatory Commission approval that may be required.

Witness my hand this 28th day of October, 1985.

RE: Water Right No. 75-07419, A75-00093D, 75-07524, 75-07427

Dear Chris:

Thank you for calling this morning in response to my letter. As we discussed, I have put together some information about your water rights.

Right 75-07427

Permit 75-07427 authorized the development of a right to divert 6.0 cfs from Lake Creek for power production. For some reason the letter acknowledging that the right was assigned to you got sent to Sandy, Utah. I have enclosed a copy of the letter, along with a printout of the water right record from our database. As you can see on the printout, I have entered your Salmon, Idaho, address as indicated on the assignment form signed by Albert Brown.

In May we received the field report on this right from our regional office. I hope to review the field report and issue a water right license to you in the near future.

Right 75-07524

This right is your permit to irrigate six acres with water from a spring tributary to Lake Creek. Proof of Beneficial Use was submitted in 1992, but we have not yet received a field report from our regional office staff. The address we have for you is in Fredonia, Arizona. Please let me know in writing if you wish us to change the address in our records. I have enclosed a database printout of this right for you.

Claim A75-00093D

Snake River Basin Adjudication (SRBA) claim A75-00093D is for the irrigation of 13.7 acres with water from Lake Creek. The claim is based on a portion of an old decreed right with an 1898 priority date. Claims for water rights in your area have not yet been reported to the SRBA court for decree. As you can see on the enclosed prinout, the address of record is your Fredonia,

Arizona, address. To correct your address on the claim, please notify our regional office in writing. The address is 900 N. Skyline Dr., Suite A, Idaho Falls, ID, 83402-1718.

Claim A75-10435

SRBA claim A75-10435 is for domestic use from a spring. As with claim A75-00093D, the address of record is in Fredonia, Arizona. I have enclosed a printout for you.

Right 75-07419

Right 75-07419 is a permit to irrigate 22 acres with water from Lake Creek. I have enclosed a printout of the permit and a copy of the map Mr. Brown submitted with his application in 1985. As explained in my earlier letter to you, our regional office recommended voiding this permit because Mr. Brown did not develop any beneficial use in addition to what is covered by claim A75-00093D. As I said in my previous letter, you have until October 16, 1997, to provide information explaining why the permit should not be voided or to relinquish the permit. Otherwise, I will take action to void the permit.

If you have any questions, please contact me at 208-327-7946.

Respectfully,

Shelley Walter Keen

RE: OWNERSHIP OF PERMIT NO. 75-07427

Dear New Water Right Holder(s):

We have received correspondence changing ownership of the above referenced water right permit to you and we have modified our computer records to reflect this change.

Enclosed is a report listing you as current owner of the permit and other important information about your water right. Please review carefully the Conditions of Approval and Remarks.

Also, please note that as of July 1, 1996, all water right owners are required to report any change in water right ownership and any change of mailing address to the department.

> If you have acquired any other water right or have changed your mailing address **PRIOR TO** July 1, 1996, you have until July 30, 1998, to record the ownership and/or address change with the department.
>
> If you acquired other water rights or changed your mailing address **AFTER** July 1, 1996, you must notify the department within 120 days of the change.

Failure to report these changes in a timely manner could result in a $100 late filing fee.

You can contact any office of the department for more information. If you have any questions concerning your water right listed above you can contact me at (208) 327-7947.

Sincerely,

JIM JOHNSON, Manager
Water Right Permits Section

RE: Permit No. 75-07427

Dear Permit Holder(s):

The Department is in receipt of your notice of ownership change for above referenced permit changing ownership of the permit to you.

Before we can formally change our records reflecting the ownership change we must be in receipt of an affidavit stating that the new owner is established to do business in Idaho in accordance with the provisions of Section 42-205, Idaho Code.

Please complete (to include current phone number) and return the enclosed affidavit and assignment of permit with a $25.00 filing fee.

If you have any questions, please let us know.

Sincerely,

JIM JOHNSON, Manager
Water Right Permits Section

E. NARRATIVE/REMARKS/COMMENTS

THIS SYSTEM IS A NON-CONSUMPTIVE USE OF WATER FOR POWER GENERATION.

WATER IS TAKE OUT OF LAKE CREEK AT A SMALL POND VIA A 15" PIPE (BURIED). WATER IS GRAVITY FEED DOWN HILL APPROXIMATELY 2,300 FEET WITH 170 FOOT OF DROP. PIPE IS REDUCED TO 12" PRIOR TO TURBINE BUILDING THEN SPLITS TO TWO 10" PIPES WHICH FEED THE UPPER & LOWER TURBINE BLADES; WATER THEN DISCHARGES BACK TO THE SALMON RIVER.

A. W. Brown Co., Inc.
Jerry Lee and Christine McMillan

Project No. 9907-004
Idaho

ORDER APPROVING TRANSFER OF LICENSE

(Issued February 23, 1996)

A. W. Brown Co., Inc. (Brown) seeks Commission approval to transfer its license for the Sunshine Power Project to Jerry Lee and Christine McMillan (Lee and McMillan). The project is located on Lake Creek, in Lemhi County, Idaho. The purpose of the transfer is to reflect the sale of the project to Lee and McMillan.

Brown has fully complied with the terms of the license and agrees to pay annual charges that have accrued to the date of the transfer. There are no outstanding compliance matters and our records do not show any significant expenditure anticipated.

Lee and McMillan are not licensees of the Commission. Therefore, we have no compliance record to review. Lee and McMillan will be required to hold the license and operate the property under license and agree to all the terms and conditions of the license and to be bound by the license as if they were the original licensee.

The State of Idaho Department of Fish and Game filed a timely motion to intervene to be a party in this proceeding. No other comments or interventions were filed in response to the public notice of the application to transfer the license.

Transfer of the license for this project is consistent with the Commission's regulations and is in the public interest.

The Director orders:

(A) Transfer of the license for the Sunshine Power Project is approved.

(B) A. W. Brown Co., Inc. shall pay all annual charges that accrue up to the effective date of the transfer.

(C) Approval of the transfer is contingent upon transfer of the properties under license and delivery of all license instruments to Jerry Lee and Christine McMillan, who shall be subject to all terms and conditions of the license as though they

MICROFILMED
SEP 16 1997

were the original licensee. Lee and McMillan shall submit certified copies of all instruments of conveyance within 60 days from the date of this order.

(D) Jerry Lee and Christine McMillan shall acknowledge acceptance of this order and its terms and conditions by signing and returning the attached acceptance sheet within 60 days from the date of this order.

(E) This order constitutes final agency action. Requests for rehearing by the Commission may be filed within 30 days of the date of issuance of this order, pursuant to 18 C.F.R. § 385.713.

j. Comment Date: **DECEMBER 12, 1995**

k. Description of Application: The licensee, jointly and severally with Jerry Lee and Christine McMillan, request Commission approval to transfer the project license to Mr. Lee and Ms. McMillan.

l. This notice also consists of the following standard paragraphs: B, C1, and D2.

B. Comments, Protests, or Motions to Intervene -- Anyone may submit comments, a protest, or a motion to intervene in accordance with the requirements of Rules of Practice and Procedure, 18 CFR 385.210, .211, .214. In determining the appropriate action to take, the Commission will consider all protests or other comments filed, but only those who file a motion to intervene in accordance with the Commission's Rules may become a party to the proceeding. Any comments, protests, or

motions to intervene must be received on or before the specified comment date for the particular application.

C1. Filing and Service of Responsive Documents -- Any filings must bear in all capital letters the title "COMMENTS", "RECOMMENDATIONS FOR TERMS AND CONDITIONS", "PROTEST", OR "MOTION TO INTERVENE", as applicable, and the Project Number of the particular application to which the filing refers. Any of the above-named documents must be filed by providing the original and the number of copies provided by the Commission's regulations to: The Secretary, Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426. A copy of any motion to intervene must also be served upon each representative of the Applicant specified in the particular application.

D2. Agency Comments -- Federal, state, and local agencies are invited to file comments on the described application. A copy of the application may be obtained by agencies directly from the Applicant. If an agency does not file comments within the time specified for filing comments, it will be presumed to have no comments. One copy of an agency's comments must also be sent to the Applicant's representatives.

A.W. Brown Company, Inc. Project No. 9907-001

ORDER APPROVING FUNCTIONAL DESIGN DRAWINGS

(Issued November 13, 1987)

On September 25, 1987, A. W. Brown Company, Inc. (licensee) filed for approval, functional design drawings of the fish screen and fish bypass facility for the Sunshine Power Project, as required by article 403 of the license, for the protection of a resident trout fishery. The Idaho Department of Fish and Game concurred with the design drawings of the fish screen and fish bypass facility by letter of April 28, 1987.

The proposed fish screen and bypass would effectively reduce fish entrainment mortality and facilitate fish migration past the intake structure. The environmental impacts associated with construction of the proposed fish screen and bypass facility were assessed during the licensing proceeding, and were found to be minor and of short duration.

The Director orders:

(A) The functional design drawings of the fish screen and fish bypass facility are approved.

(B) This order is issued under authority delegated to the Director and is final unless appealed to the Commission under Rule 1902 within 30 days from the date of this order.

RE: Permit Nos. 75-7419 & 75-7427

Bill Brown
A.W. Brown Co., Inc.
3416 Via Lido, Suite F
Newport Beach, CA 92663

Dear Mr. Brown:

Per our recent telephone conversation, I am enclosing the proof of beneficial use forms for the above referenced permits. I have partially completed the forms; you will need to fill in the blanks. Also, the person who signs the forms should put his/her title under the signature. As we discussed, the proof form for Permit No. 75-7419 can be submitted now since the system is being used and there is no problem with the amount of water being used.

The proof form for Permit No. 75-7427 is the one you will be holding until next year in hopes of a better water supply in order to be licensed for the maximum amount of water for which you originally applied.

I have also enclosed an Application for Permit form for your use should you decide to file for a water right on the property you have considered purchasing.

If you have any questions or if we can be of any further assistance, please feel free to contact our office.

Sincerely,

MICROFILMED

A3. Development Application -- Any qualified development applicant desiring to file a competing application must submit to the Commission, on or before the specified comment date for the particular application, a competing development application, or a notice of intent to file such an application. Submission of a timely notice of intent allows an interested person to file the competing development application no later than 120 days after the specified comment date for the particular application. Applications for preliminary permit will not be accepted in response to this notice.

B. Comments, Protests, or Motions to Intervene - Anyone may submit comments, a protest, or a motion to intervene in accordance with the requirements of the Rules of Practice and Procedure, 18 C.F. R. §§385.210, .211, .214. In determining the appropriate action to take, the Commission will consider all protests or other comments filed, but only those who file a motion to intervene in accordance with the Commission's Rules may become a party to the proceeding. Any comments, protests, or motions to intervene must be received on or before the specified comment date for the particular application.

JUL 18 1989
MICROFILMED

C. Filing and Service of Responsive Documents - Any filings must bear in all capital letters the title "COMMENTS", "NOTICE OF INTENT TO FILE COMPETING APPLICATION", "COMPETING APPLICATION", "PROTEST" or "MOTION TO INTERVENE", as applicable, and the Project Number of the particular application to which the filing is in response. Any of the above named documents must be filed by providing the original and the number of copies required by the Commission's regulations to: Kenneth F. Plumb, Secretary, Federal Energy Regulatory Commission, 825 North Capitol Street N.E., Washington, D.C. 20426. An additional copy must be sent to: Mr. Fred E. Springer, Director, Division of Project Management, Federal Energy Regulatory Commission, Room 203-RB, at the above address. A copy of any notice of intent, competing application or motion to intervene must also be served upon each representative of the Applicant specified in the particular application.

D1. Agency Comments - Federal State, and local agencies that receive this notice through direct mailing from the Commission are requested to provide comments pursuant to the Federal Power Act, the Fish and Wildlife Coordination Act, the Endangered Species Act, the National Historic Preservation Act, the Historical and Archeological Preservation Act, the National Environmental Policy Act, Pub. L No. 88-29, and other applicable statutes. No other formal requests for comments will be made.

Comments should be confined to substantive issues relevant to the issuance of a license. A copy of the application may be obtained directly from the Applicant. If an agency does not file comments with the Commission within the time set for filing comments, it will be presumed to have no comments. One copy of an agency's comments must also be sent to the Applicants representatives.

i. Comment Date: November 20, 1986

j. Description of Project: The proposed project would consist of: (1) the existing earthfill 10-foot-high Lake Creek diversion dam; (2) an existing 15-inch diameter, 2,300-foot-long PVC penstock; (3) a proposed powerhouse containing one generating unit with a rated capacity of 110 kW and an estimated average annual generation of 567,394 kwh; (4) a 200-foot-long, 34.5-kV transmission line to be connected to Idaho Power Company lines; and (5) appurtenant facilities. The estimated cost of the project is $75,000.

k. Purpose of Project: The power produced will be sold to Idaho Power Company.

RE: Permit No. 75-7427

A.W. Brown Co., Inc.
3416 Via Lido. Suite F
Newport Beach, CA 92663

Dear Permit Holder:

Enclosed is a copy of your approved Application for Permit. We direct your attention to the conditions of approval on the fourth page.

Please be advised that your application for permit has been approved because we no longer wait for approval from the Federal Energy Regulatory Commission (FERC) or the Idaho Public Utilities Commission (PUC) when the flow is less than 25 cfs and the power to be generated is less than 500 HP. However, you may still need to obtain approval from FERC and/or PUC.

Please be advised that prior applications for permit have been filed to appropriate water from your source which may impact the availability of water to be used under this permit. Therefore, you should be sure to analyze the impact of these rights before making a major investment into your water use project.

Be sure to note the special condition requiring you to install a measuring device, or a flow measurement port, or to provide a certified measurement or computation of flow based upon the design of the system to be prepared by a professional engineer.

Please note the requirement that as a permit holder you must commence the excavation or construction of diverting works within one year of the date the permit was issued, and you must proceed diligently until the project is completed. The enclosed blue card must be completed and returned to this office as soon as you commence construction, no later than one year from the date the permit was approved.

We have enclosed a form entitled "Instructions for Proof of Beneficial Use". Please read the instructions carefully since you must take further action to develop this permit into a license.

Sincerely,

JIM JOHNSON
Water Rights Supervisor

RE: Application for Permit No. 75-7427

Dear Mr. Carlsen:

In response to your letter of September 23, 1985, to A. W. Brown Co., Inc., regarding the application for Permit No. 75-7427, you will find enclosed several drawings that show the engineering design of the facility identified as follows:

1) SUNSHINE POWER PROJECT
Lake Creek Diversion Dam, Pipeline, Powerhouse, and Fish Holding Pond

2) SUNSHINE POWER PROJECT
Lake Creek Diversion Dam

3) SUNSHINE POWER PROJECT
Powerhouse and Equipment Layout

These drawings describe in detail the entire project which is a combination irrigation and hydropower project. The dam and the pipeline have been completed and are in use for irrigation purposes under Permit No. 75-7419.

The powerhouse construction and equipment procurement await the granting of unambiguous water rights and subsequent application to FERC and application to Idaho Power Company for interconnection. As soon as the water rights are established, these applications will be processed and upon approval, the project will be completed within six months.

RE: Application for Permit No. 75-7427 Hydropower on Lake Creek

A. W. Brown Co., Inc.
3416 Via Lido, Suite F
Newport Beach, CA 92663

Dear Mr. Brown:

Prior to recommending final action on the above application, this Department will need documentation confirming your intent to proceed with the project.

To demonstrate your pursuing construction of the project this Department will accept one or more of the following items:

-Engineering feasibility report comparing power generation potential with an itemized estimate of construction costs.

-Preliminary engineering design of the facility identifying approximate locations, dimensions, and elevation of the diversion structure, penstock, and generating facility.

-Copies of signed contracts for construction of the project or purchase of the power.

-Verification that an application has been submitted to FERC.

Further action on the application will be delayed until the supplemental information has been received or a period of 90-days has lapsed. Failure to provide the requested information could jeopardize the priority of the application.

Respectfully submitted,

ERNEST CARLSEN
Assistant Regional Supervisor

SUBJECT: Operation of Diversion Dam on Lake Creek, Lemhi County, Idaho, in Accordance with Water Permit Application No. 75-7427

Dear Mr. Reingold:

This letter will advise you that A. W. Brown Co., Inc., will cooperate fully with the Idaho Department of Fish and Game regarding the preservation of the remnant population of fish in Lake Creek. As stated in my letter to you of April 22, 1985, I agree to maintain a constant instream flow of not less than 1.56 cubic feet per second which, it is my understanding, dictated the design of the fish ladder furnished to me by the Department of Fish and Game.

In addition, I hereby commit to the construction of adequate screening of the intake structure to prevent intrusion of fish into the system, the design of which is under investigation at this time.

I trust the above-stated agreement to comply with the requirements of the Idaho Department of Fish and Game will allow you to approve the application for water use permit No. 75-7427 by the A. W. Brown Co., Inc.

Very truly yours,

A. W. Brown

Department of Fish & Game
1515 Lincoln Road
Idaho Falls, ID 83401

Dear Mr. Pollard:

Your protest against the approval of the above referenced application has been received and a copy has been sent to the applicant. The Department suggests you contact the applicant directly in an effort to determine what is proposed by the application and to attempt to resolve the protest.

If you do not advise us within twenty (20) days that the protest has been resolved, the matter will be scheduled for conference and/or hearing. At such a conference and/or hearing, the following are the principle items the Department can consider in either approving or denying an application for permit (Section 42-203, Idaho Code):

1. Will the proposed use reduce the quantity of water under existing water rights?

2. Is the proposed water supply insufficient for the purpose intended?

3. Is the application made in good faith or for delay or speculative purposes?

4. Has the applicant sufficient financial resources with which to complete the project?

5. Will the proposed use under this permit conflict with the local public interest?

If this office can be of further assistance, please contact us.

Very truly yours,

RONALD D. CARLSON

RE: Permit No. 75-7427
A.W. Brown - Lake Creek

Dear Ernie:

Idaho Department of Fish and Game personnel have reviewed the above referenced application and have the following comments.

Mr. Brown has recently constructed a small dam on Lake Creek and has installed a fish ladder and screening device as per our specifications. While Lake Creek does not contain anadromous fish, it does contain what we believe is a remnant population of original Williams Lake rainbow stock which we consider to be of high value. The additional request for 6 cfs of water for hydrogeneration will exceed the maximum flow of Lake Creek during a large portion of the year. We feel it is important that minimum flows to properly operate the fish ladder and provide adequate rearing habitat below the intake be provided. These in-ladder and in-stream flows have not been established.

It is also necessary that power intake structures be properly screened to prevent intrusion of fish into the system and adequate flows be left instream to allow both upstream and downstream passage.

Because these issues have not been fully addressed or resolved, we protest the issuance of this permit at this time.
