CONDITIONS/REMARKS:

1. The maximum diversion volume is defined as the maximum allowable volume of water that may be diverted annually from the source under this right. The right to use water confirmed by this license is limited to the amount which can actually be beneficially used. The maximum diversion volume may be adjusted to reflect cropping patterns or acceptable standards of water delivery efficiency.
2. This water right is appurtenant to the described place of use.
3. This right is subject to all prior water rights and may be forfeited by five years of non-use.
4. Modifications to or variance from this license must be within the limits of Section 42-222, Idaho Code, or the applicable Idaho law.

ACTION OF THE DIRECTOR, DEPARTMENT OF WATER RESOURCES

This is to certify that I have examined Application for Permit to appropriate the public waters of the State of Idaho No. 75-7131, and said application is hereby approved.

1. Approval of said application is subject to the following limitations and conditions:

- a. SUBJECT TO ALL PRIOR WATER RIGHTS.
- b. Proof of construction of works and application of water to beneficial use shall be submitted on or before September 1, 19 84.
- c. The rate of diversion, if water is to be used for irrigation under this permit, when combined with all other water rights for the same land shall not exceed 0.02 cubic feet per second for each acre of land.
- d. Other: (1) The issuance of this permit in no way grants any right-of-way or easement across the land of another. (2) Maximum rate of diversion under this permit shall not exceed 0.10 cubic feet per second.

Dear Sir;

Reference to application No 75-131, Hart
Sheryl A. & Fritz, Daniel L., of 0.20 cfs
water from Kriley Creek.

Kriley Creek is about 7 miles long and is
of intermittent flow. During a low water
year surface water will not run into the
Salmon River except when there is a rain.
(this is true when no water has been diverted.)

I protest the granting of this water

Dear Sir;

Reference to application No 75-7131, Hart
Sheryl A. & Fritz, Daniel L., of 0.20 cfs
water from Kriley Creek.

Kriley Creek is about 7 miles long and is
of intermittent flow. During a low water
year surface water will not run into the
Salmon River except when there is a rain.
(this is true when no water has been diverted.)

I protest the granting of this water
permit since we have a prior permit
No. 75-7022 dated 1-21-72.

RE: App. for Permit 75-7131

Dear Sir:

Your protest against the approval of the above-referenced application has been received and a copy has been sent to the applicant. The Department suggests that you contact the applicant directly in an effort to determine what is proposed by the application and to attempt to resolve the protest.

If you do not advise us within twenty (20) days that the protest has been resolved, the matter will be scheduled for conference and/or hearings. At such a conference and/or hearings, the following are the principle items the Department can consider in either approving or denying the application for permit (Section 42-203, IDAHO CODE):

1. Will the proposed use reduce the quantity of water under existing water rights?
2. Is the proposed water supply insufficient for the purpose intended?
3. Is the application made in good faith or for delay or speculation?
4. Has the applicant sufficient financial resources with which to complete the project?
5. Will the proposed use conflict with the local public interest?

You will be notified at a later date of the time and place of the conference and/or hearings. If we can be of any assistance, please contact us.
